JUPAS Catalogue No. JS1000

Programme Full Name BSc Computational Finance and Financial Technology
理學士(計算金融及金融科技)

Programme Short Name BScCFFT

Short Description **Why BSc Computational Finance and Financial Technology?**

The BSc Computational Finance and Financial Technology major has two streams, namely (1) Computational Finance Stream and (2) Financial Technology Stream.

Computational Finance stream is an interdisciplinary stream offering a comprehensive curriculum that covers state-of-the-art training in finance, mathematics, statistics and computer programming. The integrated application of these four areas is in great demand by today's financial markets.

Financial Technology stream gives students an interdisciplinary education in business, information technology, and innovation by training them in mathematics, statistics, programming, information systems, and finance. The FinTech core courses include blockchain, big data, cybersecurity, regulatory technology (RegTech), Python programming, machine learning, technology entrepreneurship, and Fintech capstone project.

Students from both Computational Finance and Financial Technology streams can apply for admission to the [Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University](#). Upon completion of this joint degree program, students will receive the dual awards conferred by Columbia University and CityU.

Career Prospects

Computational Finance stream provides comprehensive training and internship opportunities to prepare students to establish competitive advantages in financial careers such as asset management, investment banking and risk management, as well as further advanced studies.

Financial Technology stream prepares students for the careers in the emerging FinTech industry and business and technology sectors that require solid technology training and finance domain knowledge as well as further advanced studies.

Remarks

Indicative intake quotas for JUPAS and non-JUPAS admissions, subject to change.

JUPAS Catalogue No.	JS1001
Programme Full Name	BBA Global Business 工商管理學士(環球商業)
Programme Short Name	BBAGBU
Short Description	Why BBA Global Business?

The BBA Global Business programme offers a globally oriented curriculum and opportunities for students to develop a global mindset, think strategically and contribute to companies doing business internationally. Our application-oriented courses prepare the next generation of managers to lead global teams. In the Global Business Consultancy Project, for instance, students will actually work in a multinational corporation and get involved in solving real business problems.

Students have opportunities to enhance their leadership and management skills while working with others from different cultures through study tours, executive forums, career development workshops, structured exchange programmes, internships, and case competitions. Students are offered three semester-based overseas exchange opportunities* (one compulsory and two optional) and take part in lots of other international immersion opportunities to widen their global exposure.

Students can apply for admission to the [Joint Bachelor's Degree Programme between City University of Hong Kong and Columbia University](#). Upon completion of this joint degree programme, students will receive the dual awards conferred by Columbia University and CityU.

** Subject to fulfilling the requirements for participating in the exchange studies.*

Career Prospects

Graduates of this programme are equipped with the knowledge and skills needed to work as associates in global companies, professional business consulting firms and marketing or management positions in firms doing business internationally. Some examples include:

- J.P. Morgan
- Blackrock
- HSBC
- Citibank
- Bank of America
- Ernst and Young
- BnP Paribas

JUPAS Catalogue No.	JS1002
Programme Full Name	BBA Accountancy 工商管理學士(會計)
Programme Short Name	BBAAC
Short Description	Why BBA Accountancy?

Known as the “language of business,” accounting is certainly vital knowledge in our quest for business excellence and fundamental to success in the business world. Studying accounting provides you with great employment potential and numerous educational opportunities. Aside from becoming an accounting professional, an accounting degree offers a doorway to almost every business opportunity you can dream of, from financial auditing to business consulting. If you want to pursue further studies in business, accounting is definitely also a perfect place to start.

Our BBA Accountancy program offers two streams. The Professional Accounting stream is designed to equip students with accounting knowledge and professional skills for the profession. The ESG and Tech stream is designed to equip students with digital technology, risk management and data analytical skills, in addition to the fundamental accounting knowledge.

BBA Accountancy students are eligible to apply for the following joint degree programme:

- [Joint Bachelor's Degree Programme between City University of Hong Kong and National Taiwan University](#)

Career Prospects

The Department of Accountancy facilitate students' acquisition of the qualifications and skills you need for career advancement in prominent multinational certified public accounting firms, government departments, commercial, industrial and public organisations.

Our graduates have secured their positions in Alibaba, Bloomberg, Citi Group, Deloitte, Ernst & Young, Goldman Sachs, Hang Sang Bank, HSBC, Inland Revenue Department, JPMorgan, KPMG, Moody's, Morgan Stanley, PricewaterhouseCoopers, Swire Group and The Hong Kong Jockey Club, etc. In addition, the Department has built up a strong alumni network for students' life-long career development with outstanding graduates reaching management and executive level in various organizations.

See a career development story of our accountancy graduate at: https://www.cb.cityu.edu.hk/ac/e-circular/10/Resource/Student_related/Challenge%20Your%20Limit-Edmund%20Ho/Article_Challenge_Your_Limits_Edmund_Ho.pdf.

JUPAS Catalogue No.	JS1005
Programme Full Name	BBA Management 工商管理學士(管理學)
Programme Short Name	BBAMGMT
Short Description	Department of Management

The Department aims at providing professional business knowledge and skills that are grounded in the latest research in Management. We are equipping students with the professional skills critical for job success, as well as the interpersonal and analytical skills necessary for developing a successful career locally and globally.

Why BBA Management

The BBA Management programme aims to equip students with the abilities and skills to successfully manage people and teams within an organisation and manage the organisation itself, in both local and international environments. Students of this programme will acquire the knowledge to meet management challenges including decision making, leading and motivating people, leading organisational change as well as strategising and implementing business decisions locally and internationally. The major offers a choice of two distinctive streams: Human Resources Management (HRM) and Strategy and International Management (SIM). Students can indicate their preferred stream at the beginning of Year 2.

HRM Stream: The HRM stream is designed for students who wish to pursue a career as an in-house specialist or outside consultant in the human resource management area.

SIM Stream: The SIM stream is designed to equip students with the knowledge and skills to develop effective strategies to manage in the international business environment, particularly in the Asia Pacific Region.

Students can apply for admission to the [Joint Bachelor's Degree Programme between City University of Hong Kong and Columbia University](#). Upon completion of this joint degree programme, students will receive the dual awards conferred by Columbia University and CityU.

Career Prospects

Employers of our graduates in recent years include well-known organisations, such as Bank of China, EY, HK Jockey Club, Hospital Authority, HSBC, KPMG, Morgan Stanley, PwC. Graduates are working in highly sought after positions including management trainee, graduate trainee, business analyst, HR business partner, and HR executive.

Programme Full Name BBA Marketing
工商管理學士(市場營銷)

Programme Short Name BBAMKT

Short Description **Why BBA Marketing?**

CityU BBA Marketing stands out from other BBA and Marketing programmes by providing a pioneering approach that consists of:

- **i-Marketing +**

The “i” element of our programme refers to INTERACTIVE, INTERNATIONAL and INTERLLIGENCE. With its discovery-enriched curriculum design, students in CityU Marketing interact and connect with world-class professors, top business leaders, experienced alumni, and executives from partner companies. They are strong in teamwork, presentation, problem-solving, and communication with people of different backgrounds and cultures. As key technologies and trends will drive changes in the marketing industry, our various digital marketing courses are set to prepare students for facing the challenges of the digital marketing environment.

- **Global Marketing Stream**

The stream aims to equip students with marketing knowledge in a global context. Students are expected to be outgoing and culture-sensitive, and prepared to be exposed to marketing strategies and institutions in various regions and countries. They have to complete a foreign language course and may have a chance to join more than one exchange program during their study period. All of these efforts ensure students are well-equipped and possess a strong foundation to succeed in the future world of work.

- **Marketing Analytics Stream**

The stream aims to prepare students to be big data marketing experts with advanced data analysis skills. They are capable of interpreting and utilizing data to develop effective marketing strategies. Students are expected to be strong in numeric skills and statistical knowledge and be proficient in social media and digital marketing. Students may participate analytics-related internships and professional certification courses outside the program to become certified professionals in the field.

- **[Joint Degree Programs with ESSEC Business School \(ESSEC\) and National Taiwan University \(NTU\)](#)**

The Department of Marketing distinctly encourages students to broaden their horizons and to actively engage in exchange and overseas internship programmes. In line with its aspirations, the Department organises joint degree programmes with top universities - ESSEC Business School and National Taiwan University (NTU) - for elite students to obtain two internationally recognised degrees within 4 years. Through the programme, students can sharpen their awareness of culture while building all-rounded competitive strengths and developing a blueprint for their future career development.

- ESSEC Business School (ESSEC) is one of the top Business Schools in Europe and one of the few Business Schools well-recognised by all EQUIS, AMBA and AACSB. It was ranked top for Bachelor Degrees in France by the French magazine "Le Point: in 2022. ESSEC provides internationalised education: one-third of its students are from 98 countries and it receives over 500 inbound exchange students from around the globe every year.

- National University of Taiwan (NTU) is the top university in Taiwan and ranked 68th on the QS World University Ranking in 2022, being the only university ranked within the Top 100 Universities in the World. NTU is the alma mater of many eminent Taiwanese, including the Nobel Prize winner.

Career Prospects

Marketing careers are not only exciting and rewarding, but can also lead to top management positions. Marketing is an ideal field for those who enjoy working in teams and formulating strategies for company growth.

Business Career Services

The Business Career Service is committed to helping you enhance your employability by guiding you through all stages of the career development process, and by providing you with personalised career consultation with a coordinated team of advisors, plus career development workshops and career fairs, recruitment events, and up-to-date career related information. We offer students unique opportunities to build sustainable networks with industry communities. We aim to achieve these goals through providing

- Personalised service
- Up-to-date information
- Sustainable networks
- Coordinated advisors

JUPAS Catalogue No.	JS1012
Programme Full Name	Department of Economics and Finance (options: BBA Business Economics, BBA Finance) 經濟及金融系 [選項: 工商管理學士(商業經濟)、工商管理學士(金融)]
Programme Short Name	EF
Short Description	The Department of Economics and Finance provides solid training in both the theory and application of economics and finance. The Department aims to equip graduates with cutting-edge knowledge in modern economics and finance and to provide Hong Kong with the young financial executives, economists and business leaders it needs. The mission of the Department is to be a centre of excellence in research and teaching, using economics and finance for business and public sector decision making in Hong Kong, Mainland China and other economies in the world.

The Department currently offers the following two majors:

- BBA Business Economics
- BBA Finance

Why BBA Business Economics?

BBA Business Economics provides solid training in economic strategies for improving business operations, government policies and economic forecasting. Students are open for a wide range of career options, e.g. corporate strategist, management consultant, economist, private banker, investment advisor.

BBA Business Economics students are eligible to apply for the following joint degree programmes:

- [Joint Bachelor's Degree Programme between City University of Hong Kong and National Taiwan University](#)
- [Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University](#)

Why BBA Finance?

BBA Finance provides rigorous training in asset valuation, portfolio and risk management, derivative securities, global investment and quantitative methods. The programme prepares you for key financial management positions in business and government sectors.

Career Prospects

Graduates are ready to develop career as corporate strategist, management consultant, economist, private banker, investment advisor and key financial management positions in business and government sectors.

Admission Arrangements

JUPAS applicants will be considered for admission to first-year studies at the Department of Economics and Finance. Students will enter a major (current major options: Business Economics; Finance) after one year of study. The top 40% of students[#] will have a free choice of majors offered by the Department. The other 60% of students will be allocated a major within the Department, subject to the availability of places and the selection criteria set by individual majors. Programme Full Name Department of Information Systems (options: BBA Global Business Systems Management, BBA Information Management)
資訊系統學系 [選項: 工商管理學士(環球商業系統管理)、工商管理學士(資訊管理)]

Programme Short Name IS

Short Description

Business IS Smart

Amazon, Facebook and Google have propelled business into a world of smart business. Business is made smart with information systems, such as those based on artificial intelligence (AI), big data and cloud services (ABC).

The Department of Information Systems in the College of Business is the largest Information Systems department in Hong Kong and one of the top three in the world for research productivity [1]. The Department is committed to nurturing smart people for smart business with careers of the future.

Technology IS Changing the World

AI, big data and cloud services have played important roles in business transformation today. Together with social networks, 5G mobile, FinTech and other information systems, these technologies are driving business innovations in financial services, accounting and professional services, online services and marketing.

Research IS Driving Innovation

We are among the best in Information Systems in the world. Our faculty members are doing cutting-edge research in information systems for business innovations. Our students are encouraged to conduct undergraduate research with faculty members in the Department.

Practice IS Useful

Our students will have opportunities to experience business in real-world contexts with leading business executives from our EMBA programmes and alumni.

The Department provides Smart Business Scholarships to recognise students with outstanding performance and support them in regional and international business competitions. Our students make business smart with information systems.

Information Systems IS Smart Business

The Department offers new and comprehensive information systems courses to meet the rapidly changing nature of information technologies such as social networks, mobile apps, AI, big data analytics, cloud services and FinTech. Our students will not only be equipped with the latest knowledge but also with communication and project management skills and professional attitudes. Our graduates will be well prepared to help companies make business smart with information systems.

Today IS Good

When you are admitted to the Department of Information Systems (options: BBA Global Business Systems Management, BBA Information Management), you will study general BBA courses in year one. At the end of year one, you can choose to major in either BBA Global Business Systems Management (GBSM) or BBA Information Management (IFMG).

Tomorrow IS Even Better

Our graduates start their careers as management trainees, business analysts, data scientists, system analysts and programmers in global banks, consulting and technology firms, such as HSBC, BOC, PWC, Apple, Alibaba, Facebook, Google and IBM.

[1] *Research Ranking of the Association for Information Systems*
(<http://www.aisnet.org/>)

Admission Arrangements

JUPAS applicants will be considered for admission to first-year studies at the Department of Information Systems. Students will enter a major (current major options: Global Business Systems Management; Information Management) after one year of study. The top 40% of students[#] will have a free choice of majors offered by the Department. The other 60% of students will be allocated a major within the Department, subject to the availability of places and the selection criteria set by individual majors. Programme Full Name BBA Global Business Systems Management
工商管理學士(環球商業系統管理)

Programme Short Name BBAGBSM

Short Description **Why Study BBA Global Business Systems Management?**

BBA Global Business Systems Management (GBSM) aims to nurture students to become smart business managers.

GBSM IS Smart Global

The best way to learn about the world is to experience it. Two semester-long exchanges to recognised universities in the US, Europe and/or Asia encourage our students to develop a global mindset. Enjoy a flexible curriculum and choose courses during your exchange that match your own interests and needs.

GBSM IS Smart Tech

Our students develop a technology mindset as they learn how modern information systems such as AI, big data and cloud services are transforming the business world. They can participate in a week-long Smart Business Study Tour to Stanford University and visit AAAF (Apple, Amazon, Alphabet and Facebook) companies in Silicon Valley, or join a one-month Smart Business Project Tour for visits and work experience in FinTech and/or BAT (Baidu, Alibaba and Tencent) companies closer to home.

GBSM IS Smart Business

Our students also develop a business mindset as they learn about new IS business strategies and Internet business models. Students gain the knowledge and skills to analyse high-growth technology companies and make wise investment decisions. They also develop good communication and project management skills, which prepare them for management trainee jobs in multinational companies.

GBSM IS a Smart Choice

Our students have opportunities to conduct undergraduate research or consulting projects with faculty members in the largest IS department in Hong Kong and one of the best IS department in research productivity in the world [1]. The Department provides Smart Business scholarships to support our undergraduate students in regional and international business competitions. Our students make business smart with information systems.

GBSM IS Smart Future

Our graduates begin their careers as management trainees and business analysts in global banks, consulting and technology firms, such as HSBC, BOC, PWC, Apple, Alibaba, Facebook, Google and IBM.

In 2018, 94% of our graduates were hired immediately after graduation and 6% of our graduates went overseas for further studies. The highest and average monthly salaries of our graduates from BBA Global Business Systems Management were approximately HK\$60K and HK\$24K, respectively. Their average salaries were 36% higher than those of BBA graduates of the Business College.

Programme Full Name BBA Information Management
工商管理學士(資訊管理)

Programme Short Name BBAIFMG

Short Description **Why Study BBA Information Management?**

BBA Information Management (IFMG) nurtures students to become smart business professionals.

IFMG IS Smart Double Major

Our students have great flexibilities to complete a double major degree in Information Management and in Accounting, Finance or Marketing. Local core industries, such as financial services, professional services, logistics and trading services, are being transformed by big data and artificial intelligence (AI). Our graduates have outstanding opportunities to play a major role in this digital transformation process.

IFMG IS Smart Innovation

Our students gain the knowledge and skills to apply modern information systems (e.g., AI, big data and cloud services) to business innovations. They can participate in a one-week Smart Business Study Tour to Stanford University and visit AAAF companies (Apple, Amazon, Alphabet and Facebook) in Silicon Valley, or join a one-month Smart Business Project Tour for visits and work experience in FinTech and/or BAT companies (Baidu, Alibaba and Tencent) closer to home.

IFMG IS Smart Business

Our students gain a business mindset from exposure to new IS business strategies and Internet business models. They will gain the knowledge and skills to analyse high-growth technology companies and make wise investment decisions. They will also gain good communication and project management skills that will qualify them for project management jobs in multinational companies.

JUPAS Catalogue No.	JS1025
Programme Full Name	Department of Management Sciences (options: BBA Business Decision Analytics, BBA Global Operations Management) 管理科學系 [選項: 工商管理學士(商業決策分析)、工商管理學士(環球營運管理)]
Programme Short Name	MS

Short Description **Why Department of Management Sciences?**

Management Sciences is concerned with developing and applying models, concepts, and tools that enable organizations and companies to master big data and achieve operational efficiency. These skills are in high demand in today's highly competitive business environment for better problem solving and decision making. When students are admitted to the JS1025 Department of Management Sciences Programme (options: BBA Business Decision Analytics, BBA Global Operations Management), they will study general BBA courses (Introduction to Financial Accounting, Business Statistics, Operations Management, Management, Microeconomics, Information Management, Marketing) and Gateway Education courses (such as English Language) in the first year. At the end of the first year, students will be invited to choose either BBA Business Decision Analytics or BBA Global Operations Management major through a major allocation exercise.

The Department currently offers the following two majors:

- Business Decision Analytics
- Global Operations Management

Why BBA Business Decision Analytics?

The BBA Business Decision Analytics (BDAN) programme aims to develop students' qualitative and quantitative ability to solve business problems and make decisions through DEEP data analysis. It provides a comprehensive training in business analytics, statistics, business intelligence, risk management, marketing analysis, business knowledge and communication skills.

BBA Business Decision Analytics students are eligible to apply for the following joint degree programme:

- [Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University](#)

Why BBA Global Operations Management?

The BBA Global Operations Management (GOM) programme aims to equip students with the knowledge and skills to tackle the operational challenges of contemporary managers. Students learn to identify operations improvement opportunities for companies, propose and implement improvement solutions, and present their findings and results to senior executives.

Career Prospects

BBA BDAN graduates are prepared for statistical, analytical and managerial positions in financial, commercial and government sectors.

BBA GOM graduates are prepared for careers as management trainees, operations managers, operations analysts, project managers, etc. They typically begin in areas such as consulting, financial operations, health care operations, procurement and sourcing, retail management and supply chain management.

Admission Arrangements

JUPAS applicants will be considered for admission to first-year studies at the Department of Management Sciences. Students will enter a major (current major options: Business Decision Analytics; Global Operations Management) after one year of study. The top 40% of students[#] will have a free choice of majors offered by the Department. The other 60% of students will be allocated a major within the Department, subject to the availability of places and the selection criteria set by individual majors. Please click [here](#) for details.

based on CGPA with no failed grades and completion of at least 30 credit units including College/Department required courses

Programme Full Name BBA Business Decision Analytics
工商管理學士(商業決策分析)

Programme Short Name BBABDAN

Short Description **Why BBA Business Decision Analytics?**

The BBA Business Decision Analytics (BDAN) programme aims to develop students' qualitative and quantitative ability to solve business problems and make decisions through DEEP data analysis. We consist of two study streams:

Decision Analytics Stream

- Provide professional training in business analytics, statistics, business intelligence (big data analysis), risk management, business knowledge and communication skills
- Develop students' ability to manage and to analyze huge volume of business data using modern computer software which are popularly used in global business world
- Enable students to solve business problems by a judicious application of technical and practical skills
- Enable students to obtain internationally recognized professional qualifications such as SAS certification and Financial Risk Manager (FRM) Examinations
- Prepare students for a statistical and analyst position in the financial, commercial, and government sector

Data Informatics Stream

- Provide professional training in data analytics, information management, business knowledge and communication skills
- Enable students to acquire knowledge in two different industries: Management Sciences and Information Systems
- Enable students to obtain international professional qualifications (Base SAS)
- Prepare students to work in the areas which require both data analytics and information management knowledge

BBA Business Decision Analytics students are eligible to apply for the following joint degree programme:

- [Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University](#)

Career Prospects

Our graduates are prepared to work in the areas which require data analytics, statistics and information management knowledge.

JUPAS Catalogue No.	JS1027
Programme Full Name	BBA Global Operations Management 工商管理學士(環球營運管理)
Programme Short Name	BBAGOM
Short Description	<p>Why BBA Global Operations Management?</p> <p>The BBA Global Operations Management (GOM) programme aims to enable students to develop student's analytical abilities, problem-solving skills, and technical competence in operations management, operations strategy, and supply chain management in a global context. Many companies are multi-national corporations and serve multiple global markets with products sourced and produced across many continents. In this increasingly interconnected and interdependent global economy, the process of delivering supplies and goods from one place to another is accomplished through technological innovation. The programme provides students with an integrated curriculum combining general business foundation and advanced management topics to prepare them for managerial positions in a global economy. Students will develop a critical appreciation of the roles and impact of operations and supply chain management on the success and growth of an organization. A strategic understanding of how global operations and supply chain, through planning, sourcing, making, delivering, and returning products and services to global businesses and their customers, can achieve competitive advantages. The programme enables students to diagnose operational and business problems, develop and implement solutions for various kinds of multi-national organizations in the financial, commercial, and service sectors.</p> <p>Career Prospects</p> <p>BBA GOM graduates are prepared for careers as management trainees, operations managers, operations analysts, project managers, etc. They typically begin in areas such as consulting, financial operations, health care operations, procurement and sourcing, retail management and supply chain management.</p>

Programme Full Name	School of Creative Media (options: BA Creative Media, BSc Creative Media, BAS New Media) 創意媒體學院 [選項: 文學士(創意媒體)、理學士(創意媒體)、文理學士(新媒體)]
Programme Short Name	SCM
Short Description	<p>The School of Creative Media (SCM), the region's first such institution, was founded to nurture a new generation of interdisciplinary artists and creative media professionals, and to develop new ideas and technologies for the creative industries in Hong Kong, the mainland China and across the world.</p> <p>Our students are trained across disciplines spanning computer science, fine arts, visual design, creative writing, cultural studies and digital technology. We bridge the boundaries between art and science and integrate traditional and new media. We value applied creativity, cultural awareness and critical thinking as much as business sense and entrepreneurial success.</p> <p>Our internationally recruited faculty members are among the foremost artists and researchers in the field, bringing a global perspective and forging many institutional partnerships for the School. Our graduates consistently demonstrate high employability, with the majority now working as independent artists and professionals in the creative industries, film, television, advertising, publishing, media production and information technology. Many have won prestigious international and local awards for creative and technical innovation.</p> <p>With strengths arising from a unique mix of East and West, Hong Kong has seen a major expansion in its creative economy and has emerged as a thriving hub of new media culture in Asia and the world. The CityU School of Creative Media has played an instrumental role in this development as the leading force in creative media education and research in Hong Kong.</p> <p>BA Creative Media and BAS New Media students are eligible to apply for the following joint degree programme:</p> <ul style="list-style-type: none">• Joint Bachelor's Degree Programme between City University of Hong Kong and Leuphana University
Remarks	<p>Admission Arrangements</p> <p>JUPAS applicants will be considered for admission to first-year studies at the School of Creative Media. JUPAS Catalogue No.	JS1044
Programme Full Name	BAS New Media 文理學士(新媒體)
Programme Short Name	BAS
Short Description	<p>Media creators are increasingly using scientific concepts in their work. Games, for instance, use ideas from physics, biology and mathematics. Multimedia artists are also learning to collaborate with scientists when producing their work. This ground-breaking major is a response to this cutting-edge trend in the creative world.</p> <p>This major emphasises lateral thinking and understanding across professions to prepare graduates for an increasingly interdependent and integrated world. Students use technology as an artistic medium, generating learning in a progressive and interdisciplinary context that bridges art, science, technology and the humanities. The curriculum encourages creative and critical thinking in the domain of digital content, together with the successful expression of a socially engaged personal vision through various digital media formats. Graduates receive professional training in state-of-the-art facilities to prepare them for future careers in the use of art, science and technology in the creative industries, innovative education and cultural management.</p> <p>This major is especially designed for students who are not afraid to break down the barriers between the arts and the sciences.</p> <p>BAS New Media students are eligible to apply for the following joint degree programme:</p> <ul style="list-style-type: none"> • Joint Bachelor's Degree Programme between City University of Hong Kong and Leuphana University

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

CityU accepts repeat results and will use the best results in assessing whether applicants fulfil the entrance requirements and to calculate admission scores.

Programme Entrance Requirements

Same as General Entrance Requirements

Notes for Elective Subject(s):

"Attained with Distinction I or II" in the following Applied Learning subjects may be accepted as one elective subject for JS1044:

- Subjects from the following Applied Learning course clusters (subject list available at the [Education Bureau website](#)):
 - Design Studies
 - Media Arts
 - Performing Arts
 - Films, TV and Broadcasting Studies
 - Media Production and Public Relations
 - Medical Science and Health Care
 - Psychology
 - Civil, Electrical and Mechanical Engineering
 - Information Engineering
 - Services Engineering
 - Business Studies ('Data Application for Business' course only)

Portfolio Submission:

HKDSE applicants who select JS1044 as their Band A or B choices are requested to submit a portfolio of creative works to the School of Creative Media (SCM) via an online system. Applicants who select the School as other band choices are also welcome to submit a portfolio of creative works. Details of the portfolio submission

JUPAS Catalogue No.	JS1052
Programme Full Name	Bachelor of Engineering in Environmental Science and Engineering and Bachelor of Business Administration in Finance 工學士(環境科學及工程學)與工商管理學士(金融)
Programme Short Name	BEngESE&BBAFIN
Short Description	<p>As the demand for professionals with expertise in environmental engineering, green finance, and Environment Social Governance (ESG) continues to rise, it has become increasingly apparent that there is a shortage of local financial professionals with expertise in ESG, as noted in the Chief Executive's 2022 Policy Address. Given Hong Kong's strength as an international financial centre, it is imperative to further establish its status as a preferred ESG investment hub. Investors will likely shift their priority to companies with high ESG performance and commitment towards the carbon neutrality target. Moreover, areas like green finance and carbon emission trading are gaining importance in the financial field.</p> <p>In response to the aforesaid developments, the School of Energy and Environment is proud to offer, in collaboration with the Department of Economics and Finance, a new double degree programme, the Bachelor of Engineering in Environmental Science and Engineering and Bachelor of Business Administration in Finance.</p> <p>Through this double degree programme, students will receive a rigorous and comprehensive education in both environmental engineering and finance. They will acquire the necessary skills and knowledge to address the challenges of sustainable finance, not just in Hong Kong but also in the global context. By bridging the gap between these two fields, graduates of this programme will be well-prepared to tackle complex sustainability issues from a multidisciplinary perspective.</p>

Programme Full Name	Bachelor of Laws 法律學學士
Programme Short Name	LLB
Short Description	<p>The School of Law aspires to be an internationally renowned centre for legal research and teaching in the Asia-Pacific region. The School's mission is to provide students with an excellent education and to contribute to the advancement of knowledge. Through cooperation with other law schools and professional organisations, the School aims to foster an environment in which both students and staff can develop and use their legal knowledge, professional skills and expertise for the benefit of the entire Hong Kong community.</p> <p>The Bachelor of Laws (LLB) programme is delivered over four years and emphasises the acquisition and development of wide-ranging legal and intellectual skills. Learning and teaching are interactive and aligned with intended learning outcomes. Students are trained to apply laws and legal principles to solve real-life problems. The LLB programme provides a firm foundation for a career in law and law-related fields, public service and post-graduate studies in Hong Kong and overseas.</p> <p>Students receive a well-rounded legal education from our staff, all of whom are distinguished teachers and scholars from Hong Kong, the Mainland China, the UK, Australia, India, Malaysia, etc. In addition, students have the opportunity to be taught by visiting faculty from law schools all around the world.</p> <p>Our LLB programme guides students to develop the skills, knowledge and attitude required to put them within the best and brightest minds applying for jobs in law, business, civil service, banking and other fields.</p>

Programme Full Name	School of Data Science (options: BSc Data Science, BSc Data and Systems Engineering) 數據科學學院 [選項：理學士 (數據科學)、理學士 (數據與系統工程)]
Programme Short Name	SDSC
Short Description	<p>City University of Hong Kong offers two unique undergraduate programmes, BSc Data Science and BSc Data and Systems Engineering, which are designed to cultivate data science professionals capable of applying and creating the data science knowledge required to support social and economic development in Hong Kong and beyond. Data science, as a rapidly growing field, focuses on solving problems and furthering social progress using vast amounts of data collected in various industries, commerce and applied sciences. A data science professional is trained to use and extract insights from these data, apply to and solve real-world problems in the data realm responsibly.</p> <p>BSc Data Science cultivates data scientists and data science professionals with rigorous theoretical and methodological knowledge of data science along with in-depth analysis and evaluation for applied problems.</p> <p>BSc Data and Systems Engineering cultivates data scientists and advanced data engineers with a solid understanding of the tools and techniques, with a focus on managing data and applying data science techniques to solve social and economic problems.</p> <p>Admission Arrangements</p> <p>JUPAS applicants will be considered for admission to first-year studies at the School of Data Science. Students will have a free choice of majors [current major options: BSc Data Science; BSc Data and Systems Engineering] offered by the School after one year of study.</p>

Programme Full Name BSc Data Science
理學士(數據科學)

Programme Short Name BScDSC

Short Description The BSc Data Science aims to provide data science graduates with essential training in the quantitative methods, statistical analysis techniques, data mining technology and computing tools required for the effective use and analysis of big and complex data for real-world applications that involve making sense of complex data to realize planning and decision making. The programme develops strong and interdisciplinary training in the ability to build data analysis reasoning, communication skills and ethic awareness in realistic inter-professional settings for commercial or public policy problems in various disciplines.

The programme provides three flexible modules of advance knowledge:

1. Artificial Intelligence
2. Social Media Analytics
3. Statistical Learning

Programme Full Name	BSocSc International Relations and Global Affairs 社會科學學士(國際關係及全球事務)
Programme Short Name	BSocScIRGA
Short Description	<p>The Bachelor of Social Sciences in International Relations and Global Affairs program explores Asia's place in the contemporary world and Hong Kong's strategic position in the region and the world. It aims to develop students' knowledge of socio-political, economic, and cultural processes of change occurring in Asia and to situate them in the broader international context, reflecting the increasing significance of Asia in world affairs. Through its interdisciplinary curriculum and training in social research, the International Relations and Global Affairs major seeks to equip students with analytic skills of value to organizations in diverse economic sectors in Hong Kong, Asia and beyond. The program is taught by faculty members from diverse disciplines of sociology, anthropology and political science. It enhances students' critical reasoning and problem-solving skills, and extends and deepens their regional and global perspectives. Four-year degree students enrolled at the City University of Hong Kong have a chance to apply for admission to the Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University during their second year. Students admitted to the Joint Program will earn two bachelor degrees, awarded by the two universities. Upon graduation, students are well equipped to pursue careers in both public and private sectors in a variety of fields, including business, project-planning and management, public relations, politics, research and education, mass media, politics, social enterprises and non-governmental and community organizations.</p>

JUPAS Catalogue No.	JS1103
Programme Full Name	BA Chinese and History 文學士(中文及歷史)
Programme Short Name	BACHIS
Short Description	<p>Founded in 2014 with a view to establishing excellent tertiary education, world-class research and an international reputation in Hong Kong, the Department of Chinese and History offers the major in Chinese and History with two streams - a) Chinese & b) History and Cultural Heritage. It aims to equip students with advanced and professional knowledge and a wide range of analytical and writing skills.</p> <p>Students will enter a stream (current stream options: Chinese, History and Cultural Heritage) after one year of study.</p> <p>The Chinese Stream strives to provide students with a solid and comprehensive training in Chinese language, Chinese literature, history and philosophy. The knowledge is both ancient and modern, and can be widely used in daily life. The training equips students with both in-depth knowledge and research skills for further academic work as well as for career development in the education, public affairs, administration, literature studies, media, editing and creative industries involving the use of Chinese. The Chinese Stream consists of four specialized areas of study, which are (1) Chinese language and literature, (2) Classical and modern Chinese literature, (3) Chinese classics and philosophy, and (4) Language use and writing.</p> <p>History and Cultural Heritage Stream equips the students with comprehensive and in-depth knowledge of history, particularly Chinese history knowledge. It also aims to provide the students with the necessary training as cultural professionals with historical background. History seeks to provide the student knowledge on past events, memories, collections, and interpretations of the past. It also trains the students to examine the cause-and-effect relationships in human affairs and addresses the complexity of the past in shaping contemporary society. Although Chinese history is the primary focus of the stream, it also offers the students courses related to world history and public history to acquire historical knowledge to understand other nations' different histories and cultures.</p> <p>History as a discipline is in their very process to synthesize other fields of social sciences, including anthropology, sociology, and economics, not to mention cultural history, to which Cultural Heritage belongs. Without a relatively systematic knowledge of History, it is difficult for a student to master the knowledge of Cultural Heritage well. On the other hand, locating Cultural Heritage within and with History, Cultural Heritage can provide a cultural perspective for students of History in return. This stream is designed based on these two inseparable and interactive parts of "History" and "Cultural Heritage".</p> <p>History and Cultural Heritage Stream provides the professional training necessary to nurture high caliber history-related professionals with cultural perspective and cultural professionals with historical knowledge. It meets the growing workforce needs resulting from the rapidly expanding capacity in history-related industries including education, libraries, publishing, mass-media, etc., and culture-and-heritage-related industries, including cultural tourism, museum management, exhibition industries, commercial galleries and archives, community heritage programs, entertainment and arts-related professions, cultural and creative industries, in the Greater Bay Area, particularly Hong Kong. It educates students to become historical and cultural professionals who are culturally literate and competent in managing and marketing culture and heritage, with extensive knowledge of Chinese history and Chinese cultural heritage, including knowledge of</p>

Hong Kong's history and cultural heritage. It also educates the students to understand Hong Kong's unique position in integrating the East and West cultures. For this goal, this stream also strives to educate the students to become cultural professionals with highly proficient English-language ability to promote one's culture and heritage and understand and respect the historical and cultural differences of other nations. Last but not least, History and Cultural Heritage Stream promotes professionalism in History and Culture and Heritage in support of maintaining Hong Kong's leading role in culture- and heritage-related professions and provides expert advice on the promotion of culture and the protection and preservation of heritage in the context of Hong Kong both as part of China and as an international city.

Students who choose to major in Chinese and History will enjoy the significant advantages of integrating the two streams and our interdisciplinary emphasis, and may go on to pursue a wide range of careers after graduation.

Remarks

Indicative intake quotas for JUPAS and non-JUPAS admissions, subject to change.

JUPAS Catalogue No.	JS1104
Programme Full Name	BA English 文學士(英語語言)
Programme Short Name	BAEN
Short Description	<p>The Department of English at City University of Hong Kong is an international leader in research on and teaching of English Studies in Asia. The Department is established as one of the most creative and dynamic English departments in the Asia-Pacific region. Equally important, the Department is committed to providing an innovative undergraduate programme that prepares students for their professional careers in management and administration; editing and publishing; teaching; public relations and advertising; and entertainment and the arts.</p> <p>The Department currently offers the following major:</p> <ul style="list-style-type: none">• BA English <p>The programme equips students with theoretical and practical knowledge in English language, literature, and professional communication. Our courses develop students' ability to analyse critically the English language and its use in a variety of genres, modes, and media. Upon completion of the programme, students will have acquired the skills and attitudes essential for successful communication in linguistically and culturally diverse contexts.</p> <p>To achieve academic excellence and to promote whole person development, the major adopts a global perspective that emphasises the importance of intercultural knowledge and understanding. All students are encouraged to participate in overseas learning experiences (e.g. English summer programme, exchange) to improve their awareness of intercultural communication and enhance their English communication skills. In addition, the internship provides students with valuable experience as they acquire skills within professional, academic, and creative contexts.</p> <p>All students will choose to do either a Research Final Year Project or a Professional English Final Year Project as the capstone experience of their university education.</p>
Remarks	<p>BA English is a qualification recognised for exemption from the Language Proficiency Requirement (LPR) (English Language). For details, please visit EDB website.</p> <p>BA English (Language and Literature stream) is listed as one of the Recognised English Major Degree Programmes for the Scholarship for Prospective English Teachers run by the Education Bureau (EDB). Please refer to the EDB website for details.</p> <p><i># Indicative intake quotas for JUPAS and non-JUPAS admissions, subject to change.</i></p> <p>Useful Links:</p> <p>Useful Information for JUPAS Applicants Assessment of Applications Interview Arrangements Flexible Admission Arrangement for JUPAS Applicants Special Consideration for JUPAS Applicants CityU Scholarships for Hong Kong Talents</p>

Programme Full Name	Department of Media and Communication (options: BA Digital Television and Broadcasting, BA Media and Communication) 媒體與傳播系 [選項: 文學士(數碼電視與廣播)、文學士(媒體與傳播)]
Programme Short Name	COM
Short Description	<p>Housed in the landmark Run Run Shaw Creative Media Centre, the Department of Media and Communication offers innovative academic programmes that focus on media convergence. Unlike traditional curricula that segregate different modes of mass communication, we aim to train professional communicators capable of working in an environment of media convergence and information integration – an environment that spans journalism, broadcasting and TV, advertising, public relations and new media. To that end, we integrate new technologies, media skills, communication theories and creativity in our education.</p> <p>The Department's teaching and research activities are supported by a state-of-the-art integrated and inter-compatible digital multimedia platform. Our facilities include digital TV shooting/editing studios, 3D virtual TV/audio recording studios, advertising shooting/design studios, and new media and eye-tracking laboratories.</p> <p>During their undergraduate studies, our students have many opportunities to travel abroad on study trips, participate in student exchanges and engage in overseas internships. Our graduates are rapidly employed after graduation and enter a wide range of professions and careers, such as media industries, telecommunications, advertising/public relations, and business and education.</p> <p>The Department currently offers the following two majors:</p> <ul style="list-style-type: none">• BA Digital Television and Broadcasting• BA Media and Communication <p>Admission Arrangements</p> <p>JUPAS applicants will be considered for admission to first-year studies at the Department of Media and Communication. Students will enter a major (current major options: Digital Television and Broadcasting; Media and Communication) after one year of study. The top 40% of students[#] will have a free choice of majors offered by the Department. The other 60% of students will be allocated a major within the Department, subject to the availability of places and the selection criteria set by individual majors.</p> <p><i>[#] based on CGPA with no failed grades and completion of at least 30 credit units including College/Department required courses</i></p>

JUPAS Catalogue No.	JS1109
Programme Full Name	BA Linguistics and Language Applications 文學士(語言學及語言應用)
Programme Short Name	BALLA
Short Description	<p>This major aims to educate students so that they will become language professionals who are familiar with linguistics and language-related applications. Students will also develop an analytical, critical and creative mind and an open attitude towards people from different cultures.</p> <p>This major provides students with a solid foundation in the scientific study of human language. Students will be prepared for careers that require language expertise and language-related computing skills. In addition to opportunities in advanced studies, graduates will have employment prospects in education and research, as well as in administrative and executive positions in various public and private sectors. They will have an important role to play in language and information service sectors of Hong Kong, Greater China, and world-wide. Moreover, this major is recognized by the Education Bureau as an English language major degree for the purpose of teaching in Hong Kong.</p> <p>There are two main subject areas: Linguistics and Language Applications.</p> <ul style="list-style-type: none">● Core courses in Linguistics include: Fundamentals of Linguistics, Language in Society, Language and Mind, Phonetics, Phonology, Syntax and Semantics.● Core courses in Language Applications include: Introduction to Language Technology and Computational Linguistics.● At a more advanced level, students may choose from among courses such as Computational Lexicography, Computer-Aided Translation, Computer-Assisted Language Learning, Conversation Analysis, Corpus Linguistics, Experimental Phonetics, First/Second Language Acquisition, Psycholinguistics, Sociolinguistics, and Translation. <p>Participating in the internships and other co-curricular activities offered provides valuable job experience in fields that require knowledge of languages, linguistics and language applications.</p> <p>Exchange programmes provide students with opportunities to gain experience of studying and living abroad for a semester, by paying the local tuition fees.</p> <p>The department also offers two Joint Bachelor's Degree Programmes with National Taiwan University and Columbia University. Students can get 2 degrees by studying 2 years in LT and 2 years at a partner university. For detailed information, please visit https://lt.cityu.edu.hk/Programmes/Joint-BAs/.</p> <p>Students may also opt for double majors within CityU and major plus minor programme or Undergraduate plus Taught Postgraduate Degree (TPg) programmes (https://lt.cityu.edu.hk/Programmes/CityU-Talents-Progs/Undergrad-plus-TPg/).</p>

JUPAS Catalogue No.	JS1110
Programme Full Name	Department of Social and Behavioural Sciences (options: BSocSc Criminology and Sociology, BSocSc Psychology, BSocSc Social Work) 社會及行為科學系 [選項: 社會科學學士(犯罪學及社會學)、社會科學學士(心理學)、社會科學學士(社會工作)]
Programme Short Name	SS

Short Description

The Department of Social and Behavioural Sciences prides itself on its long track record of offering quality education delivered by a multi-disciplinary team of faculty members. “Social and Behavioural Sciences” is the term used to describe the scientific studies of the thoughts, feelings and behaviours of humans and animals and their surrounded social systems in order to understand and resolve individual, social, and community issues. It includes the study of counselling, criminology, psychology, social work and sociology.

The Department of Social and Behavioural Sciences currently offers the following majors:

- BSocSc Criminology and Sociology
- BSocSc Psychology
- BSocSc Social Work

Criminology and Sociology provides students with a broad knowledge of criminology and sociological practice, and professional competence to conduct sociological research to solve problems in organisational, community, societal, national and international contexts. This major is suitable for students with a particular interest in protecting the public and maintaining Hong Kong’s status as one of the safest cities in the world. **Psychology** is a scientific study of thoughts, feelings, and behaviors. Students are provided with comprehensive education in major fields of psychology, including biological, clinical, cognitive, developmental, educational, health, personality, and social psychology. They are also offered opportunities to design and conduct psychological research. **Social Work** is a helping profession that applies knowledge from various disciplines of the social sciences to develop theories and practices. We set out to strengthen and provide support for individuals, families, groups and the community, in problem solving as well as in achieving growth and development.

BSocSc Criminology and Sociology (Applied Sociology Stream) and BSocSc Psychology students are eligible to apply for the following joint degree programme:

- [Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University](#)

Admission Arrangements

The Department of Social and Behavioural Sciences currently offers the following JUPAS programmes:

- Department of Social and Behavioural Sciences (options: BSocSc Criminology and Sociology, BSocSc Psychology, BSocSc Social Work) (admission code: JS1110)
- BSocSc Criminology and Sociology (admission code: JS1111)
- BSocSc Psychology (admission code: JS1112)
- BSocSc Social Work (admission code: JS1113)

The first-year curriculum of JS1110, JS1111, JS1112 and JS1113 are identical.

JUPAS applicants will be considered for admission to first-year studies at the

Department of Social and Behavioural Sciences (admission code: JS1110). Students will have a free choice of majors (current major options: Criminology and Sociology; Psychology; Social Work) offered by the Department after completing the first-year curriculum.

The programmes of JS1111, JS1112 and JS1113 allow students who have a special interest in Criminology and Sociology / Psychology / Social Work to directly enter the major.

Students interested in any of the three majors can include either majors (JS1111 / JS1112 / JS1113) or Department studies (JS1110), or both, in their JUPAS programme choices.

Remarks

Indicative intake quotas for JUPAS and non-JUPAS admissions, subject to change.

Programme Full Name	Bachelor of Social Sciences in Public Policy and Bachelor of Laws 社會科學學士(公共政策)與法律學學士
Programme Short Name	BSocScPP&LLB
Short Description	Bachelor of Social Sciences in Public Policy and Bachelor of Laws will provide students with a comprehensive education in the theories, concepts, and knowledge bases of public policy, public management, and political science as well as a liberal education in the theory and practice of law at an undergraduate degree level. It enables students to specialize in public policy, public management, or political science and at the same time acquire a critical understanding of law and legal institutions of Hong Kong and beyond. The double degree will facilitate the development of intellectual skills, like analytic and creative thinking, problem solving and effective communication both orally and in writing.

Programme Full Name	Global Research Enrichment and Technopreneurship (GREAT) 環球精研與科創課程
Programme Short Name	GREAT
Short Description	This GREAT option aims to nurture students who are interested in pursuing a career in scientific research or starting business ventures that involve the use of new scientific discoveries and innovative technologies. Students will be admitted to the College of Science and study a tailored common first-year curriculum. After one year of study, students will have a free choice of GREAT streams offered by the Departments of Chemistry, Mathematics and Physics.

Admission Arrangements

JUPAS applicants will be considered for admission to first-year studies at the College of Science. Students will have a free choice of their preferred research discipline offered by our departments after one year of study. The GREAT streams are designed for students who have a good and solid foundation in Chemistry / Mathematics / Physics. The three research stream options are:

- BSc Chemistry (stream: GREAT)
- BSc Computing Mathematics (stream: GREAT)
- BSc Physics (stream: GREAT)

JUPAS Catalogue No.	JS1201
Programme Full Name	Department of Architecture and Civil Engineering (options: BEng Architectural Engineering, BEng Civil Engineering, BSc Architecture and Surveying) 建築學及土木工程學系 [選項: 工學士(建築工程)、工學士(土木工程)、理學士(建築學及測量學)]
Programme Short Name	ACE

Short Description

The Department of Architecture and Civil Engineering (ACE), one of the founding departments at City University of Hong Kong, offers professional education at both undergraduate and postgraduate degree levels. Our programmes are academically rigorous and professionally focused. Adopting an inter-disciplinary approach, our programmes are delivered by a professional team that includes civil and structural engineers, architectural / building services engineers, construction engineers, material technologists, environmental scientists, architects, urban planners, building surveyors and quantity surveyors. Our graduates are therefore uniquely placed to serve the architecture, engineering and construction (AEC) industry.

The AEC industry in Hong Kong is flourishing. Infrastructure and building developments, and the maintenance and refurbishment of existing facilities, have contributed to Hong Kong's growing economy. There are notable opportunities for innovations and career development. In addition to the Hong Kong market, the local AEC industry can expect to participate actively in the markets of the People's Republic of China. The Department has established close collaborations with universities and professional bodies both locally and internationally.

This programme aims to provide students a multi-disciplinary knowledge and skills in the area of architectural engineering, civil engineering, architecture and surveying. The programme features a flexible structure with the following majors:

- Bachelor of Engineering in Architectural Engineering
- Bachelor of Engineering in Civil Engineering¹
- Bachelor of Science in Architecture and Surveying²

Admission Arrangements

Students admitted into the programme will study a common curriculum for the first year and pursue a major (Architectural Engineering, Civil Engineering or Architecture and Surveying) in the second year. The top 40% of students[#] will have a free choice of majors while the remaining 60% will be allocated a major within the Department, subject to the availability of places and the selection criteria set by individual majors.

¹ Students whose major is Civil Engineering can opt for the Structural Engineering stream or Infrastructure and Smart City stream in the second year according to the selection criteria set by the programme team. Students whose major in Civil Engineering with stream in Structural Engineering are eligible to apply for the [Joint Bachelor's Degree Program between City University of Hong Kong and National Taiwan University](#).

² Students whose major is Architecture and Surveying can opt for the Architecture stream or Surveying stream in the second year according to the selection criteria set by the programme team.

[#] based on CGPA with no failed grades and completion of at least 30 credit units

including College/Department required courses

Remarks

Indicative intake quotas for JUPAS and non-JUPAS admissions, subject to change.

JUPAS Catalogue No.	JS1204
Programme Full Name	BSc Computer Science 理學士(電腦科學)
Programme Short Name	BScCS
Short Description	<p>The Department of Computer Science was established in 1984, and has evolved from a teaching-oriented department into one that excels in both teaching and research. The Department launched its first BSc in Computer Studies in 1987 (renamed and restructured as the BSc in Computer Science in 2000), followed by the MSc in Computer Science in 1991. The Department produced its first PhD graduate in 1994. In addition to offering traditional courses such as the foundations of computer science, computer architecture and software engineering, our curriculum exposes students to the latest advances in cloud computing, data science, machine learning and bioinformatics. Students have the opportunity to undertake a major design and development project in an area such as data science, virtual reality, multimedia, computer vision, cloud computing and information security. All teaching within the Department is subject to stringent quality assurance procedures.</p> <p>The Department maintains state-of-the-art computing facilities, including a private cloud infrastructure to support teaching activities and a high-throughput computing cluster for computationally intensive tasks involved in various research activities. The Department's research foci include bioinformatics, cloud computing, data science, evolutionary computation and metaheuristics, information security, machine learning, mobile computing, multimedia computing, software engineering, computer vision and graphics. Our staff members have contributed intellectually and professionally to the advancement of these fields.</p> <p>The Department currently offers the following major:</p> <ul style="list-style-type: none">• BSc Computer Science <p>HKDSE students will be considered for direct admission to the BSc in Computer Science programme offered by the Department of Computer Science. This is one of the leading Computer Science programmes in Hong Kong, providing students with a well-balanced curriculum and solid education in both the theoretical and practical aspects of computing. This foundation enables students to lead successful careers as professional software developers, system architects, system analysts and technology officers. Besides acquiring a broad knowledge of Computer Science, students may elect to specialise in various technology streams such as information security, multimedia, software engineering/project management and data science. In addition, our one-year Information Technology Professional Placement provides students with the opportunity to put their learning and skills into practice and to gain valuable real-world work experience, thus giving them a head start in their careers.</p> <p>BSc Computer Science students are eligible to apply for the following joint degree programme:</p> <ul style="list-style-type: none">• Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University <p>For more information, please visit the Department of Computer Science.</p>
Remarks	<p><i># Indicative intake quotas for JUPAS and non-JUPAS admissions, subject to change.</i></p>

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS	3

Notes:

- Liberal Studies would be used as the alternative of the core subject requirement of Citizenship and Social Development.
- Unspecified electives may include Category A elective subjects, Mathematics extended modules (M1/M2) (except for [JS1801](#)) and Category C other language subjects (at grade E or above) (except for [JS1200](#), [JS1201](#), [JS1217](#), [JS1801](#), [JS1805](#), [JS1806](#) and [JS1807](#)). If students take both M1 and M2, they are counted as one subject only.
- Applied Learning (ApL) subjects are not counted as elective subjects, except for [JS1041](#), [JS1042](#), [JS1043](#), [JS1044](#), [JS1805](#), [JS1806](#) and [JS1807](#).
- Please refer to the [minimum entrance requirements webpage](#) for details.
- Applicants who are marginally failed to meet the entrance requirements of the programme may still have opportunity of admission. CityU will continue the flexibility towards the minimum entrance requirements for JUPAS applicants in 2024/25 entry. The details of flexible admission arrangement will be announced in due course.

Remarks:

- For details of the alternative Chinese Language qualifications acceptable by the University for Non-Chinese Speaking (NCS) students, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

CityU accepts repeat results and will use the best results in assessing whether applicants fulfil the entrance requirements and to calculate admission scores.

JUPAS Catalogue No.	JS1205
Programme Full Name	Department of Electrical Engineering (options: BEng Computer and Data Engineering, BEng Electronic and Electrical Engineering, BEng Information Engineering, BEng Microelectronics Engineering) 電機工程學系 [選項: 工學士(電子計算機及數據工程學)、工學士(電子及電機工程學)、工學士(資訊工程學)、工學士(微電子工程學)]
Programme Short Name	EE
Short Description	<p>The world today is interconnected via a myriad of communication channels that may be either wired or wireless and with ever increasing amounts of data. Whether you are walking in the streets or travelling on the bus, nearly everyone can be seen checking emails, viewing the latest news, interconnecting socially, or playing games. Everyone expects connectivity at any place and any time, but very few recognize the technologies used or the complexity involved in both the hardware and the software.</p> <p>The Department of Electrical Engineering offers majors that allow these technologies to function seamlessly across continents whether for work or for play. We offer four majors that have sufficient depth to prepare students to succeed in their technology-driven career path and beyond, and yet are broad enough to allow them to pursue other career paths. Most of the required courses in the first and second years are common to all four majors, covering mathematics, physics, electronics devices and circuits, computer programming, and information technology. These courses set a solid foundation to prepare students for their third and final years. Strong links with industry have made our majors more applicable to Hong Kong.</p> <p>The Department offers the majors:</p> <ul style="list-style-type: none">• BEng Computer and Data Engineering• BEng Electronic and Electrical Engineering• BEng Information Engineering• BEng Microelectronics Engineering <p>Admission Arrangements</p> <p>JUPAS applicants will apply for admission to first-year studies in the Department of Electrical Engineering. Students will enter a major (major options: Computer and Data Engineering; Electronic and Electrical Engineering; Information Engineering; Microelectronics Engineering) after one year of study. The top 40% of students[#] will have a free choice of majors offered by the Department. The other 60% of students will be allocated a major within the Department, subject to the availability of places and the selection criteria set by individual majors.</p> <p><i># based on CGPA with no failed grades and completion of at least 30 credit units including College/Department required courses</i></p>
Remarks	<p><i># Indicative intake quotas for JUPAS and non-JUPAS admissions, subject to change.</i></p> <p>Useful Links:</p> <p>Useful Information for JUPAS Applicants Assessment of Applications Interview Arrangements</p>

JUPAS Catalogue No.	JS1208
Programme Full Name	BSc Physics 理學士(物理學)
Programme Short Name	BScPHY
Short Description	<p>The BSc Physics programme covers fundamental topics in physics and specialised topics such as financial engineering, biophysics, medical physics, computational physics, and optics, leading to diverse career paths in medical and healthcare, engineering, education, commercial and industrial sectors. Graduates also have the opportunity to pursue postgraduate studies. In addition, students may take part in the research attachment scheme, which provides them with early exposure to discovery and innovation.</p> <p>BSc Physics students are eligible to apply for the following degree programme options under the Talents Programme (HK TECH Tiger):</p> <ul style="list-style-type: none"> • Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University • Undergraduate plus Taught Postgraduate Degree Programme (BSc Physics + MSc Applied Physics)

JUPAS Catalogue No.	JS1217
Programme Full Name	Pathway for Research, Innovation, and Multinational Engineering (PRIME) 研究、創新和環球工程課程
Programme Short Name	PRIME
Short Description	The Pathway for Research, Innovation, and Multinational Engineering (PRIME) programme is designed to provide exceptional students with a comprehensive education in engineering and opportunities to gain valuable experience through research internships and work placements in top universities and companies worldwide. This programme is intended to equip students with the skills and knowledge needed to excel in the field of engineering and to prepare them for successful careers in the global engineering industry. The PRIME programme is open to talented and motivated students with a passion for engineering and a commitment to excellence.

Key features

Students accepted into the programme receive a range of benefits, including:

- **Free Choice of Major:** Students admitted to the PRIME programme are free to choose their majors upon accepting the offer. They will be enrolled in one of the departments before starting their first year of study. For departments offering a single major, students will be enrolled in the major in the first year. In the case of departments offering more than one major, students will be admitted to the department in their first year and enrolled in their pre-selected major in subsequent years.
- **One-on-One Mentorship:** Each student will be paired with a faculty member who will provide personalized guidance and support throughout the programme. The faculty mentor will help the student identify their academic and professional goals, develop a plan to achieve them, and provide feedback and guidance along the way.
- **Overseas Experience in Year 3 or Year 4**
 1. **One-year Research Internship:** Selected students will have the opportunity to work with leading researchers in their field at one of the top overseas universities. This will provide students with hands-on experience in cutting-edge research and will help them develop essential skills in data analysis, experimental design, and scientific communication.
 2. **Global Work Placement:** Selected students may also have the opportunity to be placed in an international company in North America (US, Canada), Europe (France, Germany, Switzerland, etc.), and other developed countries (Israel, Singapore, South Korea, Japan, etc.) to gain work experience and apply their engineering skills in a real-world setting. This will enable students to build their professional network, develop communication skills, and gain invaluable industry experience.
- **Interdisciplinary Final-year Project:** With the collaborative culture that the College fosters, the experienced faculty with expertise in a diverse range of research areas, and the state-of-the-art research facilities, students will be aided in conducting interdisciplinary research in their final-year projects. An interdisciplinary final-year project will offer an excellent opportunity for students to explore and integrate knowledge from multiple fields, which will be a valuable experience for their future careers.

Other features

With the mission to foster the career development of students and promote impactful innovations, students of the College of Engineering will also benefit from

the following optional schemes.

- **Undergraduate plus Taught Postgraduate Degree Programmes:** Students in a n “Undergraduate plus Taught Postgraduate Degree Programme” will receive a conditional offer for a Master's degree programme when they join CityU as undergraduate students. They can benefit from higher-level courses, such as those with research elements and normally taught at the postgraduate level, during their undergraduate study. On completion of their study at CityU, students will be awarded two degrees (Bachelor's degree + Master's degree).
- **Entrepreneurial Training:** The College offers a *Minor in Engineering Entrepreneurship*, which aims to provide entrepreneurial training to help students develop the skills and knowledge needed to start and operate their engineering businesses. It also helps students broaden their multi-disciplinary perspectives, integrating management, marketing, finance, and engineering.
- **Global Challenges:** *CityU X Sino Grand Challenges Scholars Program* (CityU X Sino GCSP) is a combined curricular and extracurricular element to prepare students to be the future engineers and scientists that address and solve the global challenges facing the world in this century. CityU X Sino GCSP would give students a sense of purpose and enable them to positively impact the world through their engineering work.
- **Cross-Cultural Competence:** Through student exchange programmes, study tours and the Cultural & Language Immersion Scheme (CALIS), students are provided with opportunities to develop cross-cultural competence through activities such as language training, cultural immersion experiences, or international service projects. This would help students to become global citizens and to develop the skills needed to work effectively in diverse and multicultural environments.

JUPAS Catalogue No.	JS1220
Programme Full Name	Bachelor of Laws and Bachelor of Science in Computing Mathematics 法律學學士與理學士(計算數學)
Programme Short Name	LLB&BScCM
Short Description	There is an increasing number of legal tasks in which a detailed knowledge of mathematics is a significant asset to lawyers. Bachelor of Laws and Bachelor of Science in Computing Mathematics programme therefore fills an important market need in the legal profession. The training provided by this double degree programme will bring additional mathematical knowledge to law students and equip them with critical skills in areas such as probability and statistics, quantitative analysis and formal logic that are becoming increasingly important in the legal world. The mathematical and computational skills that the graduates acquire in this double degree will give them an advantage in several legal fields.

Programme Full Name	Bachelor of Science in Computer Science and Bachelor of Science in Computational Finance and Financial Technology 理學士(電腦科學)與理學士(計算金融及金融科技)
Programme Short Name	BScCS&BScCFFT
Short Description	Bachelor of Science in Computer Science and Bachelor of Science in Computational Finance and Financial Technology aims to educate a new generation of professionals with a unique combination of expertise from the important areas of computer science, computational finance, and financial technology. Finance is one of the pillars supporting the economy of Hong Kong, and the use of computational technologies has become pervasive in different business sectors. With recent significant advances in artificial intelligence (AI) and blockchain technologies and their increasing applications in every aspect of the financial industry, the programme, which comprises a broad set of courses from the Department of Computer Science and College of Business, will train students with a distinctive and interdisciplinary blend of knowledge across the complete spectrum of computer science/computational finance/financial technology areas, from AI, big data analytics, derivatives pricing, financial econometrics, portfolio management to software engineering.

JUPAS Catalogue No.	JS1805
Programme Full Name	Department of Biomedical Sciences (options: BSc Biological Sciences, BSc Biomedical Sciences) 生物醫學系 [選項: 理學士(生物科學)、理學士(生物醫學)]
Programme Short Name	BMS
Short Description	<p>The Biological Sciences major aims to nurture students to embark on scientific research, educational, professional or technical career after graduation. We provide a rigorous, broad-spectrum curriculum combined with specialization in major fields of biology such as cancer biology, nanobiotechnology, regenerative medicine, microbiology and neurobiology. The programme presents an in-depth study of biomedical and life sciences, with courses ranging from bioinformatics to biochemistry, genetics, cellular & molecular biology and immunology. With the two tailor-made practical courses as well as opportunities in research rotations and projects, students will gain a thorough understanding of how science is done with advanced technologies including omics & genome editing and state-of-the-art equipment in our research laboratories. It also nurtures students who are interested in pursuing postgraduate research training and undertaking a broad range of science-based careers.</p> <p>The Biomedical Sciences major emphasizes the integration of basic fundamental knowledge in biomedical sciences with investigative skills and state-of-the-art technologies to enable students to understand the causes and diagnoses and treatments of human disorders and diseases. The programme is designed to prepare graduates for employment in medical & diagnostic laboratories, medical device & biotech/pharmaceutical industries and research. Our unique industry-informed curriculum provides students with extensive exposure to medical laboratory technology, modern biotechnology, and medical lab/industrial training opportunities through our strategic partnership with the healthcare and medical laboratory sectors as well as biotech & pharmaceutical industries.</p>
Remarks	<p>Admission Arrangements</p> <p>JUPAS applicants will be considered for admission to first-year studies at the Department of Biomedical Sciences. Students will enter a major (current major options: Biological Sciences; Biomedical Sciences) after one year of study. The top 40% of students[#] will have a free choice of majors offered by the Department. The other 60% of students will be allocated a major within the Department, subject to the availability of places and the selection criteria set by individual majors.</p> <p><i># based on CGPA with no failed grades and completion of at least 30 credit units including College/Department required courses</i></p> <p><i># Indicative intake quotas for JUPAS and non-JUPAS admissions, subject to change.</i></p> <p>Useful Links:</p> <p>Useful Information for JUPAS Applicants Assessment of Applications Interview Arrangements Flexible Admission Arrangement for JUPAS Applicants Special Consideration for JUPAS Applicants CityU Scholarships for Hong Kong Talents</p>

JUPAS Catalogue No.	JS1807
Programme Full Name	BSc Biomedical Sciences 理學士(生物醫學)
Programme Short Name	BScBMS
Short Description	The Biomedical Sciences major emphasizes the integration of basic fundamental knowledge in biomedical sciences with investigative skills and state-of-the-art technologies to enable students to understand the causes and diagnoses and treatments of human disorders and diseases. The programme is designed to prepare graduates for employment in medical & diagnostic laboratories, medical device & biotech/pharmaceutical industries and research. Our unique industry-informed curriculum provides students with extensive exposure to medical laboratory technology, modern biotechnology, and medical lab/industrial training opportunities through our strategic partnership with the healthcare and medical laboratory sectors as well as biotech & pharmaceutical industries.

Remarks

Indicative intake quotas for JUPAS and non-JUPAS admissions, subject to change.
