Programme Full Name Bachelor of Arts in Architectural Studies
建築學文學士

Programme Short Name BA(AS)

Short Description

The Bachelor of Arts in Architectural Studies [BA(AS)] is a four-year, full-time programme that introduces students to architecture as a cultural discipline. It is the first degree needed to qualify as an architect, and it provides an excellent general education that gives students the confidence to pursue related careers both within the design professions and further afield. The course of study is centred on research-based learning in the design studio and is structured to foster a sense of community, develop deep knowledge of the discipline, and encourage creativity. Design studios look at diverse contemporary issues relevant to Hong Kong and the world and are structured by thematic platforms that introduce students to a range of methodologies and approaches to the territorial, social, technological, urban and environmental issues that address architecture as a cultural discipline.

The BA(AS) programme offers numerous opportunities for knowledge exchange and international experience, such as semester exchanges with leading international schools of architecture, study trips to foundational sites of architecture and urbanism, and hands-on experience through summer field studies workshops. Courses in the programme are offered in the areas of Architectural Design, History and Theory of Architecture, Technology, and Visual Communication.

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT[3]	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING)[4]	3
Or	
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
MATHEMATICS EXTENDED MODULE 1 OR 2	3

Remark:

1. "Hong Kong Diploma of Secondary Education" is referred to as "HKDSE".
2. "Attained with Distinction" obtained prior to 2018, or "Attained with Distinction (I)" or "Attained with Distinction (II)" obtained in or after 2018, in

Applied Learning subjects (other than Applied Learning Chinese) will be used as additional supporting information. In the meantime, student learning experiences in Applied Learning subjects may be considered within the context of other learning experiences in their application.

3. Level 2 in Liberal Studies achieved in previous sitting will be considered in lieu of Citizenship and Social Development.
4. Other Language subjects will be used as unspecified elective subjects. Please refer to hku.hk/dse for details.
5. The result(s) of Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

In general, most of the programmes offered by HKU consider the best results achieved by candidates in different combination of sittings, except for a few programmes which only consider the latest results. Few programmes may also impose a penalty on HKDSE repeaters. Please refer to https://www.hku.hk/dse for details.

Programme Entrance Requirements

Same as General Entrance Requirements
Candidates are required to submit a Portfolio of creative work samples, formatted into a PDF of no more than five (5) A4 Size Portrait Pages. The Portfolio is an opportunity for applicants to demonstrate their potential in architectural thinking, drawing and making. Applicants are encouraged to include content that exhibits their ability to conceptualize, create and analyze, think spatially and socially. The types of content of submission may include (but not limited to) drawings, sketches, paintings, sculptures, models, graphics, artifacts, products, furniture, installations, photography, etc. The Portfolio of creative work samples could be from previous output of the student. Details and Instructions will be sent to potential candidates via e-mail and posted on the programme website.

The calculation of programme score considers category A subjects and may include Mathematics Extended Module 1 or 2 or category C subject whichever is higher. Please refer to hku.hk/dse for details.

The result(s) of Liberal Studies, Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Programme Full Name Bachelor of Science in Surveying
理學士(測量學)

Programme Short Name BSc(Surv)

Short Description

The BSc in Surveying is the first fully integrated undergraduate surveying programme worldwide and as such has led the way in surveying education.

As the world's first fully accredited programme with professional recognition in land surveying, general practice, quantity surveying, building surveying, planning and development, and property and facility management surveying, it encompasses the entire spectrum of land development cycle. This includes, for example, land administration, real estate development, construction project management, real estate finance and investment, facility management, urban planning, conservation, and urban renewal. A key distinction of this programme, compared to more conventional offerings, is its greater emphasis on the comprehensive academic underpinning and perspective required by all real estate and construction professionals.

The BSc(Surveying) programme promotes interdisciplinary learning. Our students undertake studies in the economic, law, management, technology and innovation, geospatial analytics, conservation, and research aspects of the entire land development cycle. The programme has two major components: lecture courses and surveying studios. The lecture courses define the academic core of the programme whilst the studios provide an environment within which the interdisciplinary nature of the programme can be more fully explored and boundaries tested through the extensive use of real-life case studies and student-centred project works.

The BSc(Surveying) programme allows students in their third year of study to take a credit bearing course, Professional Practice, which requires students to gain professional experience during their internship in companies within the real estate and construction sector. In addition, under normal circumstances, around 70-80% of our students would participate in a semester-long exchange programme, visiting universities all around the world and exchanging knowledge and practices. Since credits taken in the exchange programme can be transferred, students who participate in overseas exchange can graduate as scheduled. All these provide experiential learning platforms for students to enhance their personal, academic and professional development.

Programme Full Name Bachelor of Arts in Landscape Studies
園境學文學士

Programme Short Name BA(LS)

Short Description

The Bachelor of Arts in Landscape Studies [BA(LS)] is an internationally recognised undergraduate degree offered by the Division of Landscape Architecture. Our programme delivers a broadly comprehensive education in the landscape architecture discipline. We teach the knowledge, concepts and skills required to respond creatively, professionally and ethically to the urgent social and environmental challenges faced by our cities and regions today. Students graduating from our BA(LS) programme may continue their studies in the professionally-accredited Master of Landscape Architecture (MLA) programme at HKU, or apply for study in some of the world's top postgraduate programmes.

Landscape architecture is an increasingly critical discipline that binds a core capacity in design and planning with fluency in ecology, civil engineering, and geography. This interdisciplinarity extends back to landscape architecture's origins, where the profession and its antecedents engaged with the challenges of human settlement and environmental risk; planning for health, recreation, and conservation in the industrialising city; and remediating the landscapes of pollution that followed. Landscape architecture today faces challenges of rapid urbanisation, resource depletion, climate change, rising sea-levels, and declining biodiversity. Whether you end up engaging with a corporate client, informing a government body, or participating with an environmental non-profit, our degree will give you the critical, creative, and intellectual tools to advocate for just and sustainable change moving forward.

Programme Entrance Requirements

Same as General Entrance Requirements
Candidates are required to take part in a Creative Design Response, which is a short exercise designed to allow candidates to express their creativity and independent thinking. The exercise gauges candidates' capacity for critical analysis, creative problem-solving, and self-organisation. The exercise is completed at home and submitted as a digital upload through the programme website. Instructions for taking part in the Creative Design Response exercise will be sent to all potential candidates via email and posted on the programme website. Candidates may submit a separate portfolio of creative work (which may include drawing, painting, collage, sculpture, creative writing, video, or multimedia work) in soft copy.

Shortlisted candidates will be invited for an interview. Candidates are strongly encouraged to show a portfolio of creative work (which may include drawing, painting, collage, sculpture, creative writing, video, multi-media work) during the interview.

The calculation of programme score considers category A subjects and may include Mathematics Extended Module 1 or 2 or category C subject whichever is higher. Please refer to hku.hk/dse for details.

The result(s) of Liberal Studies, Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Programme Full Name	Bachelor of Arts in Urban Studies 文學士(城市研究)
Programme Short Name	BA(US)
Short Description	The Bachelor of Arts in Urban Studies [BA(US)] is an interdisciplinary, studio-based and professionally oriented programme offered by the Department of Urban Planning and Design. The BA(US) core curriculum covers the dynamics of cities and urban systems, as well as the way public policy, urban management and design interventions interact with the spontaneous social and economic processes that make up city life. It highlights research, applied statistical analysis, observation and communication, and introduce you to theories and methods, design thinking and design skills not only through regular lecture courses but also through integrated problem-based learning. The BA(US) curriculum is also aligned to prepare students to become professional surveyors in the planning and development stream of the surveying profession, and more generally, future global urban leaders. Upon graduation, students will acquire skills in spatial, socioeconomic, and environmental analysis, and expertise in land/property development, which are applicable to Hong Kong and elsewhere. Overseas student exchange and professional training through internships are also strongly encouraged during the four years of study. BA(US) graduates may go on to become professional urban planners after pursuing our Master of Science in Urban Planning, Hong Kong's only professional postgraduate degree programme in planning accredited by the Hong Kong Institute of Planners (HKIP) and the Royal Town Planning Institute (RTPI). Alternatively, they can pursue other advanced postgraduate degrees in urban analytics, urban design, housing management, transport policy and planning, landscape architecture, conservation, environment and real estate, at HKU or other local/overseas universities.

JUPAS Catalogue No.	JS6054
Programme Full Name	Bachelor of Arts 文學士
Programme Short Name	BA
Short Description	The four-year Bachelor of Arts (BA) programme offers students the opportunity to explore and deepen their knowledge and experience in the scope of arts and humanities. The first year is a “Year of Exploration”, during which students are encouraged to pursue their own interests while also exploring disciplines that are new to them. There is a wide range of course options across different subjects, and students are required to take at least 3 introductory Arts courses, typically including the pre-requisite(s) of the programme(s) in which they may plan to major or minor. At the end of Year 1, students will choose at least one of the Arts majors. The liberal and flexible curriculum enables students to develop their individual study plans within a guided and academically coherent framework during Year 2-4. They can pursue an additional Arts/ non-Arts major, or up to two minors. Throughout the entire undergraduate programme, there are ample opportunities for internships, study abroad, and field trips. **Arts Majors Available** Art History; Chinese History and Culture; Chinese Language and Literature; Comparative Literature; English Studies; Gender Studies; General Linguistics; Global and Area Studies; History; Hong Kong Studies; Japanese Studies; Korean Studies; Music; Philosophy; and Translation. **Faculty of Arts Entrance Scholarship for HKDSE Students** The Faculty of Arts offers an entrance scholarship to students with outstanding HKDSE results. The award covers up to four years of full tuition. For details, please visit our website: https://ug.arts.hku.hk/scholarships. **HKU Faculty of Arts - Faculty Global Exploration Fund** The Faculty Global Exploration Fund supports eligible students in participating in approved experiential learning activities outside Hong Kong, with a subsidy of up to HK$24,000 during their degree studies. Eligible activities include exchanges, visiting programmes, internships, field trips, and other academic or career-development programmes. **Dual Degree Programmes at HKU Faculty of Arts** The Faculty offers two four-year dual BA degree programmes in collaboration with two highly respected international universities. For the programme jointly offered with the Institut d’Etudes Politiques de Paris (Sciences Po), students will spend the first two years in France and the third and fourth years in Hong Kong. For the one jointly offered with the University of California, Berkeley, students will spend the first two years in Hong Kong and the third and fourth years in the USA. For more details, please visit this website: https://ug.arts.hku.hk/dual-degree.

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT[3]	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING)[4]	3
Or	
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
MATHEMATICS EXTENDED MODULE 1 OR 2	3

Remark:

1. "Hong Kong Diploma of Secondary Education" is referred to as "HKDSE".
2. "Attained with Distinction" obtained prior to 2018, or "Attained with Distinction (I)" or "Attained with Distinction (II)" obtained in or after 2018, in Applied Learning subjects (other than Applied Learning Chinese) will be used as additional supporting information. In the meantime, student learning experiences in Applied Learning subjects may be considered within the context of other learning experiences in their application.
3. Level 2 in Liberal Studies achieved in previous sitting will be considered in lieu of Citizenship and Social Development.
4. Other Language subjects will be used as unspecified elective subjects. Please refer to hku.hk/dse for details.
5. The result(s) of Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

In general, most of the programmes offered by HKU consider the best results achieved by candidates in different combination of sittings, except for a few programmes which only consider the latest results. Few programmes may also impose a penalty on HKDSE repeaters. Please refer to https://www.hku.hk/dse for details.

Programme Entrance Requirements

Same as General Entrance Requirements
The calculation of programme score considers category A subjects and may include Mathematics Extended Module 1 or 2 or category C subject whichever is higher. Please refer to hku.hk/dse for details.

Candidates with non-single-current sitting and candidates who have obtained level 3 in HKDSE English Language may be interviewed and will be considered on a case-by-case basis.

Programme Full Name Bachelor of Arts and Bachelor of Laws
文學士及法學士

Programme Short Name BA&LLB

Short Description This double degree programme provides students with the opportunity to pursue their studies in arts and the law, and to explore the connections between the two. On completion of the five-year programme, students will be awarded two degrees – Bachelor of Arts and Bachelor of Laws. In addition to preparing students for legal practice, the programme cultivates an appreciation of the narrative dimensions and rhetoric of law and of the overlaps between literary and legal histories. The curriculum provides a solid foundation for legal practice as well as a wide variety of careers beyond the law, including journalism, media and communications, the arts and culture, and politics.

Programme Full Name Bachelor of Education in Early Childhood Education and Special Education
教育學士(幼兒教育及特殊教育)

Programme Short Name BEd(ECE&SE)

Short Description

The BEd(ECE&SE) programme allows graduates to nurture and teach children from birth to six years in diverse early childhood settings (e.g., kindergartens, child care centres and special child care centres). It provides students with a strong foundation in the knowledge, skills and attitudes required for working with young children and their families. The programme fully integrates early childhood education with special education; hence, students will be prepared to recognise children's diverse needs and effectively support children with both typical and atypical development. The programme combines rigorous academic study with experiential learning, professional practicum, and academic research.

Following graduation, students can apply for registration as a qualified kindergarten teacher, a child care worker and child care supervisor under the Child Care Services Regulations. They will be considered as having acquired training on the One-year In-service Course in Special Child Care Work recognised by the Social Welfare Department. Graduates will also be considered to have met the academic qualifications required as a kindergarten principal.

Same as General Entrance Requirements
Candidates are strongly advised to write their personal statement in English in the "Additional Information" of their JUPAS application.

Candidates are encouraged to explain their interest in language and education providing details about their other learning experiences or extra curricular activities.

Supporting documents should be uploaded to the appropriate sections of OEA or SLP.

The calculation of programme score considers category A subjects and may include Mathematics Extended Module 1 or 2 or category C subject whichever is higher. Please refer to hku.hk/dse for details.

The result(s) of Liberal Studies, Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Programme Full Name Bachelor of Dental Surgery
牙醫學士

Programme Short Name BDS

Short Description The intent of the BDS curriculum at the Faculty of Dentistry, The University of Hong Kong, is to educate and train students to become dentists in its mission of providing oral health care for individuals and the community in the Hong Kong context. The integrated Bachelor of Dental Surgery (BDS) curriculum is outcomes- and competency-based, adopting a clinically focused approach to achieve its mission. The dental degree curriculum lasts six years.

Learning principally takes place in the Prince Philip Dental Hospital, the only dental teaching hospital in Hong Kong. There are also classes in the general medical and surgical wards of the University Departments of Medicine and Surgery, and with the ward and operating theatre of Oral and Maxillofacial Surgery in the Queen Mary Hospital. Learning also occurs at a variety of dental clinics and oral health education delivery settings throughout Hong Kong.

Programme Full Name Bachelor of Education and Bachelor of Science
教育學士及理學士

Programme Short Name BEd&BSc

Short Description The Faculty of Education in collaboration with the Faculty of Science offers an inter-disciplinary five-year honours degree focusing on the study and teaching of the science subjects in the local primary and secondary school curriculum.

The double-degree curriculum integrates academic and professional studies at-depth in science education. Students complete a Science major programme in the Faculty of Science, and Education Professional Core courses in the Faculty of Education. Professional aspects of the double degree are phased in gradually over the five years, including pedagogical, psychological, and sociological courses, and teaching practice in Hong Kong primary and secondary schools. The curriculum focuses on the teaching of the science subjects in local mainstream schools.

JUPAS Catalogue No.	JS6133
Programme Full Name	Bachelor of Arts Elite Programme 文學士精英課程
Programme Short Name	BA(Elite)
Short Description	The HKU Bachelor of Arts Elite Programme (JS6133) offers a distinctive pathway for high-achieving students seeking an integrated undergraduate and postgraduate education grounded in the humanities. Designed for a select group of outstanding students, the programme combines rigorous humanities training at Asia's leading university with opportunities for seamless progression to advanced interdisciplinary study at prestigious global institutions. Students benefit from deeper academic engagement, international exposure, and enhanced scholarly development.

Programme Highlights

Flexible, Interdisciplinary BA Foundation

Students can tailor their studies through a broad selection of arts and humanities majors and minors, including Art History, Chinese History and Culture, Chinese Language and Literature, Comparative Literature, English Studies, Gender Studies, Linguistics, Global and Area Studies, History, Hong Kong Studies, Japanese Studies, Korean Studies, Music, Philosophy, and Translation.

BA + Global MA Pathways

Eligible students may progress to a Master's degree at leading international institutions through Faculty partnerships, including:

1. **Geneva Graduate Institute** offers programmes in Anthropology and Sociology; International and Development Studies; International Economics; International History and Politics; International Law; and International Relations/Political Science. (https://www.graduateinstitute.ch)
2. **Yenching Academy of Peking University** offers a Master's Programme in China Studies across six research areas, including Economics & Management; History & Archaeology; Law & Society; Literature and Culture; Philosophy & Religion; Politics & International Relations. (https://yenchingacademy.pku.edu.cn)

Priority enrollment in the Arts Industries Major

The Arts Industries programme offers a future-ready, interdisciplinary education that connects arts with business, culture, and technology, equipping students with industry insights for emerging creative careers.

Priority Access to Arts Industry Bridge Events

Arts Industry Bridge connects students with opportunities in Film Production, Performance, Music, Video Game Design, Arts and Museums. Through strong industry partnerships, it provides internships, entrepreneurship funding and expert-led training to help students turn their creative passions into careers.

Tailormade Academic Mentorship and Professional Guidance

Students benefit from specialised advising, personalised mentorship, alumni networking, and internship opportunities that support academic planning, overseas experiences, and career development.

Entrance Scholarship and Global Experience Support

Outstanding HKDSE students may receive entrance scholarships covering up to

four years of tuition. The Faculty Global Exploration Fund also provides eligible students with subsidies of up to HK$36,000 for approved overseas exchanges, internships, field trips, and other experiential learning activities.

Career Opportunities

Graduates are well prepared for careers in academia, arts and cultural management, creative industries, heritage conservation, international organisations, NGOs, corporate communications, language education, professional writing, and further postgraduate study. The programme's interdisciplinary curriculum and global outlook equip students for leadership roles across public.

Remarks

This programme is subject to the University's approval.

JUPAS Catalogue No.	JS6157
Programme Full Name	Bachelor of Science in Speech-Language Pathology 理學士(言語及語言病理學)
Programme Short Name	BSc(SLP)
Short Description	The Faculty of Education offers a five-year full-time Bachelor of Science in Speech-Language Pathology* (Honours) programme that prepares students to become professionally competent speech-language pathologists. This intensive programme provides students with the knowledge, skills and practical experience necessary to become a scientific, effective and adaptive speech-language pathologist. Courses cover subject knowledge in acquisition, development and disorders in human communication, speech and language, and swallowing, as well as knowledge in other related disciplines, such as medical science, psychology, English and Cantonese linguistics and hearing sciences. The curriculum employs a student-centred translational learning approach. Students will be engaged in lectures, self-directed learning, case-based learning, small group learning, and clinical practice. Students will complete a final-year research project in the fifth year. The programme emphasises integration and application of knowledge and scientific evidence in clinical practice. Clinical teaching is provided by both University staff and practicing clinicians from the community. Students receive over 300 hours of supervised clinical practicum, conducted predominately in Cantonese. Students may have opportunities to receive interdisciplinary and international service training. Note: Students must be able to communicate fluently in Cantonese. *Formerly known as Bachelor of Science in Speech and Hearing Sciences.

Programme Full Name Computing and Data Science (Delta+)
計算與數據科學(港滬科技菁英)

Programme Short Name CDS(Delta+)

Short Description

The Bachelor of Engineering in Computer Science and Bachelor of Engineering in Artificial Intelligence and Data Science programmes share the same programme code. All students will all be supported by a Delta^{+} Fellowship to pursue the final 1.5 years of their studies at the HKU-CDS Teaching and Research Site in Shanghai. This includes a six-month Co-operative placement designed to immerse them in Shanghai's dynamic AI ecosystem.

The two professional degree programmes designed to equip students with the necessary skills and knowledge to excel in the rapidly evolving field of computing, AI, data science, and other transformative technologies.

The Bachelor of Engineering in Computer Science provides students with a strong foundation in computer science and its applications. The programme covers a wide range of topics, including programming, algorithms, data structures, software engineering, computing infrastructures, and artificial intelligence technologies.

The Bachelor of Engineering in Artificial Intelligence and Data Science, on the other hand, focuses on training students for careers in AI and data science. The programme provides students with solid training in artificial intelligence and data-driven computing technologies. It covers topics such as programming, data modeling, big data systems, AI & data ethics, AI technologies, and applications.

These programmes provide a comprehensive education that prepares students to be leaders in their field, driving innovation and shaping the future of technology-driven decision-making. Graduates of either programme will be at the forefront of technology innovations, making significant contributions to the development of cutting-edge solutions that leverage computing, AI, and data science technologies. They will be well-positioned to take up key roles such as machine learning engineers, software developers, data analysts/engineers, AI consultants, cybersecurity specialists, and more, in a wide range of industries.

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT[3]	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING)[4]	3
Or	
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
MATHEMATICS EXTENDED MODULE 1 OR 2	3

Remark:

1. "Hong Kong Diploma of Secondary Education" is referred to as "HKDSE".
2. "Attained with Distinction" obtained prior to 2018, or "Attained with Distinction (I)" or "Attained with Distinction (II)" obtained in or after 2018, in Applied Learning subjects (other than Applied Learning Chinese) will be used as additional supporting information. In the meantime, student learning experiences in Applied Learning subjects may be considered within the context of other learning experiences in their application.
3. Level 2 in Liberal Studies achieved in previous sitting will be considered in lieu of Citizenship and Social Development.
4. Other Language subjects will be used as unspecified elective subjects. Please refer to hku.hk/dse for details.
5. The result(s) of Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

In general, most of the programmes offered by HKU consider the best results achieved by candidates in different combination of sittings, except for a few programmes which only consider the latest results. Few programmes may also impose a penalty on HKDSE repeaters. Please refer to https://www.hku.hk/dse for details.

Programme Entrance Requirements

Programme Full Name Bachelor of Arts and Sciences in Applied Artificial Intelligence
文理學士(應用人工智能)

Programme Short Name BASc(AppliedAI)

Short Description

The BASc(AppliedAI) programme emphasises the intellectual underpinning of AI applications in diverse areas, with a philosophical and ethical dimension. It aims to give students both fundamental and practical knowledge in the design and construction of intelligent systems so that they can apply their skills in a variety of career settings.

Supported by a wide range of courses in computer science, geography, mathematics, psychology, statistics, and urban studies, which emphasise problem-based learning, the programme features five concentrations: AI technology, AI in business and finance, AI in medicine, AI in smart city, or AI in neurocognitive science.

Students will learn to transfer interdisciplinary scientific knowledge into a wide range of integrated applications and technological innovations, so as to develop the intellectual capacity essential to meeting new challenges and resolve new problems in the future. Upon graduation, students will be exceptionally well-equipped to create artificial intelligence products with transformational impacts in different industries.

Programme Full Name Bachelor of Arts and Sciences in Design+
文理學士(設計 +)

Programme Short Name BASc(Design+)

Short Description

Design+ is designed to produce highly effective, adaptive, and creative graduates who can lead across multiple disciplinary subjects, and will become known globally for their distinctive qualities of creativity, analytical ability, critical thinking, and innovative problem-solving.

Cutting across traditional disciplinary boundaries, the programme is structured around design thinking as a distinct foundational approach to interdisciplinary studies, innovation, and enterprise. The degree prepares students to be innovators and creative leaders, entraining students who want to capitalise on both entrepreneurial and creative abilities. Combining insights, theory, research, methods and practices that embrace design thinking, functional design and process design, the academic focus provides students with a blend of thinking tools that will equip them for the challenges facing all sectors of society. A central pedagogical feature of the degree programme, and a central graduate quality, is the ability to balance analytical forward-thinking approaches to problem solving with solution-first imagination-based problem solving.

Programme Full Name Bachelor of Arts and Sciences in Financial Technology
文理學士(金融科技)

Programme Short Name BASc(FinTech)

Short Description

Financial Technology (FinTech) refers to the application of Information and Communication Technology (ICT) in the field of financial services. It is a rapidly emerging inter-disciplinary area with very high impact on the economy of every society.

The BASc(FinTech) degree is jointly offered by the School of Computing & Data Science and the HKU Business School. The objective of the programme is to nurture financial technologists and entrepreneurs with essential knowledge in both finance and technology for taking up a leading role in innovation and applications of Financial Technology. Being an inter-disciplinary effort, the programme combines subjects on computing, finance, and policies and regulations to give students a thorough grounding in the FinTech discipline.

The programme consists of foundation courses in mathematics, statistics, finance, computing, and law, as well as hard topics in FinTech and soft topics in Arts and Social Sciences. Hard topics in FinTech include courses in distributed ledger and blockchain technology, big data and data mining, computational finance and algorithmic trading, e-payment and crypto-currency, financial programming and databases, and mathematical finance etc. Soft topics are courses from Arts and Social Sciences, which serve for training students to have a broader mindset and allow them to apply their knowledge and skills adaptively and creatively in this fast-growing discipline.

The programme prepares graduates with knowledge in both finance and technology, allowing them to have a broad career pathway as they could take up positions in FinTech industry, finance industry, as well as IT industry. Graduates can also continue their studies by pursuing a master or doctoral degree in Hong Kong or overseas. Professionally, it is expected that graduates of the programme will become FinTech professionals, leaders in the FinTech industry, and researchers in the FinTech discipline.

Programme Full Name Bachelor of Arts and Sciences in Global Health and Development
文理學士(環球衞生及發展)

Programme Short Name BASc(GHD)

Short Description

The BASc(GHD) programme helps students develop the foundational multidisciplinary and international perspectives, the core blocks of knowledge and the people and systems oriented competencies needed to succeed in modern health and development related fields.

The curriculum combines:

- Basic to intermediate level courses across multiple Faculties (Architecture, Business and Economics, Law, Medicine, Science, Social Sciences)
- Advanced seminars and case studies
- Placements in local/overseas health and development organisations
- Mentoring on career choices and leadership
- BASc courses on leadership and big data analytics

A distinctive feature of the programme is a compulsory capstone, during which students will be placed in leading health and development organisations such as UN agencies, Non-governmental Organisations (NGOs), contract research organization (CRO), philanthropic foundations, etc., for a 6-month experience facilitated by HKU.

Programme Full Name Bachelor of Arts in Global Creative Industries
文學士(全球創意產業)

Programme Short Name BA(GCIN)

Short Description

The Bachelor of Arts in Global Creative Industries programme provides an interdisciplinary approach to understanding the intricate relationship between commerce and culture. Through theoretical instruction and experiential learning, it explores the fusion of cultural, economic, social, and political forces that drive the convergence of creativity and commerce on an industry-wide scale. With a global perspective, the programme inspires students to critically analyse the evolving roles of culture in today's society, where commerce and culture are increasingly intersected. This approach provides a platform to explore the interconnected nature of contemporary global creative sectors, transcending traditional boundaries and offering a holistic view of creative industry emergence, development, and future prospects on a global, regional, national, and local scale.

The programme presents four concentrations: (1) Film, XR and Interactive Media, (2) Games, Play and Digital Cultures, (3) Heritage, Memory and Cultural Industries, and (4) Performance and Live Arts. Each student selects a concentration among the above list, fostering expertise in their chosen field while comprehending the interconnected nature of the creative industries. Through supervised internships, industry experiences, field trips, and capstone projects, the curriculum integrates theoretical knowledge with practical applications. The programme aims to cultivate profound understanding and practical skills, empowering students for success across various fields and preparing them to navigate the dynamic landscape of the creative industries and beyond.

The programme prepares students for diverse roles across industries, encompassing marketing, advertising, social media management, curation, customer relations, etc., in cultural sectors such as film, design, fashion, tourism, and heritage.

JUPAS Catalogue No.	JS6286
Programme Full Name	Bachelor of Arts in Humanities and Digital Technologies 文學士(人文及數碼科技)
Programme Short Name	BA(HDT)
Short Description	The BA(HDT) programme aims to recruit intellectually ambitious and talented students and equip them with training in humanities and digital technologies in order to tackle the world's multi-faceted cultural and social problems, and to train future leaders by endowing them with innovative thinking, problem-solving skills and an interdisciplinary mindset. The programme's interdisciplinary structure combines humanities focus (undertaken within a single Arts discipline) with a focus in interdisciplinary digital technologies. Through internship, experiential learning and project-based training, the programme brings students' digital technology skills with their chosen humanities discipline together to create an individually tailored learning experience. In summary, the BA(HDT) offers both practical and theoretical training, providing students with unique skill sets in humanities and digital technologies. Students will be equipped with the skills to drive pioneering work in their humanities areas of specialisation, with the capacity to think in new ways about technological innovation, and with the ability to build a career in a wide array of fields. **HKU Faculty of Arts Entrance Scholarship for HKDSE Students** The Faculty of Arts offers an entrance scholarship to students with outstanding HKDSE results. The award covers up to four years of full tuition. For details, please visit our website: https://ug.arts.hku.hk/scholarships. **HKU Faculty of Arts - Faculty Global Exploration Fund** The Faculty Global Exploration Fund supports eligible students in participating in approved experiential learning activities outside Hong Kong, with a subsidy of up to HK$24,000 during their degree studies. Eligible activities include exchanges, visiting programmes, internships, field trips, and other academic or career-development programmes. **Dual Degree Programmes at HKU Faculty of Arts** The Faculty offers two four-year dual BA(HDT) degree programmes in collaboration with two highly respected international universities. For the programme jointly offered with the Institut d'Etudes Politiques de Paris (Sciences Po), students will spend the first two years in France and the third and fourth years in Hong Kong. For the one jointly offered with the University of California, Berkeley, students will spend the first two years in Hong Kong and the third and fourth years in the USA. For more details, please visit this website: https://admissions.hku.hk/programmes/university-collaborative-programmes.

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT[3]	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING)[4]	3
Or	
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
MATHEMATICS EXTENDED MODULE 1 OR 2	3

Remark:

1. "Hong Kong Diploma of Secondary Education" is referred to as "HKDSE".
2. "Attained with Distinction" obtained prior to 2018, or "Attained with Distinction (I)" or "Attained with Distinction (II)" obtained in or after 2018, in Applied Learning subjects (other than Applied Learning Chinese) will be used as additional supporting information. In the meantime, student learning experiences in Applied Learning subjects may be considered within the context of other learning experiences in their application.
3. Level 2 in Liberal Studies achieved in previous sitting will be considered in lieu of Citizenship and Social Development.
4. Other Language subjects will be used as unspecified elective subjects. Please refer to hku.hk/dse for details.
5. The result(s) of Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

In general, most of the programmes offered by HKU consider the best results achieved by candidates in different combination of sittings, except for a few programmes which only consider the latest results. Few programmes may also impose a penalty on HKDSE repeaters. Please refer to https://www.hku.hk/dse for details.

Programme Entrance Requirements

Same as General Entrance Requirements
The calculation of programme score considers category A subjects and may include Mathematics Extended Module 1 or 2 or category C subject whichever is higher. Please refer to hku.hk/dse for details.

JUPAS Catalogue No. JS6298

Programme Full Name Bachelor of Arts and Bachelor of Engineering in Artificial Intelligence and Data Science
文學士及工學學士(人工智能及數據科學)

Programme Short Name BA&BEng(AI&DataSc)

Short Description

The five-year BA & BEng in AI and Data Science double degree programme offers a unique opportunity to combine advanced technical training in AI and data science with critical insights from the humanities. From the first year, students are encouraged to explore both fields, pursuing their own interests while being introduced to core disciplines in AI, data science, and the humanities.

By the end of Year 1, students will have a solid foundation in AI and data science, the humanities, and their intersection. The interdisciplinary and flexible curriculum from Year 2 onward allows students to develop their individual study plan within a structured yet adaptable framework. Alongside the primary programme of study, students may also pursue additional minors or electives to broaden their academic experience.

Throughout the programme, students will have opportunities to engage in internships, research projects, and international exchanges, enhancing their understanding of how AI and emerging technologies intersect with human culture, ethics, and society.

Faculty of Arts Entrance Scholarship for HKDSE Students

The Faculty of Arts offers an entrance scholarship to students with outstanding HKDSE results. The award covers up to five years of full tuition. For details, please visit our website: https://ug.arts.hku.hk/scholarships.

HKU Faculty of Arts - Faculty Global Exploration Fund

The Faculty Global Exploration Fund supports eligible students in participating in approved experiential learning activities outside Hong Kong, with a subsidy of up to HK$24,000 during their degree studies. Eligible activities include exchanges, visiting programmes, internships, field trips, and other academic or career-development programmes.

JUPAS Catalogue No. JS6303

Programme Full Name Bachelor of Engineering Elite Programme
工學學士精英課程

Programme Short Name BEng(Elite)

Short Description

The Faculty of Engineering aims to nurture highly talented and top-performing engineering students to be future leaders in frontier technology developments and rapidly advancing industries. The training flexibility and curriculum elements for these students are beyond the traditional engineering education requirements to prepare them to take up new challenges in various highly competitive engineering fields, such as, but not limited to, robotics, artificial intelligence, material technology, nanofabrication, semiconductor, construction automation, and sustainable development. Through freely choosing an engineering major, receiving academic/industrial mentorship, and participating in overseas exchanges, students can aim to pursue the most competitive career paths in either academic or industrial direction. Applicants can use one single code, 6303, to apply for the Bachelor of Engineering Elite Programme.

Elite students* will enjoy a series of privileges that enrich their studies at HKU Engineering:

- **High Flexibility in Programme Major Selection** *(Subject to academic performance and availability.)*
  - In the end of Year 1, Elite students are eligible to freely select their preferred BEng programme majors from:
    - Civil Engineering, Computer Engineering, Electrical Engineering, Electronic Engineering, Data and System Engineering, Mechanical Engineering; or
    - Faculty-based signature initiatives:
      1. Bachelor of Engineering and Master of Science in Engineering in Artificial Intelligence in Engineering (X+AI) programme
      2. Bachelor of Engineering in Robotics Engineering (BEng(Robo))^
    - Computer Science, Artificial Intelligence and Data Science from the School of Computer and Data Science (SCDS) - a minimum cumulative GPA 3.3 would be required. *Students enrol in SCDS majors (Computer Science or Artificial Intelligence and Data Science) will NOT be able to enrol in the X+AI programme.

^This programme is subject to the University's approval.

- **Dual Mentorship**
  - Academic advisor
    - To guide elite students through their curriculum design and overseas exchange choices
  - Industrial mentor
    - To assist elite students in learning from state-of-the-art practices in the corresponding industry

- **HKD $150,000 Scholarships**
  - Entrance scholarship of HKD $100,000 will be disbursed in four instalments
  - Exchange scholarship of HKD $50,000 for each student

- **Eligible for the CSHK HKU Engineering Flagship Programme Scholarship and Placement**

- During their studies at HKU Engineering, Elite students will be eligible to apply and may be selected for a one-off HKD $40,000 scholarship sponsored by the China State Construction Engineering (Hong Kong) Limited (CSHK).
- In addition, they may be selected for an exclusive paid internship opportunity.

***Elite Status Requirement**

Students must maintain “Elite” status with a minimum cumulative GPA (CGPA) of 3.0 at the end of each academic year in order to continue enjoying the exclusive access and scholarships mentioned above. Students who fail to meet the required CGPA will continue their studies at HKU Engineering but without these privileges.

Programme Full Name Bachelor of Engineering in Data and Systems Engineering
工學學士(數據與系統工程)

Programme Short Name BEng(DASE)

Short Description

The programme is designed to fuse foundational knowledge and cutting-edge technologies for optimising real-world systems. Our curriculum encompasses a diverse range of fundamental system analytics and computing disciplines, including data-driven optimization and system simulation and modelling. Additionally, students are exposed to innovative artificial intelligence and intelligent systems technologies. Through rigorous coursework and hands-on experiences that seamlessly blend theoretical concepts with advanced technologies, the programme offers students rich opportunities to engage in real-world projects and research that push the boundaries of technology.

Equipped with in-depth skills in data analytics, decision-making, robotics and automation, and human-machine interfaces, our students are empowered to pursue advanced studies and explore diverse career paths across a wide range of industries, including construction, logistics and transportation, robotics, healthcare engineering, manufacturing, and more.

The main areas of expertise developed in this curriculum are as follows:

- Data Analytics and Computing – Big data analytics, data-driven optimisation, operations research, statistics analysis, system modelling and simulation, quality control and process optimisation, blockchain, and project management.
- Robotics and Intelligent Systems – Artificial intelligence, machine learning, computer vision, robotics, virtual reality, human-machine interface, internet of things, and manufacturing.

Entry Scholarship

In recognition of outstanding academic achievements by HKDSE students, the department will grant an entry scholarship to eligible students who are admitted to the programme via JUPAS. The scholarship award criteria are shown at https://www.dase.hku.hk/.

Programme Full Name Bachelor of Engineering in Mechanical Engineering
工學學士(機械工程)

Programme Short Name BEng(ME)

Short Description

Mechanical Engineering is one of the most versatile and impactful engineering disciplines, shaping the systems, technologies, and innovations that drive modern society. From robots, aircrafts, vehicles, and advanced manufacturing systems to sustainable energy technologies, medical devices, and intelligent machines, mechanical engineers play a central role in solving real-world challenges and creating the technologies of the future.

The BEng degree in Mechanical Engineering provides students with a strong foundation in core engineering sciences, including thermodynamics, fluid mechanics, solid mechanics, materials, dynamics, control, design, and manufacturing. Through a combination of theory, hands-on projects, laboratory work, and design-based learning, students develop the technical knowledge, practical skills, and creative mindset needed to engineer effective and sustainable solutions.

The programme also offers opportunities for students to explore specialized and emerging areas such as robotics and automation, aerospace engineering, biomedical engineering, energy and environmental systems, advanced materials, nanotechnology, product design, and smart manufacturing. This broad and flexible training enables students to connect traditional mechanical engineering principles with cutting-edge technologies that are transforming industries worldwide.

Graduates of the programme are well prepared for careers in sectors such as aerospace, automotive, energy, manufacturing, healthcare technology, robotics, consulting, and research and development. They may also pursue postgraduate studies to deepen their expertise in specialized fields. With global demand for engineers who can address challenges in sustainability, automation, mobility, and advanced technology, mechanical engineering graduates are positioned to make meaningful contributions to industry and society.

By emphasizing problem-solving, innovation, teamwork, and practical engineering experience, the BEng in Mechanical Engineering equips students not only to enter the profession, but also to lead future technological innovation.

Programme Full Name Bachelor of Engineering in Civil Engineering
工學學士(土木工程)

Programme Short Name BEng(CivE)

Short Description

Civil Engineering is both a science and an art that involves the utilization of natural resources and power for the benefit of humankind. Civil Engineers are responsible for the design, construction, and management of our infrastructure and built environment, ensuring that our buildings, roads, railways, bridges, slopes, dams, and tunnels, are safe and sustainable. They also oversee stormwater drainage systems to prevent flooding, collect and properly treat wastewater to protect the environment, and ensure that all infrastructure components function in a safe, effective, and sustainable manner.

Our programme aims to equip students with a solid foundation in the modern civil engineering profession through five core areas: Structural Engineering, Geotechnical Engineering, Environmental Engineering, Transportation Engineering, and Infrastructure Construction Management. Contemporary technologies such as building information modeling, modular integrated construction, advanced building materials, and artificial intelligence are incorporated into the curriculum, enabling graduates to offer innovative solutions to practical problems through planning, design, construction, management, and control.

Our programme emphasizes active learning, capstone experiences, hands-on activities, internships, exchange and research-based studies. These opportunities allow students to develop lifelong learning skills that will help them excel in their careers as competent Civil Engineers.

JUPAS Catalogue No.	JS6365
Programme Full Name	Bachelor of Engineering in Robotics Engineering 工學學士(機器人工程學)
Programme Short Name	BEng(Robo)
Short Description	Robotics has evolved into a distinct engineering discipline, moving beyond fragmented efforts across separate fields to require highly integrated expertise for developing intelligent systems that can meet future challenges. The Bachelor of Engineering in Robotics Engineering (BEng(Robo)) is a four-year full-time interdisciplinary programme jointly offered by the Departments of Mechanical Engineering, Electrical and Computer Engineering, Data and Systems Engineering, and Civil Engineering, designed to nurture robotics engineers with holistic, systems-level thinking and strong cross-disciplinary capability. It brings together the strengths of four departments and is underpinned by a distinctive Hong Kong–Shanghai two-city study roadmap with a dedicated HKD 50,000 studentship for Shanghai study, an experiential learning pedagogy, and tailored dual postgraduate support for academically outstanding students, including a research matching scheme and a HKD 100,000 entrance scholarship for taught postgraduate studies, thereby creating a comprehensive and forward-looking education model that nurtures a new generation of innovative robotics engineers. Graduates will be well prepared to pursue careers and drive technological innovation across a wide spectrum of sectors, including robotics, intelligent manufacturing, healthcare, logistics, autonomous vehicles, drones, and other emerging technology fields. They will also be well positioned for further postgraduate studies in robotics, artificial intelligence, and related disciplines. This programme is subject to the University's approval. **Why This Programme:** 1. **Interdisciplinary Robotics Training** ○ This interdisciplinary programme consolidates the expertise and learning resources of four departments into a coherent curriculum. The curriculum delivers systematic training that integrates robotic mechanism design, sensing and perception, motion control, embedded systems, and artificial intelligence, equipping students with solid engineering foundations and cross-disciplinary technical competencies to develop intelligent autonomous systems. 2. **Project-Based, Experiential Learning Pedagogy** ○ The programme adopts a project-based and experiential learning pedagogy, reinforcing theoretical knowledge through hands-on laboratories, multidisciplinary design projects, engineering training, and industrial practice. 3. **Hong Kong–Shanghai Two-City Study Model** ○ A studentship of HKD 50,000, covering round-trip airfare, nearby accommodation and a living allowance, supports students' Year 3 study in Shanghai, integrating world-class academic teaching with first-hand industrial exposure to the innovation ecosystem of the Greater Bay Area and the advanced manufacturing hub of the Yangtze River Delta. 4. **Dual Postgraduate Support** ○ **ROBO Undergraduate Research Matching Scheme** ■ The scheme provides early, matched research opportunities with professors in relevant robotics engineering areas for academically strong and passionate students in Year 2 or

above.
- Seats are limited and will be subject to further screening and assessment.

- **HKD 100,000 Robotics Master Degree Programme Entrance Scholarship**
  - Eligibility: Students with a cumulative GPA (CGPA) of 3.0 or higher in their undergraduate studies are eligible to apply for the scholarship, subject to admission to either the Master of Science in Engineering in Robotics and Intelligent Systems or the Master of Science in Engineering in Low Altitude Technology at HKU Engineering.

Remarks

This programme is subject to the University's approval.

JUPAS Catalogue No.	JS6377
Programme Full Name	Bachelor of Engineering and Master of Science in Engineering in Artificial Intelligence in Engineering 工學學士與人工智能理學碩士聯合課程
Programme Short Name	BEng X + MScEng AIE
Short Description	Artificial intelligence (AI) has become a significant force worldwide, sparking transformation and revolutionary developments across many engineering industries. Combining various machine learning and automation methodologies in AI, engineers can substantially enhance safety, reliability, and productivity for their existing industries. Consequently, the Faculty of Engineering aims to combine the solid and existing Bachelor of Engineering (BEng) programmes to nurture highly interdisciplinary engineers equipped with modern AI Master-degree skills to overcome various future engineering challenges. Applicants can use one single code, 6377, to apply for the Bachelor of Engineering and Master of Science in Engineering in Artificial Intelligence in Engineering (BEng X + MScEng AIE) programme. **Why This Programme:** 1. **Flexibility in Major Selection** *(Subject to academic performance and availability.)* ○ Students can choose Civil Engineering, Computer Engineering, Electrical Engineering, Electronic Engineering, Data and System Engineering, Mechanical Engineering or another faculty-based programme, Robotics Engineering^ as their BEng degree. ^This programme is subject to the University's approval. 2. **AI-Focused Curriculum Design** ○ A well-rounded AI curriculum providing comprehensive training in engineering applications, starting with Artificial Intelligence Literacy courses, followed by introductory AI courses, discipline-specific AI electives, and an AI-related capstone project at the undergraduate level, with continuity into postgraduate study. 3. **BEng (X) and MSc(Eng) in AI Dual Degree in 4+1 Years** ○ Students can freely opt out of this BEng X + MScEng AIE scheme with no penalties, i.e. they can successfully earn their bachelor degree after completing the necessary requirements in their chosen major. 4. **HKD 120,000 Master's Degree Programme Entrance Scholarship** ○ Eligibility: Students with a cumulative GPA (CGPA) of 2.7 or higher in the undergraduate study who are admitted to the MSc(Eng) in Artificial Intelligence in Engineering are eligible for the scholarship. 5. **Eligible for the CSHK HKU Engineering Flagship Programme Scholarship and Placement** ○ During their studies at HKU Engineering, Elite students will be eligible to apply and may be selected for a one-off HKD $40,000 scholarship sponsored by the China State Construction Engineering (Hong Kong) Limited (CSHK). ○ In addition, they may be selected for an exclusive paid internship opportunity.

Programme Full Name Bachelor of Laws
法學士

Programme Short Name LLB

Short Description

The four-year Bachelor of Laws (LLB) programme is the first local university qualification to be recognised for admission to legal practice in Hong Kong. It offers a range of distinctive features designed to ensure the competitiveness of our graduates, including:

- A solid foundation in legal knowledge, transferable critical and analytical skills, and broadening of intellectual horizons;
- Systematic honing of professional skills such as critical thinking, analytical and problem-solving skills, research and writing skills, and bilingual language proficiency; and
- Integrated experiential learning and capstone experience through an integrated sequence of legal research and writing, mooting, internship and clinical legal education.

The LLB programme includes a professional core that equips students with a solid foundation in legal knowledge. It also offers the possibility of specialising in a particular area of law such as commercial law, Chinese law, or international trade and economic law. Students have the option to pursue a minor in a non-law discipline offered by the University.

In addition to the 4-year LLB programme, students may consider other enriching programmes:

- Integrated Double Degree Programmes offered in partnership with the Faculty of Arts, the HKU Business School, the Faculty of Social Sciences and the Faculty of Science; or
- Dual Degree Programmes offered with the University College London (UCL) in the UK or Peking University (PKU) in Mainland China, which enable graduates to obtain two LLB degrees from two top-ranking law schools and earn legal qualifications in both jurisdictions.

JUPAS Catalogue No. JS6418

Programme Full Name Bachelor of Nursing Advanced Leadership Track
護理學學士菁英領袖培育專修組別

Programme Short Name BNurs-ALT

Short Description

The Advanced Leadership Track offered under the existing Bachelor of Nursing programme (BNurs-ALT) is designed for high achievers, who aspire to pursue an advanced and specialised nurse practice or a nurse-physician career in the healthcare sector across the local and global spectrums, to accomplish the professional curricula at an accelerated pace.

In addition to the 5-year BNurs curriculum, students will have the opportunity to articulate to either HKU Master of Nursing (MNurs) or HKU Bachelor of Medicine and Bachelor of Surgery (MBBS).

Articulation to Master of Nursing (MNurs)

Students may be considered for admission to the 1-year part-time MNurs study, upon successful completion of the 5-year BNurs programme, and shall be able to complete one Bachelor's Degree and one Master's Degree in Nursing in 6 years upon satisfactory completion of curricula concerned.

Articulation to Bachelor of Medicine and Bachelor of Surgery (MBBS)

Students who pass the designated articulation course and complete the BNurs-ALT programme with First Class Honours may be considered for admission to the 4-year MBBS (Graduate Entry Track) programme, subject to the MBBS admissions interview and holistic review.

Leadership Development Programme

A Leadership Development Programme, which is specifically designed for BNurs-ALT students, offers opportunities for them to acquire professional development skills for advanced performance and to cultivate leadership skill sets via experiential learning experience. Students will be mentored individually by a designated instructor from professoriate staff and an experienced nurse leader, who provide advice and guidance throughout the BNurs-ALT study. Under the mentorship of great minds, students can broaden their horizons and expand their personal networks.

JUPAS Catalogue No. JS6456

Programme Full Name Bachelor of Medicine and Bachelor of Surgery
內外全科醫學士

Programme Short Name MBBS

Short Description

The **MBBS curriculum** is designed to train not only future doctors, but also compassionate, well-rounded individuals. In addition to hospital-based training, students gain valuable first-hand experience in a wide range of community settings, including family medicine clinics, maternal and child health services, hospices, and patient support groups. These experiences provide a deeper understanding of the diverse healthcare needs of patients and communities.

Problem-based, small-group tutorials place students at the centre of the learning process. Through active discussion and collaborative problem-solving, students develop critical thinking skills, take ownership of their learning, and learn to evaluate knowledge from different perspectives. The interactive format also strengthens communication, teamwork, and leadership abilities that are essential in medical practice.

A strong emphasis is placed on **ethical principles and humanitarian values** , which form the foundation of quality healthcare. Through programmes and learning activities in medical ethics, law, and the medical humanities, students gain an understanding of the professional, legal, and ethical responsibilities of doctors while cultivating compassion, integrity, and respect for patients.

Early clinical exposure enables students to apply classroom learning in real-world settings from the outset of their studies. Through hands-on experience and guided reflection, students build confidence and professional competence. The Assistant Internship further enhances their readiness for clinical practice.

The curriculum also embraces **inter-professional education**, reflecting the collaborative nature of modern healthcare. Students have opportunities to learn and work alongside peers from medicine, Chinese medicine, nursing, and pharmacy, preparing them to thrive in multidisciplinary healthcare teams and deliver patient-centred care.

Remark:

1. "Hong Kong Diploma of Secondary Education" is referred to as "HKDSE".
2. "Attained with Distinction" obtained prior to 2018, or "Attained with Distinction (I)" or "Attained with Distinction (II)" obtained in or after 2018, in Applied Learning subjects (other than Applied Learning Chinese) will be used as additional supporting information. In the meantime, student learning experiences in Applied Learning subjects may be considered within the context of other learning experiences in their application.
3. Level 2 in Liberal Studies achieved in previous sitting will be considered in lieu of Citizenship and Social Development.
4. Other Language subjects will be used as unspecified elective subjects. Please refer to hku.hk/dse for details.
5. The result(s) of Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

In general, most of the programmes offered by HKU consider the best results achieved by candidates in different combination of sittings, except for a few programmes which only consider the latest results. Few programmes may also impose a penalty on HKDSE repeaters. Please refer to https://www.hku.hk/dse for details.

Programme Full Name Bachelor of Nursing
護理學學士

Programme Short Name BNurs

Short Description

The Bachelor of Nursing (BNurs) is a five-year full-time programme leading to an honours degree. The objective of the BNurs programme is to provide comprehensive and holistic nursing education and nurture generic nurses who will be able to work as competent practitioners in various health care settings.

Well-scoped with multidisciplinarity, our credit-based curriculum is designed to introduce the bio-psychosocial aspects of health and nursing care. It strikes a good balance between the broad areas of nursing, biological, behavioural and social sciences, enabling students to obtain knowledge through the study of different disciplines. The desired learning outcomes would be the production of nursing professionals with inquisitive mindsets, strong interpersonal skills, and high awareness of the socio-cultural context in Hong Kong where nursing is practised.

Our BNurs programme emphasises the integration of theory and practice. Students are exposed to a variety of clinical environments throughout the study, while comprehensive learning of clinical skills is delivered under the supervision of experienced teaching staff. The process of teaching and learning is directed by nursing academics from a wide range of expertise, with the support of excellent facilities in various departments of the Medical Faculty and clinical settings.

Programme Full Name Bachelor of Chinese Medicine
中醫全科學士

Programme Short Name BChinMed

Short Description

Classical Chinese Medicine Supplemented with Biomedical Sciences

The programme covers comprehensive Chinese Medicine and biomedical sciences courses in a systematic manner, delivered by teachers from the School of Chinese Medicine and clinical departments under the Medical Faculty respectively.

Early and Comprehensive Clinical Training

Early clinical training is provided through clinical attachment (under teachers' supervision) at the designated local Chinese Medicine Clinical Centres for Teaching and Research. In Year 4, students undergo a junior clerkship at the Hong Kong University - Shenzhen Hospital, where they can integrate what they have learnt with the actual practice under hospital settings. In Year 6, students are required to undertake the clinical clerkship in the teaching hospitals affiliated to outstanding traditional Chinese medicine universities in Mainland China as arranged by the School.

Learning Experience Beyond Professional Core

Students are required to take Common Core Courses to attain broader perspective and develop critical thinking skills.

Cultivation of Interest in Scientific Research

Students are given the opportunity to undertake laboratory experiments in several Chinese Medicine and Biomedical Sciences courses. The School has also set up different research interest groups for students to participate during their studies.

Bi-literacy and Tri-lingualism

English is the medium of instruction for most of the Common Core Courses and all biomedical sciences courses. Both Putonghua and Cantonese are used in other core courses, dispensary practicum, clinical attachment, junior clerkship and clinical clerkship, etc.

Mode of Learning

An outcome-based approach to students' learning and multi-disciplinary teaching approaches, such as problem-based learning (PBL) and clinical case discussion, are adopted.

JUPAS Catalogue No.	JS6494
Programme Full Name	Bachelor of Pharmacy 藥劑學學士
Programme Short Name	BPharm
Short Description	The Bachelor of Pharmacy (BPharm) programme aims to nurture competent graduates with a solid knowledge of pharmacy alongside their abilities to apply the core knowledge and skills effectively, humanely and ethically when it comes to the delivery of pharmaceutical care. By adopting the highest standard of professional practice, our graduates will contribute tremendously to the pharmacy sector and its professionalism as well as the general health and well-being of the patient community. **Clinical Pharmacy** With the support of Queen Mary Hospital, not only do HKU undergraduates enjoy early clinical exposure but also benefit from the inter-professional collaboration of pharmacists and clinicians through on-site education in wards and outpatient clinics. Furthermore, Gleneagles Hong Kong Hospital also provides an additional training site exclusive to our HKU students. **New Learning Approaches** Diversified “fit-for-purpose” teaching pedagogies have been adopted to manifest the specific features of the curriculum, enhanced by the introduction of The Pharmacy Experiential Education Programme (PEEP) and the Enrichment Modules. Besides, as an area of strength in the Medical Faculty, the problem-based learning (PBL) approach in teaching is applied to encourage critical thinking and self-directed learning skills, encouraging interdisciplinary inquiry from students and fostering their lifelong learning skills. **Training in Industrial Pharmacy** Through gaining hands-on experience in this subspecialty, students have the opportunity to witness and spot the increasing demand of the local industry for professional pharmacy services. A wide spectrum of topics related to the practicality of industrial pharmacy is taught by the industry’s experts with extensive work experience. **Patient Counselling and Communication Skills** A key characteristic of the programme is to enhance students’ proficiency in providing primary healthcare services, particularly patient education. Students have various opportunities to acquire patient counselling and communication skills step-by-step while the level of mastery will gradually increase with the magnitude of complexity in a range of situations. **Exposure to Chinese Medicine plus Complementary and Alternative Medicine** The programme equips future pharmacists in Hong Kong with the knowledge of Chinese Medicine as well as Complementary and Alternative Medicines (CAM), including herbal medicines, nutraceuticals, healthcare products and cosmetics commonly used by local patients in conjunction with Western medicines. **Opportunity for Interprofessional Learning** The programme offers students invaluable opportunities for interprofessional learning, including a patient care project (PCP) and interprofessional education and a collaborative practice (IPECP) with students from the Medicine, Nursing and

Chinese Medicine programmes. These interprofessional learning activities will utilise the expertise of students from diverse backgrounds and foster teamwork, cooperation, and communication between different healthcare professionals in the future.

Programme Full Name Bachelor of Science in Innovation and Technology
理學士(創新與科技)

Programme Short Name BSc(I&T)

Short Description

The Bachelor of Science in Innovation and Technology [BSc(I&T)] is an interdisciplinary four-year programme that prepares students to tackle real-world challenges through technological innovations. This programme focuses on cultivating a new generation of socially-conscious innovators who are fluent in science, engineering, and design, and are able to apply these knowledge to create human-centred innovations that drive positive changes to the rapidly evolving world.

Through a project-led and problem-based curriculum, students engage in open-ended projects spanning a wide range of domains where they collaborate with partners ranging from non-profits to high-tech companies. From day one, students immerse themselves in hands-on projects, honing their problem-solving skills and gaining practical experience in the innovation process. The emphasis on interdisciplinary collaboration empowers students to work across academic fields, fostering their confidence and adaptability for their future. Furthermore, the programme offers flexibility for students to explore their interests and develop their own depth of study in a technology discipline.

During their co-op experience, students apply their problem-solving skills by working full-time at a startup company or leading a project solutions in a technology company or research lab. This opportunity allows students to incubate their ideas, potentially leading to the creation of their own ventures. In their final year, students culminate their comprehensive capstone experience by proposing their own venture, forming their own team, and pitching their ideas.

"Attained with Distinction" obtained prior to 2018, or "Attained with Distinction (I)" or "Attained with Distinction (II)" obtained in or after 2018, in Applied Learning subjects (other than Applied Learning Chinese) will be used as additional supporting information. In the meantime, student learning experiences in Applied Learning subjects may be considered within the context of other learning experiences in their application.
3. Level 2 in Liberal Studies achieved in previous sitting will be considered in lieu of Citizenship and Social Development.
4. Other Language subjects will be used as unspecified elective subjects. Please refer to hku.hk/dse for details.
5. The result(s) of Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

In general, most of the programmes offered by HKU consider the best results achieved by candidates in different combination of sittings, except for a few programmes which only consider the latest results. Few programmes may also impose a penalty on HKDSE repeaters. Please refer to https://www.hku.hk/dse for details.

Programme Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT[1]	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	4

Elective Subject(s)	Minimum Level
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING)[2]	3
One of the following elective subjects:	
TECHNOLOGY AND LIVING (FOOD SCIENCE AND TECHNOLOGY)	4
DESIGN AND APPLIED TECHNOLOGY	4
TECHNOLOGY AND LIVING (FASHION, CLOTHING AND TEXTILES)	4
BIOLOGY or CHEMISTRY or PHYSICS or INFORMATION AND COMMUNICATION TECHNOLOGY	4
Or	
MATHEMATICS EXTENDED MODULE 1 OR 2	3
One of the following elective subjects:	
TECHNOLOGY AND LIVING (FASHION, CLOTHING AND TEXTILES)	4
DESIGN AND APPLIED TECHNOLOGY	4
TECHNOLOGY AND LIVING (FOOD SCIENCE AND TECHNOLOGY)	4
BIOLOGY or CHEMISTRY or PHYSICS or INFORMATION AND COMMUNICATION TECHNOLOGY	4

Remark:

1. Level 2 in Liberal Studies achieved in previous sitting(s) will be considered in lieu of Citizenship and Social Development.
2. Other Language subjects will be used as unspecified elective subjects. Please refer to hku.hk/dse for the minimum requirement.

Candidates applying for admission to the BSc(I&T) programme are required to attend an individual interview in order to evaluate their suitability for the programme. The individual interview will focus on evaluating the candidate's aptitude for working on innovation projects, including their creativity, analytical ability, initiation, and sociability. Candidates are encouraged to prepare a short presentation of projects that they have taken part in the past for the interview. Details about the application interview will be posted on the programme website.

Level 3 or above in Mathematics (Extended Module 1 or Module 2) is preferred (but not required).

The calculation of programme score considers category A subjects and M1/M2 only. Please refer to hku.hk/dse for details.

The result(s) of Liberal Studies, Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

JUPAS Catalogue No.	JS6626
Programme Full Name	Bachelor of Medicine and Bachelor of Surgery (Distinguished MedScholar) 內外全科醫學士 - 傑出醫科學人
Programme Short Name	MBBS(DMS)
Short Description	Beyond the comprehensive MBBS curriculum, the **MBBS Distinguished MedScholar (DMS)** study track is designed for students with exceptional academic potential and a passion for leadership, research, and service. Through a range of exclusive opportunities, including academic workshops, research projects, community engagement initiatives, and an elite mentorship programme, students are nurtured to become future leaders in medicine, medical research, and healthcare innovation. Students admitted to **MBBS (DMS)** benefit from a range of distinctive opportunities, including: • A guaranteed pathway to pursue an additional university degree alongside the MBBS programme while completing their studies within the standard six-year timeframe. • Access to an elite mentorship programme, with the opportunity to be guided by a mentor of their own choice from the Faculty or University, as well as distinguished healthcare leaders, policymakers, and senior government officials. • Participation in exclusive DMS projects that foster community engagement, leadership development, and a commitment to social impact. A highlight of MBBS (DMS) is the opportunity to pursue a **Master of Research in Medicine (MRes[Med])** during the Enrichment Year in Year 3 and graduate with both the MBBS and MRes(Med) qualifications. Students who complete the MBBS, MRes(Med), and internship may be eligible for Faculty support to pursue a PhD at a leading international university, with the potential to embark on a career as a clinical academic. Students may also choose from a range of alternative Bachelor's or Master's degree options during the Enrichment Year, allowing them to graduate with an additional qualification that complements their interests and career aspirations.

Programme Full Name Science Master Class
科研專才啟導課程

Programme Short Name SMC

Short Description The double degree elite programme

- caters specifically to the needs of science-inclined students and incubates the next generation of scientists
- allows students to learn from and be inspired by internationally renowned scientists through exclusive classes, mentorship, and research immersion, accelerating their scholarly growth in science
- equips students to translate scientific knowledge into practical applications with far- and wide-reaching impacts

Features

- Fast-track for completing 2 degrees at an accelerated pace
  - a BSc plus a MRes
- Learning from Science Masters– Grand Masters through special tutorials and Masters as academic advisers
- Catering the needs of elite students
  - disciplinary-based intensive study for research-aspired students
  - ample opportunities available in our flagship Young Scientist Scheme (YSS), including Summer Research Fellowship, Overseas Research Fellowship, and Exchange Study
- Research-oriented
  - Research postgraduate courses and research projects to enhance the students' frontier scientific knowledge and research skills

Programme Full Name Bachelor of Psychology
心理學學士

Programme Short Name BPsych

Short Description

The BPsych programme puts great emphasis on enhancing students' understanding of psychological phenomenon and principles through first-hand practical experience, applying knowledge and skills to real-life situations, and research-intensive learning.

Students will be equipped with basic skills across all areas of Psychology, including the biological and cognitive bases of behaviour, developmental changes, social influence, and contemporary issues. They will also be provided with opportunities for tackling novel problems as well as experience of addressing issues that are ill-defined. Through the comprehensive training in the Programme, students' skills in critical analysis, reasoning and self-reflection can be developed.

The Programme provides an internationally recognised qualification in fundamental aspects of Psychology that allows students to pursue both professional training in applied aspects of Psychology (e.g. Educational or Clinical Psychology), and advanced research training in all related research areas of Psychology, including Cognitive Science and Neuroscience.

Apart from the Psychology major, students are given flexibility to explore their academic interests in a wide variety of disciplines across all faculties in the University. For example, students may opt to declare a second major in Social Sciences disciplines, such as Cognitive Science, Counselling, Criminology, Neuroscience, etc., if they are considering further study or work in the professions related to psychology and mental health.

JUPAS Catalogue No.	JS6717
Programme Full Name	Bachelor of Social Sciences 社會科學學士
Programme Short Name	BSocSc

Short Description	If students are interested in studying human behaviour and society or wish to become a future leader in public service, education, industry and commerce, the Bachelor of Social Sciences should be the choice. The flexible programme structure provides students with freedom to decide which discipline they wish to major in after the first year of study, without any quota constraint or selection.
	
	Study Path
	
	• Year 1: Exploration through Introductory Courses
	• Year 2: Major Declaration, and kickstarting Internship* arranged by the Faculty and Exchange Journeys
	  ○ First Majors
	  ■ Computational Social Science
	  ■ Geography
	  ■ Politics and Public Administration (Such as International Relations)
	  ■ Social Policy and Social Development
	  ■ Social Enterprise, Social Work
	  ■ Sociology
	  ○ Second Majors and Minors
	  ■ All Majors Listed Above
	  ■ Cognitive Science
	  ■ Counselling
	  ■ Criminology
	  ■ Geospatial Data Science
	  ■ Human Resource Management
	  ■ Media & Cultural Studies
	  ■ Neuroscience
	  ■ Psychology
	  ■ Urban Governance
	  ■ Students may also opt for major/minor offered by other faculties: Architecture, Engineering, Arts, Medicine, Business, Science, Education
	• Year 3: Completing the Internship* and Exchange Graduation Requirements
	• Year 4: Ready for Career or Further Studies
	
	Internship Programme
	
	The Social Innovation and Global Citizenship (SIGC) internship programme offers students hands-on experience with Community Partners, fostering practical skills and awareness of social issues.
	
	Pre-Internship: Training session to equip students with essential skills and knowledge
	
	During Internship: Support is provided by both workplace supervisors and Academic Tutors, guiding students as they navigate their roles.
	
	After Internship: With post-internship debriefing sessions, interns are encouraged to update their resumes, and set new career goals.
	
	Overseas Exchange Opportunities

Global Citizenship (GC) graduation requirements encourage students to take part in outgoing exchange programmes to broaden their exposure and enrich their overseas learning experience. Each year, more than 250 Social Sciences students benefit from the exchange programmes.

Career Prospects

Graduates have pursued careers in government, politics, public corporations, community organisations, the media, and the private sector. Alternatively, you may consider pursuing postgraduate studies at renowned universities locally and worldwide.

Programme Full Name Bachelor of Science in Actuarial Science
理學士(精算學)

Programme Short Name BSc(ActuarSc)

Short Description

The HKU BSc(ActuarSc) programme is the only actuarial science programme in Hong Kong accredited by the UK's Institute and Faculty of Actuaries. HKU is also a Center of Actuarial Excellence designated by the Society of Actuaries of the US. The programme provides formal academic training to students who wish to join the actuarial profession. It is specifically designed to prepare students to sit the early actuarial examinations of the professional bodies for actuaries, thus allowing them to readily join the actuarial profession with internationally-recognised qualifications upon graduation.

Although actuarial science is a separate discipline with its own area of knowledge, modern actuarial training requires multidisciplinary knowledge in probability, statistics, big data analytics, economics, investment, finance, law, taxation and accounting. The HKU Actuarial Science curriculum reflects this requirement by incorporating various interdisciplinary courses into the basic yet comprehensive actuarial training.

The HKU BSc(ActuarSc) programme aims to equip students with a solid background in actuarial science, and enable them to develop the confidence and analytical skills needed to define and tackle problems in actuarial science and related fields. Students should also be able to evaluate and measure various kinds of risk using effective quantitative methods, and become proficient in formulating and communicating practicable business strategies with professionalism as well as accuracy.

Remarks

Under the current agreements with the Institute and Faculty of Actuaries of the UK and the Society of Actuaries of the US, students with a course or examination mark above a certain threshold in courses offered by the BSc(ActuarSc) programme may be exempted from taking specified professional actuarial examinations.

Programme Full Name Bachelor of Social Work
社會工作學學士

Programme Short Name BSW

Short Description This programme provides training that leads to a professionally recognised qualification in social work practice. The curriculum covers areas including social welfare and social policy, specialised social work theory and practice, human behaviour and the social environment, research, law, sociology and psychology. Students are required to complete social work practice laboratory courses, advanced courses using problem-based learning, and two fieldwork placements in local or overseas agencies under professional supervision.

JUPAS Catalogue No.	JS6743
Programme Full Name	Bachelor of Social Sciences Elite Programme 社會科學學士精英課程
Programme Short Name	BSocSc(Elite)
Short Description	**Specialised Concentrations (Declared at the End of Year 2)** Research Track: Academic Inquiry and Research Excellence Students in the Research Track are encouraged to develop their own research interests and scholarly aspirations. Where appropriate, they may be paired with a Full Professor for academic mentorship and potential research collaboration, providing valuable exposure to advanced scholarly inquiry and research practice. Impact Track: Social Innovation, Public Leadership and Enterprise Students in the Impact Track will also engage with senior practitioners and recognised leaders from business, government, and civil society. These interactions provide opportunities to gain practical insights into leadership, public engagement, social innovation, organisational change, and cross-sector collaboration. **Faculty Mentorship, Whole-Person Development and Student-Centred Coaching** Reflecting the Faculty's commitment to whole-person development, each student is paired upon admission with a member of the Faculty's Deanery leadership team, who provides mentorship and guidance throughout the undergraduate journey. Through a combination of academic advising, developmental coaching, and reflective learning, students are supported in their intellectual growth, leadership development, personal wellbeing, and future planning. **Student-Initiated Learning Journey and Dedicated Study Grant** Consistent with the programme's belief in student-directed learning, students are encouraged to shape aspects of their own educational experience through individually designed learning opportunities. To support these pursuits, students may benefit from admission scholarships and a dedicated study grant of up to HKD 100,000, which can be used for approved activities such as overseas study, student-led research, social innovation initiatives, entrepreneurial ventures, and professional development opportunities. **Accelerated 4+1 Articulation Pathway** A structured pathway enables students to progress seamlessly from undergraduate study to the Faculty's master's-level programmes. The Faculty currently offers more than 30 taught postgraduate programmes, subject to the relevant admission requirements. **Global Horizons and International Enrichment** BSocSc(Elite) students will have access to dedicated international enrichment opportunities designed to broaden global perspectives, deepen cross-cultural understanding, and enhance their capacity to engage critically with complex societal issues in Hong Kong, the region, and the wider world.
Remarks	This programme is subject to the University's approval.

Programme Full Name Bachelor of Business Administration
工商管理學學士

Programme Short Name BBA

Short Description

The BBA programme combines strong functional training with intensive training in communication skills, computer applications and other social science and/or science subjects. Students can choose to major in one of the following five majors:

i. Entrepreneurship, design and innovation,
ii. Finance,
iii. Human resource management,
iv. Information systems and analytics, or
v. Marketing.

(*Note: Candidates must undergo a selection process arranged by the Programme Coordinator for declaring the EDI major.)

Students can also declare a second major or minor(s) if they are able to meet the programme requirements.

Dual Degree Programmes

Students may choose to pursue one of the following two 4-year BBA dual degree programmes offered by HKU Business School in collaboration with leading international universities:

- Jointly offered with the Institut d'Etudes Politiques de Paris (Sciences Po). Students will spend the first two years at Sciences Po and the third and fourth years at HKU. Upon successful completion of the programme, students will be awarded a BBA degree from HKU, and a Bachelor of Arts (BA) from Sciences Po.
- Jointly offered with the University of British Columbia (UBC). Students will spend the first and final years at HKU and the second and third years at UBC. Upon successful completion of the programme, students will be awarded a BBA degree from HKU, and a Bachelor of Commerce (BCom) from UBC.

Separate application is required for applying to the dual degree programmes, please visit https://admissions.hku.hk/programmes/university-collaborative-programmes for more details.

JUPAS Catalogue No.	JS6767
Programme Full Name	Bachelor of Economics / Bachelor of Economics and Finance 經濟學學士 / 經濟金融學學士
Programme Short Name	BEcon/BEcon&Fin
Short Description	The BEcon and BEcon&Fin programmes share the same programme code. Students are required to enrol in either one of the programmes on admission. The BEcon programme trains students in economic theories, statistical tools, the application of theories to solve practical economic problems in trade, banking, the labour market and evaluation of the regional economic performances of China, Hong Kong and other economies. Students will be furnished with solid theoretical and empirical economic knowledge to analyse and understand human behaviour and social interactions. The programme allows students a high degree of flexibility in planning their future career specialisation. Students can also declare a second major or minor(s) if they are able to meet the programme requirements. The BEcon&Fin programme is designed to meet the interests of students who are seeking a balanced study of both economics and finance. The programme recognises the significance of economics both in its own right and as a foundation for the study of finance, and the significance of finance as a career path for students in Hong Kong. Students will receive solid training in economic and financial theories and applications. They will be equipped with the skills to analyse human behaviour and social interaction, as well as to solve problems in financial institutions. The single-major curriculum structure enables students the flexibility to pursue a second major or minor(s). **Dual Degree Programmes** **HKU-PKU "Future Leaders" Dual Bachelor's Degree in Economics, Finance and Management** Jointly offered with Peking University (PKU), the HKU-PKU "Future Leaders" Dual Bachelor's Degree in Economics, Finance and Management integrates the strengths of two leading business schools in Hong Kong and Mainland China. Students will be awarded a Bachelor of Economics and Finance (BEcon&Fin) from HKU, and a Bachelor of Management (BMgmt) from PKU upon successful completion of the 4-year programme. The economic development in Hong Kong and Mainland China is highly intertwined, yet the business environment in the two places is utterly disparate. This programme aims to instil students with a robust understanding of the business models in the two markets, and to help them familiarize with the different operation and management styles. There are ample opportunities for students to participate in summer exchange programmes at world-class universities, and to gain internship experience from Hong Kong or Mainland China companies. With solid knowledge of economics, finance and management and interpersonal skills gained in multi-cultural and social contexts, graduates are expected to become competitive and capable business leaders with a global perspective. **Dual Bachelor's Degree Programme with University of California, Berkeley** Jointly offered with University of California, Berkeley (UCB), the Dual Bachelor's Degree Programme combines the strengths of two leading universities in Asia and North America. Students will be awarded a Bachelor of Economics (BEcon) from HKU, and a Bachelor of Arts (BA) from UCB upon successful completion of the 4-

year programme.

Students will learn economic theories and their application to solve practical economic problems during the first two years at HKU. In the third and fourth years, UCB offers students a vibrant, broad-based liberal arts education, enabling participation in projects at the forefront of science, addressing pressing social issues, creating art, exploring diverse cultures, and seeking answers to significant questions.

Separate application is required for applying to the dual degree programmes, please visit https://admissions.hku.hk/programmes/university-collaborative-programmes for more details.

Programme Full Name Statistical Decision Sciences
統計決策科學

Programme Short Name SDS

Short Description

Statistical Decision Sciences offers comprehensive training in quantitative analysis and statistical modeling to students, emphasizing both theory and practice. Upon admission, students can select one of the three specialized Professional Cores in Decision Analytics, Risk Management, and Statistics within the Bachelor of Statistics (BStat) degree for more in-depth education. They initially choose a Professional Core as an indication of their preferences upon entrance, with the flexibility to switch between cores based on their interests during their studies.

The Professional Core in Decision Analytics focuses on leveraging and managing big data in real time, emphasizing statistically guided AI techniques for strategic decision-making and resource allocation. It aims to blend data science and statistical reasoning to enhance artificial intelligence with human intelligence.

The Professional Core in Risk Management provides expertise in the theory and methodology of risk management, including quantitative modeling, financial risk analysis, and statistical methods, while promoting good risk management practices.

The Professional Core in Statistics emphasizes the study of statistics as a scientific discipline involving analytical and quantitative tools for logical thinking, problem-solving, probability reasoning, and data analysis to support decision-making.

Graduates from the Statistical Decision Sciences programme are eligible to become a Graduate Statistician (GradStat) designated by the Royal Statistical Society (RSS), UK, with accreditation ensuring high-quality teaching, learning, and assessment. Additionally, passing specific courses may qualify graduates for the RSS Data Analyst award.

In the meantime, student learning experiences in Applied Learning subjects may be considered within the context of other learning experiences in their application.
3. Level 2 in Liberal Studies achieved in previous sitting will be considered in lieu of Citizenship and Social Development.
4. Other Language subjects will be used as unspecified elective subjects. Please refer to hku.hk/dse for details.
5. The result(s) of Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

In general, most of the programmes offered by HKU consider the best results achieved by candidates in different combination of sittings, except for a few programmes which only consider the latest results. Few programmes may also impose a penalty on HKDSE repeaters. Please refer to https://www.hku.hk/dse for details.

Programme Full Name Bachelor of Business Administration in Accounting and Finance / Bachelor of Business Administration in Accounting Data Analytics
工商管理學學士(會計及財務) / 工商管理學學士(會計數據分析)

Programme Short Name BBA(Acc&Fin)/BBA(ADA)

Short Description

The BBA(Acc&Fin) and BBA(ADA) programmes share the same programme code. Students are required to enrol in either one of these programmes before the commencement of their studies.

Both BBA(Acc&Fin) and BBA(ADA) programmes prepare students for a professional qualification in accounting. The BBA(Acc&Fin) programme provides the broad-based education in both accounting and finance which is necessary to progress towards a leadership role in the financial sector. Students are required to take professional core in accounting and a minor in finance, with an option to second major in finance. Tailor-made professional preparation programmes and internship opportunities with renowned accounting firms and financial institutions are available for talented students.

Launched in 2023-2024, the BBA(ADA) programme provides students with an option to focus on data analytics aspect in accounting instead of having a minor in finance. It is an excellent choice for students who are interested in STEM with accounting and business applications and wish to pursue their career in the related fields. The intensive accounting training enables BBA(ADA) students to distinguish themselves from students of other data analytics/STEM programmes. Students will be equipped with comprehensive accounting and business knowledge that prepares them to obtain professional qualifications in accounting. They will also acquire computer programming and data analytics skills to meet the needs of the accounting and business professions in today's digital transformation economy.

Both BBA(Acc&Fin) and BBA(ADA) programmes are accredited by the Hong Kong Institute of Certified Public Accountants (HKICPA), the Association of Chartered Certified Accountants (ACCA), and the CPA Australia. These accreditations enable our graduates to obtain exemptions from certain papers of the professional qualification examinations conducted by the respective professional accounting accreditation bodies.

Programme Full Name Bachelor of Business Administration (Business Analytics)
工商管理學學士(商業分析)

Programme Short Name BBA(BA)

Short Description

The BBA(BA) programme is crafted to meet the growing industry demand for talents in the business analytics field. Its curriculum offers students a comprehensive coverage of both technical and managerial skill sets. Students will learn a wide spectrum of knowledge from the disciplines of information technology, data science, business statistics and management. Core courses include programming language, database management, introduction to business analytics, management information systems, decision and risk analysis, etc. They help students build the foundations for advanced topics in senior years. Students also have the option to choose from analytics technique courses and business application courses. The aim is to provide students with state-of-the-art experiences in artificial intelligence, big data, social media, and other latest development. Such design helps train well-rounded students who will be more adaptable in their career development.

Graduates of the BBA(BA) programme are expected to land on data and analytics related jobs in a wide variety of sectors such as IT, finance, supply chain, marketing, consulting, manufacturing, and so forth. They will also be competitive in pursuing postgraduate degrees in fields such as data science, information management, decision science, big data, etc.

Students from all backgrounds who have a passion for problem-solving through analytics, and who aim to develop their career path in analytics are welcome to apply for the BBA(BA) programme.

Programme Full Name Bachelor of Business Administration (Law) and Bachelor of Laws
工商管理學學士(法學)及法學士

Programme Short Name BBA(Law)&LLB

Short Description

The BBA(Law)&LLB programme is designed to provide students with professional knowledge and intensive training in the fields of both business and law. Jointly offered by HKU Business School and the Faculty of Law, the programme integrates business and law courses.

The BBA(Law)&LLB double-degree programme blends two strategic disciplines into a single course for highly motivated students. It is designed for students seeking a broad education and flexibility in their career choices. Graduates of the programme will be awarded two degrees: a BBA(Law) by HKU Business School and an LLB by the Faculty of Law. The LLB degree is the basic requirement for pursuing a legal career. After obtaining the LLB, students who meet the relevant admission requirements can apply for the Postgraduate Certificate in Laws (PCLL) programme.

Programme Full Name Bachelor of Social Sciences (Government and Laws) and Bachelor of Laws
社會科學學士(政治學與法學)及法學士

Programme Short Name BSocSc(Govt&Laws)&LLB

Short Description

This integrated programme, jointly offered by the Department of Politics and Public Administration and the Faculty of Law, is designed to provide students with a multi-disciplinary education in law and public affairs. Students will be able to study professional law subjects as well as social sciences courses in areas like comparative politics, political philosophy and ethics, international relations, and public administration.

This programme is considerably flexible. At the end of the second semester of the second year, students will be able to decide whether to finish a Bachelor of Social Sciences (Government and Laws) with double majors in politics and legal studies after completing the fourth year of study, or to complete the five-year double degree programme which leads to the award of a Bachelor of Laws (LLB) degree in addition to the Bachelor of Social Sciences (Government and Laws) degree. The LLB, in particular, enables students intending to pursue a legal career to apply for the Postgraduate Certificate in Laws (PCLL) programme.

Alumni pursue careers not only in law and public service but also business, banking, education, journalism, tertiary education and research, the non-profit sector, and so on.

Programme Full Name Bachelor of Journalism, Media and Artificial Intelligence
新聞媒體及人工智能學士

Programme Short Name BJMAI

Short Description

The Bachelor of Journalism, Media and Artificial Intelligence programme is a technology-driven and communication-focused double-major curriculum for the digital age. The innovative programme integrates core journalistic training with cutting-edge technologies, equipping students to lead, adapt, create media across a wide range of industries.

Students use the journalism, media and AI components to build critical thinking, communication skills, and digital technology expertise. By the end of the four-year programme, they will be able to produce professional quality and deeply researched written work on a variety of subjects, and shoot and story-tell compelling video. Graduates are highly valued by employers in fields like public relations, business, education, government, and of course media.

In their second year, each student will choose another academic major to combine with the journalism, media and AI components, thus creating a bespoke degree that will enable the full exploration of their unique intellectual interests, whether in marketing, economics, finance, counselling, criminology, music, or English studies – to mention just a few of the choices recent graduates have made.

Throughout the programme, the emphasis is on experiential real-world learning. All students will complete at least one summer internship at a media outlet or communication organization. Students also can spend a semester abroad at one of our premiere overseas journalism and media partners, or select from HKU's extensive global network.

A diverse faculty and student body ensures a lively learning environment that feeds students' curiosity about the world. Current faculty members of HKU's School of Future Media (SFM) hail from North America, Europe, and Asia, while more than two dozen nationalities are represented among current students and recent graduates. Class size is kept small, to foster classroom discussion as well as the family feeling that makes the SFM a very special place at HKU.

Remarks Besides HKDSE result, reports of school principals, records of extra-curricular activities and campus journalism experience may be considered.

Programme Full Name Bachelor of Science in Marketing Analytics and Technology
理學士(營銷分析及科技)

Programme Short Name BSc(MAT)

Short Description

Digitization and data are fundamentally changing all businesses and industries. The BSc(MAT) equips students with quantitative skills, technology, and business marketing know-how to pursue a career in the digital economy and modern businesses. The programme targets both STEM students with an interest in business as well as business students interested in the technology space.

Students will gain a solid foundation in cutting-edge technical areas including computer programming, data science, digital platforms and marketing technology as well as business marketing know-how such as the design and launch of new technology products, targeting consumers, digital marketing, forecast and predicting markets, and building a technology-focused strategy.

BSc(MAT) graduates will be well-prepared to join the workforce in digital marketing, entrepreneurship & start-ups, gaming, digital platforms, e-commerce, IT, consulting, finance, and other industries with a focus on analytics, data, and technology.

Programme Full Name Bachelor of Finance in Asset Management and Private Banking
金融學學士(資產管理及私人銀行)

Programme Short Name BFin(AMPB)

Short Description

The Bachelor of Finance in Asset Management and Private Banking (BFin(AMPB)) programme is the first undergraduate programme of its kind in Hong Kong and Asia. The Programme aims to prepare students to enter the rapidly growing fields of asset management and private wealth management in Hong Kong and Asia Pacific, or in banking and finance generally.

During the first two years, students complete introductory courses in accounting, economics, mathematics, statistics, corporate finance, and investments and portfolio analysis. In subsequent years, students take more specified and industry related courses including equity valuation and investment in specific asset classes e.g. private equity / private credit, venture capital, hedge funds and digital assets, understanding of financial statements and doing financial analysis, lending and credit in private wealth and corporate bank, financial regulations and compliance, sustainability in investment and banking, institutional consulting, family office and family succession.

The practical and career-oriented curriculum of the BFin(AMPB) programme provides our students with the necessary knowledge and skills for careers in asset management, private wealth management and banking & finance. Practical-oriented courses are taught by teachers with solid experience in the finance industry., including a final-year capstone course requiring students to apply their knowledge to real world situations by conducting analysis and managing a portfolio based on investment guidelines and risk policies of institutional or high net-worth clients.

A new Minor in Sustainability in Business (“SIB”), a multidisciplinary curriculum integrating economics, finance, accounting, data analytics and social sciences to address business sustainability has been launched. AMPB students are free to declare this SIB minor, positioning them for roles in sustainable finance.

BFin(AMPB) students will be given opportunities to apply for different enrichment activities specific to their studies, including overseas exchange study and industry-sponsored internships in either Year 2 or 3. Frequent networking activities with market practitioners are available, e.g. coffee chats and round table talks meeting seasoned industry practitioners in small groups, career seminars by professional bodies, and thematic visits to AMPB firms.

Programme Full Name Bachelor of Science in Quantitative Finance
理學士(計量金融)

Programme Short Name BSc(QFin)

Short Description

The Bachelor of Science in Quantitative Finance [BSc(QFin)] is a premium finance programme. Built on a solid foundation in economics and finance, the BSc(QFin) programme equips students with the essential quant skills, such as mathematics, statistics, and programming, that are required in more advanced and sophisticated analyses, such as valuation models of structured products, risk management, simulation and data analysis, financial engineering, and quantitative trading.

The programme goes beyond merely equipping students with quant skills. More importantly, it stresses on combining these skills with an understanding of the financial markets, the macro environment, and the practical situations where financial managers work. To this end, the curriculum offers a balanced mix of quant and business courses.

In the first two years students take basic finance courses such as accounting, corporate finance, macroeconomics, derivatives, and portfolio management. At the same time, they are introduced to a strong foundation in probability, statistics, calculus, linear algebra, and computer programming.

Students will apply the aforementioned quant skills in specialised QFin courses the third and fourth years of study, such as risk management, financial engineering, spreadsheet financial modelling, and mathematical finance. They can also choose from a wide selection of major elective courses such as time series analysis, big data and quant trading.

We believe that a broad knowledge base is essential for undergraduate students to understand the world in depth, absorb new ideas quickly, and think outside the box and from multiple perspectives. Hence the programme affords much flexibility to students to pursue other academic interests via second major or minor(s), whether they are mathematics, economics, or biochemistry.

To nurture students' soft skills and market acumen, the programme provides a wide range of value-enhancing activities, such as Round Tables with Practitioners, Alumni Get-Together events, Executive Mentorship Scheme, Bloomberg training workshops, simulation trading workshops, and an international field trip to global financial hubs hosted in cities with HKU Business School Centres and representative offices, including Shenzhen, Shanghai, Beijing, Ho Chi Minh City, and Barcelona.

Programme Full Name Bachelor of Business Administration in International Business and Global Management
工商管理學學士(國際商業及環球管理)

Programme Short Name BBA(IBGM)

Short Description BBA(IBGM) is an intensive premier programme in international business and global management featuring a unique curriculum designed to reflect the ever-changing demands of a globalising world.

Exclusive elements such as exchange outside Hong Kong, international field trips and global enrichment opportunities are integrated into the curriculum, and students are given the flexibility to pursue an in-depth inquiry into another specialised area of study as a second major. This cross-functional, personalised approach aims to foster a select group of outstanding students to become the world's future leaders, equipped with global perspectives, cultural sensitivity, social responsibility and key competencies to succeed in the international business environment.

Remarks -

Programme Website https://ug.hkubs.hku.hk/

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT[3]	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING)[4]	3
Or	
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
MATHEMATICS EXTENDED MODULE 1 OR 2	3

Remark:

1. "Hong Kong Diploma of Secondary Education" is referred to as "HKDSE".
2. "Attained with Distinction" obtained prior to 2018, or "Attained with Distinction (I)" or "Attained with Distinction (II)" obtained in or after 2018, in Applied Learning subjects (other than Applied Learning Chinese) will be used as additional supporting information. In the meantime, student learning experiences in Applied Learning subjects may be considered within the context of other learning experiences in their application.

3. Level 2 in Liberal Studies achieved in previous sitting will be considered in lieu of Citizenship and Social Development.
4. Other Language subjects will be used as unspecified elective subjects. Please refer to hku.hk/dse for details.
5. The result(s) of Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

In general, most of the programmes offered by HKU consider the best results achieved by candidates in different combination of sittings, except for a few programmes which only consider the latest results. Few programmes may also impose a penalty on HKDSE repeaters. Please refer to https://www.hku.hk/dse for details.

JUPAS Catalogue No. JS6901

Programme Full Name Bachelor of Science
理學士

Programme Short Name BSc

Short Description The Programme is a comprehensive training in science that:

- Develops students' capabilities in quantitative and logical reasoning
- Cultivates students' ability to tackle novel situations and solve complex problems

Features

- One entry in the application for a choice of 10 Science Majors and 7 Intensive Majors
- Up to 2 years to choose a Major
- Flexibility in changing Majors
- No quota for any Science Major
- Students may take a 2nd Major or a Minor or 2nd Minors in Science and non-Science disciplines
- One-on-one academic advising

Intensive Majors

- Allow students to specialise in a science discipline with enriched subject knowledge
- 7 Intensive Majors are offered:
  - Biological Sciences (Intensive) (144 credits)
  - Chemistry (Intensive) (144 credits)
  - Ecology & Biodiversity (Intensive) (144 credits)
  - Geology (Intensive) (150 credits)
  - Mathematics (Intensive) (144 credits)
  - Molecular Biology & Biotechnology (Intensive) (144 credits)
  - Physics (Intensive) (144 credits)

Minor in Science Entrepreneurship

- Placing strong emphasis on practical experience, and students are required to:
  - Acquire entrepreneurship-related internship experience and
  - Carry out a capstone project
- Mentoring and internship opportunities offered by our Science alumni
- Taking new courses tailor-made for this Minor and related courses currently offered by other Faculties

Articulation Pathways

- To Taught Postgraduate programmes at HKU Science
  - An articulation pathway from the 6901 Bachelor of Science to the master's programmes at HKU Science for outstanding students
  - Selected scholarship recipients will only need to pay 50% of the tuition fee
  - There is no quota for this articulation pathway, except for the one for the Master of Data Science, which offers a maximum of 2 places each year
- To the Doctor of Veterinary Medicine (DVM) at the University of Melbourne (UoMelb)
  - In collaboration with UoMelb in Australia, HKU Science will provide a

pathway to BSc 6901 students majoring in Biological Sciences, Molecular Biology & Biotechnology, Ecology & Biodiversity, Food & Nutritional Science, and Biochemistry to articulate into the DVM of the UoMelb
- Provides a new pathway to talented students who aspire to pursue a career in veterinary; students can obtain 2 degrees from the 2 universities – the HKU BSc degree and DVM in UoMelb in a minimum of 7 years
- Graduates can register as veterinary surgeons and practise in Hong Kong through the Veterinary Surgeons Board of Hong Kong

Programme Full Name Bachelor of Engineering in Biomedical Engineering
工學學士(生物醫學工程)

Programme Short Name BEng(BME)

Short Description

The Bachelor of Engineering in Biomedical Engineering (BEng(BME)) , offered by the newly established School of Biomedical Engineering at HKU, is a unique interdisciplinary programme offered in partnership with the Faculties of Medicine, Engineering, Dentistry and Science. Building on more than 20 years of experience in curriculum delivery, it is designed to nurture the next generation of biomedical engineers who will combine engineering rigor with biomedical innovation to improve health and quality of life.

The programme equips students to:

- apply engineering solutions to advance biomedical research and transform healthcare;
- innovate and translate cutting-edge technologies into real-world medical applications;
- address global health challenges with ethical, professional and social responsibility.

Programme Full Name Global Engineering and Business Programme
環球工程與商業課程

Programme Short Name GEBP

Short Description

Jointly offered by the Faculty of Engineering and the HKU Business School, the Global Engineering and Business Programme (GEBP) will equip students with professional knowledge in both engineering and business within a global context. Upon completion of the five-year double degree programme, students will earn a Bachelor of Engineering (BEng) and a Bachelor of Business Administration (BBA).

The programme features are as follows:

1. This interdisciplinary programme empowers students to develop the mindset and skills for engineering excellence and business innovation.
2. During their five years of study, students will enjoy full access to the comprehensive learning resources offered by both Faculties. For examples, scholarships, exchange opportunities, enrichment activities, career support, etc.
3. Eligible for the CSHK HKU Engineering Flagship Programme Scholarship and Placement
    - During their studies at HKU Engineering, GEBP students will be eligible to apply and may be selected for a one-off HKD $40,000 scholarship sponsored by the China State Construction Engineering (Hong Kong) Limited (CSHK).
    - In addition, they may be selected for an exclusive paid internship opportunity.
4. Available Engineering Majors:
    - Civil Engineering
    - Computer Engineering
    - Data and Systems Engineering
    - Electrical Engineering
    - Electronic Engineering
    - Mechanical Engineering
5. Available Business Majors:
    - Entrepreneurship, Design and Innovation (Note: Candidates must undergo a selection process arranged by the Programme Coordinator for EDI)
    - Finance
    - Human Resource Management
    - Information Systems and Analytics
    - Marketing
    - Students can thus choose from 6 X 5 = 30 possible options as they pursue their degrees in Engineering and Business Administration. Subject to academic performance and availability.
6. All GEBP students are required to complete at least one outbound exchange programme outside Hong Kong prior to graduation.
7. The fifth year is offered on self-financing basis (at a slightly higher tuition rate)*.

Professional Recognition

1. All BEng programmes now being offered under the code 6937 are accredited by the Hong Kong Institution of Engineers (HKIE).
2. Students of the BBA programme are eligible to enrol in the CGMA Finance Leadership Program and kickstart their journey to become a member of Chartered Institute of Management Accountants and a Chartered Global

Management Accountant while they are studying at the University.

*Students enrolled in the fifth year may still apply for financial assistance under the Government Non-means Tested Loan Scheme, subject to the prevailing regulations of the Scheme.

First Year Tuition Fee

HK$ 49,500

The year(s) of study beyond the four-year curriculum are offered on a 'self-financing' basis, which means:

a. that students studying for these further qualifications will be required to pay composition fees higher than the normal fee; and
b. that while these students will be eligible for financial assistance under the Government Financial Assistance Scheme and Non-means-tested Loan Scheme, they will not be eligible for other Government loans and grants.

Programme Full Name Bachelor of Biomedical Sciences
生物醫學學士

Programme Short Name BBiomedSc

Short Description

Biomedical sciences cover a wide range of scientific and allied disciplines, with the inclusion of molecular and cell biology, genetics and genome science, bioinformatics, anatomy, physiology, pharmacology, biological and medicinal chemistry, immunology and microbiology, as well as public and environmental health. The study of biomedical sciences focuses on the inter-relationships between humans, health, and disease, along with the translation of biomedical applications of basic sciences into the clinical practices of health services and healthcare industry.

The Faculty offers the Bachelor of Biomedical Sciences (BBiomedSc) programme with the aim of nurturing graduates with broad but core knowledge in key biomedical disciplines.

The BBiomedSc curriculum is designed with a good balance of structure and flexibility, allowing students to plan their study according to their individual interests and specialise in one of the following four majors:

- Biomedical Research: explores a wide range of scientific and allied disciplines
- Bioinformatics: focuses on high-impact biomedical big data applications
- Clinical Sciences: builds strong foundation in clinical research and healthcare sciences
- Health Technology: covers development of innovative, clinically-oriented biomedical technology

Students will be exposed to a wide range of learning experiences, including traditional lectures, laboratory practicals, problem-based learning tutorials, web-based learning, and research projects.

Remarks -

Programme Website https://www.sbms.hku.hk/

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT[3]	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING)[4]	3
Or	
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING, OTHER LANGUAGE)	3
MATHEMATICS EXTENDED MODULE 1 OR 2	3

Remark:

1. "Hong Kong Diploma of Secondary Education" is referred to as "HKDSE".
2. "Attained with Distinction" obtained prior to 2018, or "Attained with Distinction (I)" or "Attained with Distinction (II)" obtained in or after 2018, in Applied Learning subjects (other than Applied Learning Chinese) will be used as additional supporting information. In the meantime, student learning experiences in Applied Learning subjects may be considered within the context of other learning experiences in their application.
3. Level 2 in Liberal Studies achieved in previous sitting will be considered in lieu of Citizenship and Social Development.
4. Other Language subjects will be used as unspecified elective subjects. Please refer to hku.hk/dse for details.
5. The result(s) of Combined Science and Integrated Science achieved in previous sitting(s) will also be considered.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

In general, most of the programmes offered by HKU consider the best results achieved by candidates in different combination of sittings, except for a few programmes which only consider the latest results. Few programmes may also impose a penalty on HKDSE repeaters. Please refer to https://www.hku.hk/dse for details.

Programme Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT	Attained
ENGLISH LANGUAGE	4
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 1 SUBJECT (EXCLUDING APPLIED LEARNING)[1]	3
One of the following elective subjects:	
CHEMISTRY	3
BIOLOGY	3
Or	
MATHEMATICS EXTENDED MODULE 1 OR 2	3
One of the following elective subjects:	
BIOLOGY	3
CHEMISTRY	3

Remark:

1. Other Language subjects will be used as unspecified elective subjects. Please refer to hku.hk/dse for the minimum requirement.

The calculation of programme score considers category A subjects and M1/M2 only. Please refer to hku.hk/dse for details.

JUPAS Catalogue No.	JS6987
Programme Full Name	Bachelor of Engineering in Computer Engineering / Electrical Engineering / Electronic Engineering 工學學士(計算機工程/電機工程/電子工程)
Programme Short Name	BEng(CE/EE/ElecE)

Short Description	The Department of Electrical and Computer Engineering (ECE) (formerly known as the Department of Electrical and Electronic Engineering, renamed in 2026) was established in the late fifties and is the oldest ECE-related department in Hong Kong. Its graduates have served the society since 1961 and have been making tremendous impact to the well-being and development of Hong Kong in her infancy years. Over the years, power systems, electronic, computers and information processing have evolved at dazzling speed, and have permeated to every aspect of life and the society at large. The department has naturally progressed with time and has grown from the relatively obscured location along Pokfulam Road to the current modern high rise of the Chow Yei Ching Building, with numerous satellite laboratories.
	
	The ECE Department is the only department comprising Computer Engineering (CE), Electrical Engineering (EE) and Electronic Engineering (ElecE) in Hong Kong.
	
	Features of its BEng programmes are as follows:
	
	• Contemporary education nurturing future leaders
	  ○ The department offers contemporary curriculum and stimulating learning experience for educating future leaders in the fields of CE, EE and ElecE for Hong Kong, and to nurture well-rounded graduates with specialty expertise at the present time and beyond.
	
	• Stimulating learning experience
	  ○ Students will build solid foundations through active learning, capstone experience, hands-on activities, internship, exchanges studies and service learning.
	
	• Innovation and entrepreneurship
	  ○ The curriculum encourages students to be nurtured to be able to offer solutions to real life problems via design and innovation, and to foster and advocate entrepreneurship.
	
	• Academic advising
	  ○ Academic advising is in place to guide students for their course selection, programme selection and career planning.
	
	• Options of minor programmes
	  ○ Students can opt for minor options in other engineering disciplines offered by the Faculty of Engineering or those offered by other faculties, subject to the requirements of respective minor options.

Programme Full Name Computing and Data Science
計算與數據科學

Programme Short Name CDS

Short Description

The Bachelor of Engineering in Computer Science and Bachelor of Engineering in Artificial Intelligence and Data Science programmes share the same programme code. Students shall make a preliminary choice as an indication of their preferences; and they may freely choose the final programme by the end of their first year.

The two professional degree programmes are designed to equip students with the necessary skills and knowledge to excel in the rapidly evolving fields of computing, AI, data science, and other transformative technologies.

The Bachelor of Engineering in Computer Science provides students with a strong foundation in computer science and its applications. The programme covers a wide range of topics, including programming, algorithms, data structures, software engineering, computing infrastructures, and artificial intelligence technologies.

The Bachelor of Engineering in Artificial Intelligence and Data Science, on the other hand, focuses on training students for careers in AI and data science. The programme provides students with solid training in artificial intelligence and data-driven computing technologies. It covers topics such as programming, data modeling, big data systems, AI & data ethics, AI technologies, and applications.

These programmes provide a comprehensive education that prepares students to be leaders in their field, driving innovation and shaping the future of technology-driven decision-making. Graduates of either programme will be at the forefront of technology innovations, making significant contributions to the development of cutting-edge solutions that leverage computing, AI, and data science technologies. They will be well-positioned to take up key roles such as machine learning engineers, software developers, data analysts/engineers, AI consultants, cybersecurity specialists, and more, in a wide range of industries.
