Members of the public are advised to refer to the information contained in the JUPAS and JUPAS participating-institutions' websites as the official source of Admissions Scores.

The information contained here is extracted from the websites of the respective JUPAS participating-institutions.

You are advised to consult the websites of the respective participating-institutions for further and additional information.

As not all programmes select students on the basis of HKDSE Examination levels / grades alone and the actual grades of the students admitted to each programme may vary from year to year (depending on the overall levels / grades achieved by applicants in a particular year, the number of applicants applying to the programme, changes in selection criteria, *etc.*), information in this section is for reference only, and **should not be used to predict the chance of admission** to any programme in subsequent years.

City University of Hong Kong 2013 JUPAS Admissions Scores

For applicants who have fulfilled the minimum entrance requirements, admissions scores are calculated for use in admission selection.

The information contained here is based on the admissions scores (with weighting applied where appropriate) of offered applicants in the JUPAS main round admission exercise. Sample cases of students having the same median and lower quartile scores are presented for reference. Students admitted through special admission routes (principal's nominations, sports talents and disabled applicants) are not included in the calculation of scores.

Students are reminded that because of the different weightings adopted, the admissions scores are not comparable across colleges/schools and different admission years. The sample cases are for reference only and should not be used to predict the chance of admission. The selection criteria vary each year, and many types of scores are used in the selection process. In addition to public examination results, other factors (such as band choices, interview performance, etc.) may also be considered.
