You are advised to consult the websites of the respective JUPAS participating-institutions or SSSDP institutions for further and additional information.

Should there be any discrepancy between the programme information listed in the JUPAS website and that listed in the institutions' websites, the information listed in the individual institutions' website is final.

JUPAS Catalogue No.	JS5101
Programme Full Name	International Research Enrichment 國際科研
Programme Short Name	IRE
Short Description	<p>The <b>International Research Enrichment (IRE) program</b> (JS5101) is designed for students who are interested in pursuing a research career in science or broadening their exposure to research during their undergraduate studies. It emphasizes curiosity and grit, which are the essential attributes to a successful career in scientific research. Building upon the premise that exposure to international research environments at an early stage is essential to a fruitful research career, the program offers outstanding science students an early opportunity to nurture their research abilities and solidify their discipline-specific knowledge in regular Science programs.</p>

**Curriculum Highlights:**

The IRE program (JS5101) has a similar curriculum structure as that of Science (Group A) (JS5102) and Science (Group B) (JS5103) programs. However, the IRE program distinguishes itself from regular science programs by providing students with the following:

- Free choice of major programs among Biochemistry and Cell Biology, Biotechnology, Chemistry, Mathematics, Ocean Science and Technology, and Physics
- Tailor-made team building activities and field trips
- Participation in advanced research projects under the supervision of world-class professors
- Opportunities to meet with Nobel Laureates and renowned scientists
- Individualized research guidance and mentoring from experienced faculty members
- Undergraduate Research Opportunities Program (UROP)
- Exchange and internship opportunities in renowned foreign universities/research institutes
  - Summer research internship opportunities in foreign universities and institutions
  - Scholarship support for overseas learning trips

Most of our graduates have been admitted into top research postgraduate programs at world-renowned universities.

Remarks	Students can apply for the IRE program through the direct choice in JUPAS, or apply for transfer from the regular Science (Group A) program or Science (Group B) program of the School of Science into IRE program after their first year of study. Students interested in IRE program are encouraged to include both IRE program (JS5101) and either Science (Group A) program (JS5102) or Science (Group B) (JS5103) in their JUPAS program choices.

-------------------	--

**General Entrance Requirements**

Core Subjects	Minimum Level
CHINESE LANGUAGE <sup>Note1</sup>	3
CITIZENSHIP AND SOCIAL DEVELOPMENT <sup>Note2</sup>	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS <sup>Note4</sup>	3
<b>Or</b>	
ANY 1 SUBJECT	3
MATHEMATICS EXTENDED MODULE 1 OR 2	3

**Notes:**

1. Non-Chinese speaking (NCS) students may use an alternative Chinese subject, an HKDSE Other Language subject, or an HKDSE Applied Learning Chinese subject to satisfy the University's Chinese language requirement.
2. The result(s) of Liberal Studies in previous sitting(s) will also be considered in HKUST General Entrance Requirement. Level 2 or above is required. "Attained" level in Citizenship and Social Development and the result(s) of Liberal Studies will not be considered in the admissions score calculation.
3. The above subjects refer to Category A subjects.
4. Grade C or above in Category C (Other Languages) subjects can count as Elective 2 (for some programs).

**Calculation of scores for applicants with more than 1 sitting in HKDSE Examination**

Once the minimum entrance requirements have been met, the best results achieved in all sittings will be used for calculating admissions scores.

**Programme Entrance Requirements**

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT <sup>Note1</sup>	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
<b>Two of the following elective subjects:</b>	
BIOLOGY	3
CHEMISTRY	3
PHYSICS	3
MATHEMATICS EXTENDED MODULE 1 OR 2	3
ANY 1 SUBJECT <sup>Note2</sup>	3

Notes:

1. The result(s) of Liberal Studies (Level 2 or above) achieved in previous sitting(s) will also be considered.
2. The above subjects refer to Category A subjects.
3. Interview is compulsory for admissions.

<b>JUPAS Catalogue No.</b>	JS5102
<b>Programme Full Name</b>	Science (Group A) 理學 A 組
<b>Programme Short Name</b>	SSCI-A
<b>Short Description</b>	HKUST School of Science offers two general School-based program choices for JUPAS applicants, i.e. Science (Group A) program (JS5102) and Science (Group B) program (JS5103). Science (Group A) program is tailor-made for those students who are interested in the fields of physical science. Science (Group B) program is more suitable for those students who are interested in the fields of chemistry and life science.

**Program Curriculum:**

The **Science (Group A) program** (JS5102) at HKUST School of Science is tailor-made for those students who are interested in the fields of physical science. It provides an invaluable opportunity for students to have a deeper understanding of various aspects of science and their personal interests before they decide on their majors. The goal is to offer a more diverse, interdisciplinary, and inquiry-driven undergraduate education to students interested in science. Students can enjoy high flexibility in major and minor choices in accordance with their aspirations.

The program aims at nurturing young scientists who can contribute to the betterment of mankind with advanced scientific knowledge. Students will be equipped with the necessary knowledge and skills to engage in activities demanding scientific thinking, analysis and task execution, so that they can excel in their future professions including research and development, education, manufacturing, logistics, and business and finance.

The School has particularly placed enormous efforts and resources into designing its laboratory and signature courses with the aim of nurturing students' competency in experimental methods and logical analysis, which are the two indispensable pillars of scientific method. In addition to rigorous academic training, we give equal emphasis on students' personal development. A wide range of co-curricular activities and training are provided to further enrich students' university experience. These include but are not limited to student exchange, undergraduate research, internship, community services and engagement programs designed for the School of Science students only.

**Program Structure:**

The program flexibility caters for students with diverse academic and career aspirations, while ensuring the development of a solid foundation and adequate exposure to a range of science disciplines. Most science major programs offer different study tracks and options, and provide opportunities for double majors and minors. The study tracks and options enable students to deepen their understanding of the major discipline, which will be useful for graduate degrees in the future. The additional major and minor allows students to leverage on synergy across academic disciplines. It is possible for students to take various combinations of majors, not only within the School but also across Schools.

Students admitted to Science (Group A) program can opt to declare their corresponding majors offered by the School of Science, as well as the Joint School Programs and the programs offered by Academy of Interdisciplinary Studies, upon completion of the first year of study.

<b>Remarks</b>	Students admitted to the Science (Group A) program of the School of Science can apply for transfer into the International Research Enrichment program (JS5101)
----------------	--

after their first year of study. Students interested in IRE are encouraged to include both Science (Group A) program (JS5102) and IRE program (JS5101) in their program choices in JUPAS.

Under School-based admissions, students admitted into the School of Science through **Science (Group A) program** (JS5102) upon completion of the first year of study will enroll into one of the following degree programs:

*School of Science programs*

- BSc in Data Analytics in Science
- BSc in Mathematics
- BSc in Mathematics with an Extended Major in Artificial Intelligence
- BSc in Mathematics with an Extended Major in Digital Media and Creative Arts
- BSc in Ocean Science and Technology
- BSc in Ocean Science and Technology with an Extended Major in Artificial Intelligence
- BSc in Ocean Science and Technology with an Extended Major in Digital Media and Creative Arts
- BSc in Physics
- BSc in Physics with an Extended Major in Artificial Intelligence

*Joint School programs*

- BSc in Data Science and Technology
- BSc in Mathematics and Economics
- BSc in Risk Management and Business Intelligence

*Interdisciplinary programs*

- BSc in Environmental Management and Technology
- BSc in Individualized Interdisciplinary Major

JUPAS Catalogue No.	JS5181
Programme Full Name	Science (Group A) with an Extended Major in Artificial Intelligence 理學 A 組- 延伸主修人工智能
Programme Short Name	SSCI-A (AI)
Short Description	<p><b>The Science (Group A) with an Extended Major in Artificial Intelligence program (JS5181)</b> is designed for science students who want to gain solid knowledge in Science disciplines PLUS innovative applications of AI in their major areas.</p> <p>The world is changing fast; artificial intelligence (AI) has come to define society today in ways we never anticipated. Examples include robotics, autonomous vehicles, intelligent sensors and complicated data analysis. The knowledge of AI can be a very good supplement to science subjects, which requires strong mathematical sense and relevant tools to achieve synergy. The other way round, scientific background can help build better AI in different subject areas. Understanding the key trends will allow people and businesses to prepare and grasp the opportunities, companies and individuals that do not keep up with some of the major tech trends run the risk of being left behind. To promptly equip our students for this challenge, the pioneering <b>Science (Group A) with an Extended Major in Artificial Intelligence (SSCI-A (AI)) program</b> is designed as an extended major to enrich major study in four relevant science subjects (Mathematics / Physics / Ocean Science and Technology / Data Science and Technology) with cross-disciplinary AI technology applications.</p> <p>One important feature of the SSCI-A (AI) program is that students need not invest four years to study an emerging technology area. Our flexible approach allows students from the SSCI-A (AI) program to learn the best of AI when it is in the climax of development. They are guaranteed the study of AI at the time of admissions. The curriculum is cross-disciplinary and practical. They will learn solid knowledge in one of the three relevant major science subjects PLUS innovative application of AI in their major areas. In addition, students will gain cross-disciplinary problem-solving skills and professional insights through a Design Thinking course and Professional Seminars in AI. The Capstone Project+, with strong AI components and sponsorship from industry, enables students to practice AI applications on real world problems. Students should expect to take, approximately one additional course per term throughout four years. Upon satisfactory completion, students will earn a BSc in Mathematics / Physics / Ocean Science and Technology / Data Science and Technology with an Extended Major in Artificial Intelligence.</p> <p>The knowledge of AI, together with cross-disciplinary problem-solving skills, will provide students with a competitive edge in the job market. These students are more self-motivated and open-minded in new findings and these attributes are essential and appreciated by most employers. Students will enjoy career opportunities relevant to their majors, in industries and businesses that are empowered by AI. Careers include Machine Learning Modellers / Consultants, AI Associates in Bank, Deep Learning Scientist, Data Analysts, AI Algorithm Engineer, Environmental Consultants, etc.</p>
Remarks	Students can apply for the SSCI-A (AI) program through the direct choice in JUPAS, or apply for transfer from the regular Science (Group A) program after their first year of study. Students interested in SSCI-A (AI) program are encouraged to include both the SSCI-A (AI) program (JS5181), and the Science (Group A) program (JS5102) in their JUPAS program choices.

**Short Description** The HKUST School of Engineering is the most comprehensive Engineering School in Hong Kong. The School has a strong international reputation and consistently ranks high among major engineering schools around the world. In 2023 Times Higher Education World University Rankings, HKUST was ranked No. 26 globally in Engineering, which is the highest ranking given to a Hong Kong engineering school.

The School of Engineering adopted School-based admission. In the first year of study, students will undergo fundamentals embracing general education and essential foundations. In the School of Engineering, upon completion of the first year, students will be able to select any engineering major from a wide range of programs. All Bachelor of Engineering degree programs are accredited by the Hong Kong Institution of Engineers (HKIE).\*

The four-year curriculum requires around 120 credits. The curriculum provides a more student focused and broader program structure with a large degree of flexibility which enables students an all-round educational experience and better prepares them for diverse careers. The curriculum is designed to help students identify their interest and career aspiration.

The Centre for Engineering Education Innovation (E2I) was established to support engineering students exclusively and help them achieve a successful year at the beginning of their university study. Introduced by E2I, the peer mentoring program offers first-year students counseling support and helps them understand their own interest and academic strengths.

*\*Please refer to the HKIE website for the latest accreditation status of individual programs.*

Students admitted into the School of Engineering upon completion of the first year of study will enroll into one of the bachelor programs offered by School, which may cover the following disciplines:

- Aerospace Engineering
- Bioengineering
- Chemical Engineering
- Chemical and Environmental Engineering
- Civil Engineering
- Civil and Environmental Engineering
- Computer Engineering
- Computer Science
- Decision Analytics
- Electronic Engineering
- Industrial Engineering and Engineering Management
- Mechanical Engineering
- Sustainable Energy Engineering

Besides, engineering students may also apply to pursue a Dual Degree or an interdisciplinary program after one year of study:

- BEng & BBA Dual Degree Program in Technology and Management
- BSc in Data Science and Technology
- BSc in Environmental Management and Technology

- BSc in Individualized Interdisciplinary Major
- BSc in Integrative Systems and Design
- BSc in Risk Management and Business Intelligence

Students in ENGG program may also opt into the Engineering with an Extended Major in Artificial Intelligence (AI), and Extended Major in Digital Media and Creative Arts (DMCA) after Year 1. Students enrolled in an Extended Major will take extra credits in AI or DMCA in addition to their Major Program. By following a structured pathway, students are able to complete both the Major and the Extended Major within 4 years. Students interested in ENGG+AI may also choose the direct program choice JS5282.

Through the Extended Major in AI, students will have access to fundamental courses in AI as well as a wide range of electives that cater for different backgrounds of students such as machine learning, computer vision, data visualization, etc. The Extended Major in DMCA, on the other hand, provides students with training in 2 main domains, Digital Media and Creative Arts. Under each domain, there will be numerous electives for students to choose from, e.g. computer music, game programming, digital design for Digital Media, whereas for Creative Arts, there are electives in the areas of Music, Literature and Film, Design, Studio and Performing Arts, etc.

Remarks

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE <sup>Note1</sup>	3
CITIZENSHIP AND SOCIAL DEVELOPMENT <sup>Note2</sup>	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS <sup>Note4</sup>	3
<b>Or</b>	
ANY 1 SUBJECT	3
MATHEMATICS EXTENDED MODULE 1 OR 2	3

Notes:

1. Non-Chinese speaking (NCS) students may use an alternative Chinese subject, an HKDSE Other Language subject, or an HKDSE Applied Learning Chinese subject to satisfy the University's Chinese language requirement.
2. The result(s) of Liberal Studies in previous sitting(s) will also be considered in HKUST General Entrance Requirement. Level 2 or above is required. "Attained" level in Citizenship and Social Development and the result(s) of Liberal Studies will not be considered in the admissions score calculation.
3. The above subjects refer to Category A subjects.
4. Grade C or above in Category C (Other Languages) subjects can count as Elective 2 (for some programs).

**Calculation of scores for applicants with more than 1 sitting in HKDSE Examination**

Once the minimum entrance requirements have been met, the best results achieved in all sittings will be used for calculating admissions scores.

**Programme Entrance Requirements**

<b>JUPAS Catalogue No.</b>	JS5282
<b>Programme Full Name</b>	Engineering with an Extended Major in Artificial Intelligence 工程學- 延伸主修人工智能
<b>Programme Short Name</b>	ENGG+AI
<b>Short Description</b>	<p>The world is changing fast; artificial intelligence (AI) has come to define society today in ways we never anticipated. For example, AI makes it possible for us to unlock our smartphones with our faces, ask our virtual assistants questions and receive vocalized answers. The World Economic Forum’s “The Future of Jobs 2018” report predicts that there will be 58 million new jobs in AI by 2022. Companies and individuals that do not keep up with some of the major tech trends run the risk of being left behind. To promptly equip our students for this challenge, the pioneering “ENGG+AI” program is designed as an extended major to enrich major study with cross-disciplinary AI technology applications.</p> <p>One important feature of ENGG+AI program is that students need not invest four years to study an emerging technology area when no one can guarantee whether it can thrive after four years. Flexibly, ENGG+AI students can learn the best of AI when it is in the climax of development.</p> <p>ENGG+AI students are guaranteed the study of AI at the time of admission. The curriculum is cross-disciplinary and practical. They will learn solid knowledge in an engineering discipline of their choice PLUS innovative applications of AI in their major areas. In addition, students will gain cross-disciplinary problem-solving skills and professional insights through a Design Thinking course and Professional Seminars in AI. The Capstone Project, with strong AI components and sponsorship from industry, enables students to practice AI applications on real world problems. Students should expect to take, approximately one additional course per term throughout four years. Upon satisfactory completion, students will earn a “BEng/BSc in one of the engineering disciplines with an Extended Major in Artificial Intelligence”.</p> <p>Students will enjoy career opportunities relevant to their respective engineering discipline PLUS opportunities from new industry and business developed from AI.</p> <p>The knowledge of AI, together with cross-disciplinary problem-solving skills, will provide students with additional competitive edge in the job market. These students are more self-motivated and open-minded in new learnings and these attributes are essential and appreciated by most employers.</p>

**Remarks** Students may enroll into one of the bachelor programs offered by School of Engineering upon completion of the first year of study. Applicants interested in the AI area are encouraged to include both JS5200 ENGG and JS5282 ENGG+AI in the program choices.

<b>JUPAS Catalogue No.</b>	JS5300
<b>Programme Full Name</b>	Business and Management 工商管理
<b>Programme Short Name</b>	B&M

**Short Description** The HKUST Business and Management (B&M) program is our school-based admissions route and one of the most well-regarded and comprehensive business programs in Hong Kong. The program is designed to provide students with a broad foundation of knowledge and great flexibility in learning.

In the first three terms, students will be exposed to a wide variety of business and other foundational subjects to fully explore their interests before committing to one or more specialized area(s) of study during major selection exercises held twice a year.

**Key Figures of Major Selection**

- The School offers four Bachelor of Science (BSc) programs and eight Bachelor of Business Administration (BBA) programs. [[Program talk videos are available](#)]
- Half or more of the planned major seats are reserved for B&M program students to enroll via the major selection exercises.
- In prior major selection exercises, about 90% of business students were admitted into their first or second choice major.
- Planned major seats of individual programs are listed below for reference:

<i>BSc Programs</i>	Planned Major Seats
Economics and Finance	60
Quantitative Finance	40
Sustainable and Green Finance#	30
Risk Management and Business Intelligence^	45

<i>BBA Programs</i>	Planned Major Seats
Economics	110
Finance	140
Global Business	60
Information Systems	220
Management	205
Marketing	220
Operations Management	150
Professional Accounting	210

#Jointly offered by School of Business and Management and Division of Environment and Sustainability.

^Jointly offered by School of Business and Management, School of Engineering, and School of Science.

**Double Major/Minor and Extended Major**

The flexible curriculum structure allows students to customize their program combinations based on their interests, e.g. BBA (Marketing and Operations Management), BSc (Economics & Finance and Information Systems), etc.

In addition, students may take an additional 21 credits at the minimum to declare an extended major in either **Artificial Intelligence (AI)** or **Digital Media and Creative Arts (DMCA)** to further enrich their undergraduate studies.

#### **Key Figures of Major/Minor Combinations**

- About 80% of business students completed their degrees with additional major(s) or minor(s).
- Students may pursue one or more of the 20+ minor programs offered by Business School and other academic units, for instance, Entrepreneurship, Humanities, Psychological and Behavioral Science, Robotics, etc.
- Over 50 major/minor combinations are offered to accommodate students' needs and interests.

#### **Global Exposure and Career Support**

**Close to 80% of business students have overseas learning experience** from a range of global study programs, including semester-long exchange and short-term study programs. Our constantly expanding exchange network has about 140 world-renowned partners, providing 400 exchange-out places per year for business students.

**HKUST Business School graduates are well-received by employers and top-notch institutions.** On top of the University's career support, our School's career development team provides additional internship and graduate job opportunities, and professional training to business students.

#### **Key Figures of Recent Graduate Placement**

- 90% of graduates entered the job market, and the remaining 10% of graduates chose to pursue further studies.
- Over 90% of business students completed at least one internship during their undergraduate studies.
- Over 80% of graduates obtained the first job offer by July; over 70% of graduates received two or more job offers.
- Top employers include investments banks such as Goldman Sachs and Morgan Stanley; consulting firms such as McKinsey, IT giants such as Microsoft; "Big-4" accounting firms; and non-business sector such as HKSAR Government, etc.
- Further study destinations include Imperial College, London Business School, University College London, and University of Southern California, etc.

#### **Remarks**

The Year 1 curricula of all Business programs are identical. Students interested in a specific business discipline may consider including both their preferred business program(s) and JS5300 Business & Management in the program choices. Those who would like to explore their program interest before deciding on their major(s) may consider choosing JS5300 Business & Management at admissions.

Selected Band A applicants who show talents and potentials for business study will be invited to engagement activities organized by HKUST Business School in May-Jun 2024.

Other than the above business programs, students in HKUST Business School may apply to pursue a Dual Degree or an interdisciplinary program upon completion of the first year of study:

- BEng/BSc & BBA Dual Degree Program in Technology & Management
- BSc in Biotechnology and Business
- BSc in Environmental Management and Technology

- BSc in Individualized Interdisciplinary Major
- BSc in Mathematics and Economics

JUPAS Catalogue No.	JS5311
Programme Full Name	BBA in Economics 工商管理學士 ( 經濟學 )
Programme Short Name	ECON

**Short Description**

The BBA Economics (ECON) program focuses on economic reasoning and using of data for sound business decisions. Compare to our BSc Economics and Finance program, the BBA ECON students take more core courses in various business disciplines which equip them with a multi-disciplinary perspective to analyze business problems, public policies, and recommend solutions. Students interested in economic research may enroll in the Honors Thesis Courses in their final year to further develop their research skills and take the opportunity to work closely with a faculty member on their own research project.

Economics is a social science that studies people's decisions under constraints. It offers expertise in topics such as behavior of consumers and firms, efficiency and equity of markets, economic growth, business cycles, international trade and finance, taxation and public policies, etc.

Our flexible curriculum allows students to pursue an additional major in other business areas. Students may also pursue a minor offered by other Schools at HKUST. The interdisciplinary insight, combining the analytical nature of economics give BBA ECON graduates an edge in a range of career choice across business fields.

**Extended Major**

ECON students may apply for the extended major in Artificial Intelligence or Digital Media and Creative Arts at the end of the 3rd term of study, if they satisfy the extended major requirement. Students completing the extended major will graduate with a title bearing both the traditional major subject they selected and the extended major. For details, please refer to "[JS5300 Business & Management](#)".

**Remarks**

The Year 1 curricula of JS5311 ECON and JS5300 B&M are identical. JS5311 allows students who have a special interest in BBA ECON to directly enter the major. Those admitted into JS5300 may apply to enter ECON or other business majors via the major selection exercises held at the end of the first three terms. Students interested in ECON should include either or both JS5311 and JS5300 in their program choices. [Please click here for details of JS5300 Business and Management.](#)

Band A applicants who show talents and potentials for business study will be invited to engagement activities organized by HKUST Business School in May–June 2024.

<b>JUPAS Catalogue No.</b>	JS5312
<b>Programme Full Name</b>	BBA in Finance 工商管理學士 ( 金融學 )
<b>Programme Short Name</b>	FINA
<b>Short Description</b>	<p>The BBA in Finance (FINA) program aims to equip students with quantitative and qualitative analytical skills to make proper financial decisions. Important topics covered in FINA curriculum include investment analysis, portfolio management, corporate finance, derivative securities, financial markets and institutions, financial accounting, and international finance.</p> <p>FINA curriculum helps students gain proficiency in working with financial databases such as the Bloomberg Professional Services, Refinitiv, and Morningstar Direct<sup>SM</sup>. FINA students will acquire well-rounded business knowledge by taking courses in both finance and other business disciplines including accounting, statistics, economics, information systems, operations management, marketing, and management.</p> <p>Our program offers many elective courses for students to develop specialties in specific areas of finance. The program is also flexible enough to accommodate students' interest in choosing other disciplines for additional majors and minors.</p> <p>Our program provides a wide range of activities such as Undergraduate Research Opportunities Program (UROP), International Exchange Program, business case competitions and personal development training. The real world experiences help develop our students to be well-rounded finance professionals.</p> <p>Our graduates typically pursue careers in investment banking, retail banking, fund management, trading, private equity, insurance, accountancy, compliance, risk management, corporate finance, and management consulting. They are also well prepared for professional qualifications such as the Chartered Financial Analyst (CFA), the Certified Financial Planner (CFP), and the Financial Risk Manager (FRM).</p> <p><b><u>Extended Major</u></b></p> <p>FINA students may apply for the extended major in Artificial Intelligence or Digital Media and Creative Arts at the end of the 3rd term of study, if they satisfy the extended major requirement. Students completing the extended major will graduate with a title bearing both the traditional major subject they selected and the extended major. For details, please refer to "<a href="#">JS5300 Business &amp; Management</a>".</p>
<b>Remarks</b>	<p>The Year 1 curricula of JS5312 FINA and JS5300 B&amp;M are identical. JS5312 allows students who have a special interest in BBA FINA to directly enter the major. Those admitted to JS5300 may apply to enter FINA or other business majors via the major selection exercises held at the end of the first three terms. Students interested in FINA should include either or both JS5312 and JS5300 in their program choices. <a href="#">Please click here for details of JS5300 Business and Management</a>.</p> <p>Band A applicants who show talents and potentials for business study will be invited to engagement activities organized by HKUST Business School in May–June 2024.</p>

<b>JUPAS Catalogue No.</b>	JS5313
<b>Programme Full Name</b>	BBA in Global Business 工商管理學士 ( 環球商業管理 )
<b>Programme Short Name</b>	GBUS
<b>Short Description</b>	<p>The BBA in Global Business (GBUS) program is the first-of-its-kind in Hong Kong. As a highly sought-after business program, we envision developing our capable and highly motivated students to “Create Impacts with a Global and Strategic Mindset” whilst embracing global challenges. This strong and vibrant community, together with GBUS graduates, pursue their dreams of becoming socially responsible global leaders through humility, enthusiasm, cultural sensitivity, and sound critical thinking in today’s fast-changing world.</p> <p>Learning at GBUS extends beyond the classrooms. With a dynamic and diverse peer group and a strong culture of student initiatives, students can learn a great deal from each other. There are a variety of co-curricular activities for students to connect with the corporate and global community, such as Global Leadership Forum, Mentorship Program, Study Trips, and International Business Case Competitions.</p> <p>GBUS students have great flexibility in customizing their learning experience. Students can select from a range of additional major(s) and/or minor(s) offered at HKUST, such as Finance, Information Systems, Mathematics, Computer Science, Entrepreneurship, and Social Science to fit their interests and aspiration. All GBUS students spend at least one term studying abroad at top universities, thus forming a wide global network. GBUS students can join the School’s exchange program twice to extend their global learning to different continents.</p> <p>The GBUS curriculum reflects our focus on cultivating students' global and societal perspectives and developing their strategic business skills through experiential learning. Some signature GBUS courses are “Doing Business in Asia and Emerging Markets”, “Global Business Case Studies”, “ESG Corporate Project”, and “Capstone Project”. Upon completion of their studies, GBUS graduates start their careers in various areas, such as consulting, finance, NGO, startups, and technology, or pursue postgraduate studies.</p> <p><b><u>Extended Major</u></b></p> <p>GBUS students may apply for the extended major in Artificial Intelligence or Digital Media and Creative Arts at the end of the 3rd term of study, if they satisfy the extended major requirement. Students completing the extended major will graduate with a title bearing the traditional major subject they selected and the extended major. For details, please refer to "<a href="#">JS5300 Business &amp; Management</a>".</p>
<b>Remarks</b>	<p>The Year 1 curricula of JS5313 GBUS and JS5300 B&amp;M are identical. JS5313 allows students who have a special interest in BBA GBUS to begin their GBUS journey right away through participation in various GBUS co-curricular and networking events with GBUS senior students and alumni. Those admitted into JS5300 may apply to enter the GBUS or other business majors via the major selection exercises held at the end of the first three terms. Students interested in GBUS should include either or both JS5313 and JS5300 in their program choices. <a href="#">Please click here for details of JS5300 Business and Management</a>.</p> <p>Interview is compulsory for admissions. Band A applicants who show talents and potentials for GBUS study will be invited to engagement activities in July 2024. Final interviews by the GBUS program will be conducted in late July 2024.</p>

<b>JUPAS Catalogue No.</b>	JS5314
<b>Programme Full Name</b>	BBA in Information Systems 工商管理學士 ( 資訊系統學 )
<b>Programme Short Name</b>	IS
<b>Short Description</b>	<p>The BBA Information Systems (IS) program is offered by one of the top 20 Information Systems departments in the world. Nowadays, information systems play a critical role in driving business innovations in organizations. The IS program trains students to become technically-proficient business professionals with the ability to analyze data, design, implement, and audit Information Systems for businesses. The program is suitable for students who want to utilize Information Systems to solve business problems.</p> <p>Our curriculum covers basic concepts to complex theories required for the applications of information systems to businesses. Prior background in science or Information Technology (IT) is not required for admissions. Students are required to take a combination of business foundation courses and technology management courses (e.g. Innovation Management, Business Analytics) as the basis to pursue in-depth knowledge in IS.</p> <p>IS students are offered two options, namely "Business Analytics" and "Information Systems Auditing" to suit their own academic interest and career plan.</p> <p>The IS program recognizes the significance of enrichment opportunities and the close connection with the industry. In addition to encouraging students to participate in one-year internship programs, and local and international case competitions, the program offers students networking opportunities with Hong Kong business leaders. For example, the program works closely with the HKUST ISACA Student Group to offer external engagement opportunities for our students.</p> <p>Our graduates are in high demand in the job market and pursue a career in, but not limited to, these professional specializations: (1) business analytics, business intelligence and big data, (2) information systems auditing, (3) fintech, (4) cybersecurity, (5) technology and innovation management, (6) technology entrepreneurship and (7) electronic/mobile commerce.</p> <p><b><u>Extended Major</u></b></p> <p>IS students may apply for the extended major in Artificial Intelligence or Digital Media and Creative Arts at the end of the 3rd term of study, if they satisfy the extended major requirement. Students completing the extended major will graduate with a title bearing both the traditional major subject they selected and the extended major. <b>JUPAS Catalogue No.</b>	JS5315
<b>Programme Full Name</b>	BBA in Management 工商管理學士 ( 管理學 )
<b>Programme Short Name</b>	MGMT
<b>Short Description</b>	<p>The MGMT program prepares students to succeed in today's competitive business world by teaching them to evaluate the current needs of an organization while anticipating future needs. MGMT students will acquire a broad range of skills and knowledge for managing people and resources effectively.</p> <p>Our comprehensive MGMT curriculum teaches students how to strategically formulate organizational goals for the short-/long-term. Students will systematically study decision-making processes, carefully design organizational structures, tactfully solve business problems, and thoroughly understand the human motivations behind them all. MGMT students are trained to be skilled in the key aspects of management, which includes <i>planning, organizing, staffing, leading, and controlling</i> organizations. These professional management skills are essential to drive business growth and help businesses accomplish their strategic goals.</p> <p>The Management Department recently introduced three academic Options for students to develop their specialty. The three Options, namely the '<i>CSR and Sustainability Option</i>', the '<i>Consulting Option</i>', and the "<i>Human Resources Option</i>", help prepare students to meet the emerging yet challenging marketplace trends.</p> <p>In addition, MGMT students are offered an excellent array of courses to suit their own academic interests. These courses include: <i>Organizational Behavior, Negotiation, Management in Chinese Contexts, Human Resources Management, Strategic Management, International Management, etc.</i> The Management Department also provides specialized studies in <i>Entrepreneurship</i> for students interested in running their own businesses.</p> <p>Employers in both the private and public sectors put great value on graduates who have taken the time to systematically develop the relevant business and practical management skills.</p> <p>MGMT can truly be the key to your success. Contact the MGMT Department for more information.</p> <p><b><u>Extended Major</u></b></p> <p>MGMT students may apply for the extended major in Artificial Intelligence or Digital Media and Creative Arts at the end of the 3rd term of study, if they satisfy the extended major requirement. Students completing the extended major will graduate with a title bearing both the traditional major subject they selected and the extended major. JUPAS Catalogue No.	JS5316
Programme Full Name	BBA in Marketing 工商管理學士 (市場學)
Programme Short Name	MARK

**Short Description** The BBA Marketing (MARK) program grooms students to be all-rounded marketing professionals with the sense of appreciation for the synergy between marketing and other business functions. The curriculum equips students with strong leadership ability, analytical and problem-solving skills, information-based decision-making, creative thinking and strong interpersonal communications skills.

Students learn from the basic marketing core courses and advanced electives such as competitive positioning, global marketing, pricing, marketing analytics and digital marketing. Central to the program are consumer behavior and marketing research. In the final year of study, students are required to complete the capstone course – "Strategic Marketing" to integrate theoretical framework to real-world examples and make viable marketing decision using both qualitative and quantitative analysis.

Marketing courses are conducted in an interactive manner and students are usually exposed to a team environment. The program utilizes a diverse portfolio of pedagogical learning tools that include interactive class discussion, case analysis, group projects, and business simulation / games.

**Extended Major**

MARK students may apply for the extended major in Artificial Intelligence or Digital Media and Creative Arts at the end of the 3rd term of study, if they satisfy the extended major requirement. Students completing the extended major will graduate with a title bearing both the traditional major subject they selected and the extended major. For details, please refer to "[JS5300 Business & Management](#)".

**Remarks** The Year 1 curricula of JS5316 MARK and JS5300 B&M are identical. JS5316 allows students who have a special interest in BBA MARK to directly enter the major. Those admitted to JS5300 may apply to enter MARK or other business majors via the major selection exercises held at the end of the first three terms. Students interested in MARK should include either or both JS5316 and JS5300 in their program choices. [Please click here for details of JS5300 Business and Management](#).

Band A applicants who show talents and potentials for business study will be invited to engagement activities organized by HKUST Business School in May–June 2024.

<b>JUPAS Catalogue No.</b>	JS5317
<b>Programme Full Name</b>	BBA in Operations Management 工商管理學士 ( 營運管理學 )
<b>Programme Short Name</b>	OM
<b>Short Description</b>	<p>The BBA Operations Management (OM) program focuses on the effective management of resources and business processes that produce and deliver the goods and services for all kinds of organizations. Our program emphasizes real business applications of management concepts and quantitative analysis to the design, planning, control, and improvement of business operations.</p> <p>OM students acquire fundamental knowledge across business disciplines at the beginning of their studies to prepare themselves to pursue advanced management concepts as well as the techniques that are essential in managing and making sound decisions in complex business processes and supply chain operations. Two options: Business Analytics and Supply Chain Management, are available for those who would like to study the subject matter in depth or to better prepare themselves for a related career.</p> <p>The BBA OM program recognizes the importance of application-based learning. Business case studies and company projects are often incorporated in our courses which require students to bridge the concepts with real business practices. Our Department has an extensive connection to initiate projects with corporates. OM students benefit from the connection that they will have access to real business data and people in an organization to conduct analysis and make recommendations.</p> <p>The training of technical competence, analytical ability, communication skills, and leadership skills prepares our students to thrive in the rapidly-growing OM employment sector. OM specialists typically begin their careers in areas such as quality management, planning and control, project management and logistics.</p> <p><b><u>Extended Major</u></b></p> <p>OM students may apply for the extended major in Artificial Intelligence or Digital Media and Creative Arts at the end of the 3rd term of study, if they satisfy the extended major requirement. <b>JUPAS Catalogue No.</b>	JS5318
<b>Programme Full Name</b>	BBA in Professional Accounting 工商管理學士 (專業會計學)
<b>Programme Short Name</b>	ACCT
<b>Short Description</b>	<p>The BBA Professional Accounting (ACCT) program gives students a world-class start to their professional careers. It aims to groom students to be trusted accounting professionals by equipping them with a solid foundation in business and accounting knowledge, communications and leadership skills. Professional excellence courses, comprising seminars led by prominent business professionals, are incorporated into the curriculum for students to meet and learn from the leaders in the profession.</p> <p>The program offers students ample opportunities to enrich their lives in the undergraduate years, for instances, internship and cadet programs offered by Big4 CPA firms; student exchange programs; and various case competitions organized by relevant professional bodies. Scholarships are available for many of these activities.</p> <p>Four study pathways are offered in the ACCT program to accommodate students' career aspiration. Students who wish to master accounting as a language in business may take the general pathway while those who wish to pursue accounting professional qualification may take the HKICPA QP path. The ACCT program has long been academically acclaimed and is accredited by the AACSB International as well as leading professional accounting bodies such as the Hong Kong Institute of Certified Public Accountants (HKICPA), the Association of Chartered Certified Accountants (ACCA), and CPA Australia(CPAA).</p> <p>We constantly review our ACCT program to ensure it meets the evolving talent demand in the Accounting profession and business. In response to the increasing demand for data-driven insights, we have introduced the academic option "Accounting Analytics" for students who wish to develop their knowledge and skills in using data analytics in Accounting. Students may take the AA option on top of the HKICPA QP pathway.</p> <p>ACCT students may pursue dual majors if they wish to do so. The academic administration well coordinates course offerings among different programs and provides students with a conducive environment to pursue their own academic interests.</p> <p><b><u>Extended Major</u></b></p> <p>ACCT students may apply for the extended major in Artificial Intelligence or Digital Media and Creative Arts at the end of the 3rd term of study, if they satisfy the extended major requirement. Students completing the extended major will graduate with a title bearing both the traditional major subject they selected and the extended major. <b>JUPAS Catalogue No.</b>	JS5331
<b>Programme Full Name</b>	BSc in Economics and Finance 理學士 ( 經濟及金融學 )
<b>Programme Short Name</b>	ECOF
<b>Short Description</b>	<p>The BSc Economics and Finance (ECOF) program provides a solid training in both economics and finance, with a strong emphasis on the use of quantitative methods and techniques. Compare to BBA Economics program, ECOF requires fewer business core courses.</p> <p>Enjoying the synergy between economics and finance, students will be furnished with solid economic knowledge and essential quantitative skills to form an in-depth understanding of the modern economy and public policies. Students interested in economic research may enroll in the Honors Thesis Courses in their final year to further develop their research skills and take the opportunity to work closely with a faculty member on their own research project.</p> <p>Economics is a social science that studies people's decisions under constraints. It offers expertise in topics such as behavior of consumers and firms, efficiency and equity of markets, economic growth, business cycles, international trade and finance, taxation and public policies, etc. Important finance topics covered in the program include corporate finance, corporate valuation, investment analysis and portfolio management, derivative securities, financial markets and institutions, financial accounting, and international finance.</p> <p>This program is suitable for students who aspire to enter into the fields that require strong analytical and quantitative skills, such as investment banks, consulting, data analysis, economists. The sophisticated analytical training and quantitative research also prepare students to pursue further studies.</p> <p><b><u>Extended Major</u></b></p> <p>ECOF students may apply for the extended major in Artificial Intelligence or Digital Media and Creative Arts at the end of the 3rd term of study, if they satisfy the extended major requirement. <b>JUPAS Catalogue No.</b>	JS5332
<b>Programme Full Name</b>	BSc in Quantitative Finance 理學士 ( 量化金融學 )
<b>Programme Short Name</b>	QFIN
<b>Short Description</b>	<p>The BSc in Quantitative Finance (QFIN) program is designed for students with a strong desire to pursue a career in the finance industry.</p> <p>Students will follow an integrated curriculum covering areas in finance, mathematics, statistics, data analytics and computer programming. Students will acquire knowledge and skills to solve complex financial problems. Important topics covered in the program include investment analysis, portfolio management, risk management, derivative securities, and quantitative trading.</p> <p>Our graduates are well prepared for professional qualifications such as the Chartered Financial Analyst (CFA), the Certified Financial Planner (CFP), the Financial Risk Manager (FRM) and the Professional Risk Manager (PRM). Meanwhile, our curriculum is also flexible enough to accommodate students' interest in choosing their additional majors or minors. The BSc in Computer Science (COSC) is one of the most popular additional majors for QFIN students. Available minors include, but not limited to, Actuarial Mathematics, Big Data Technology, Entrepreneurship, Information Technology, and Mathematics.</p> <p>Our program offers a wide range of training and enrichment activities, such as Career Mentorship Program, QFIN Speaker Series, Undergraduate Research Opportunities Program (UROP), International Exchange Program, Bloomberg Market Concepts Certification, business case competitions, personal development training, and company visits.</p> <p>It is common for our students to take one or two semesters of study leave to work as full-time interns at financial firms. The connection with the industry and the experiences from multiple internships give them a significant advantage in the job market upon graduation. QFIN graduates are highly sought after by employers from the finance industry and across different business sectors.</p> <p><b><u>Extended Major</u></b></p> <p>QFIN students may apply for the extended major in Artificial Intelligence or Digital Media and Creative Arts at the end of the 3rd term of study, if they satisfy the extended major requirement. Students completing the extended major will graduate with a title bearing both the traditional major subject they selected and the major. For details, please refer to "<a href="#">JS5300 Business &amp; Management</a>".</p>
<b>Remarks</b>	<p>The Year 1 curricula of JS5332 QFIN and JS5300 B&amp;M are identical. JS5332 allows students who have a special interest in BSc QFIN to directly enter the major. Those admitted to JS5300 may apply to enter QFIN or other business majors via the major selection exercises held at the end of the first three terms. Students interested in QFIN should include either or both JS5332 and JS5300 in their program choices. <a href="#">Please click here for details of JS5300 Business and Management</a>.</p> <p>Band A applicants who show talents and potentials for QFIN study will be invited to engagement activities and interviews in May–July 2024.</p>

<b>Programme Full Name</b>	BSc in Global China Studies 理學士 ( 環球中國研究 )
<b>Programme Short Name</b>	GCS
<b>Short Description</b>	Global China Studies offers students a unique portfolio of knowledge about China through a global and comparative perspective. This is achieved through an interdisciplinary curriculum that explores the social, cultural, historical, economic and political developments within China, as well as its global influence and interactions. Training in comparative and advanced research methods provides students with the tools to conduct an original research project mentored by a dedicated faculty advisor in the final year. GCS students have ample opportunities to study abroad and pursue internships. To prepare our graduates for future leadership roles, the program emphasizes critical thinking, verbal and written communication, creativity, and collaboration.
<b>Remarks</b>	An <b>ELITE</b> program prepares you to conduct critical and comprehensive analysis of issues related to China in global context. Its inter-disciplinary training in humanities and social science will help you develop skills for future leadership in academic, political or commercial circles.

<b>JUPAS Catalogue No.</b>	JS5412
<b>Programme Full Name</b>	BSc in Quantitative Social Analysis 理學士 ( 定量社會數據分析 )
<b>Programme Short Name</b>	QSA
<b>Short Description</b>	<p>Quantitative Social Analysis prepares students for the rapidly growing number of positions in business, government, and the non-profit sector that involve the analysis of social data and interpretation and presentation of results. In all of these sectors, rising demand for employees with relevant skills is being driven by the rapid increases in the amount and complexity of social data being collected online and by surveys, or otherwise being made available.</p> <p>The major provides an integrated training in social science theory and evidence, statistical methods, the analysis of social data, and the interpretation and presentation of results. To achieve these goals, the program includes required courses that offer foundational training in quantitative methods and social science paradigms, electives that offer opportunities for advanced methodological training and deeper engagement of topics in social science, and a capstone project in which students will apply the skills they have learned to carry out an analysis on a topic of their choice. For their social science topics courses, students choose from a menu of courses in sociology, political science, economics, and other disciplines offered by faculty in the Division of Social Science. For their methodological training, students choose from a menu of courses offered by Social Science, Math, and other units.</p> <p>Through this training, students will learn how to apply advanced quantitative methods to complex datasets in a way that accounts for the unique challenges associated with the analysis of social data, and reflects an understanding of existing social theory and evidence. They will learn how to identify a research question, collect and manage complex social data, carry out analysis, and then develop, test, and refine hypotheses informed by social science theory.</p> <p>Graduates will also be well-prepared for postgraduate programs in social science, business, policy, and other fields.</p>

**Remarks**

The program is ideal for students with quantitative skills who would like to apply them in the study of topics related to society, politics, and the economy.

The HKUST Division of Social Science is widely considered one of the strongest in Asia. It includes more than 25 faculty members from five different disciplines: Economics; Sociology; Political Science; Psychology; and Geography. It is especially noted for its strength in quantitative research and training.

<b>Programme Full Name</b>	BSc in Integrative Systems and Design 理學士 (綜合系統與設計)
<b>Programme Short Name</b>	ISDN
<b>Short Description</b>	Within the Academy of Interdisciplinary Studies and with cross-university supports from School of Engineering, School of Science, and School of Business and Management, BSc in Integrative Systems and Design (ISDN) provides a multi-disciplinary training to students in integrative systems and design. It adopts a student-centric curriculum, which is created based on their talents and interests, and a project-based learning approach in which students study and work in teams. Students acquire knowledge in design and systems thinking, specific technology and entrepreneurial spirit through learning-by-doing. The birth of disruptive innovations requires both cutting-edge science and engineering advancement. This creates a huge demand for innovators who can integrate know-hows that span different disciplines in a human-centered mindset.
<b>Remarks</b>	Interview/Team-based Design Challenge and the submission of Design and Technology Project experience document (DTP) are compulsory for admissions.

JUPAS Catalogue No.	JS5811
Programme Full Name	BSc in Biotechnology and Business 理學士 ( 生物科技及商學 )
Programme Short Name	BIBU

**Short Description** The **Biotechnology and Business (BIBU) program** (JS5811) is jointly offered by the School of Science and the School of Business and Management. It aims to groom students with a hybrid interest in both biotechnology applications and business operations. It offers students a broad-based learning experience that encompasses essential life science and biotechnology knowledge, as well as complementary business know-how, including accounting, finance, economics, marketing, operations management. It also enhances students' creative and critical thinking abilities while helping them develop a global outlook on biotechnology development and applications, thereby laying a solid foundation of knowledge and skills to develop, manage, and market biotechnology initiatives.

The goal of the program is to nurture competent students to become industry professionals who possess both technical knowledge and business mind. Ideal candidates will be students who are technically competent, interested in biotechnology applications, as well as eager to develop a leadership career in the biotechnology or life science-related industries.

The holistic BIBU experience prepares students to excel in any career path they aspire to. This program offers rigorous training in both biotechnology and business, which is designed to prepare students for successful leadership positions within the biotechnology industry. Potential employers include multinational pharmaceutical companies, vendors of biotechnology products/services, consulting firms focusing on the biotechnology and pharmaceutical industries. A wide range of career opportunities are available in both private and public sectors.

**Remarks** Students can apply for the BIBU program through direct choice in JUPAS, or apply for transfer from the Science (Group B) program (JS5103) of the School of Science, or any Business School programs of the School of Business and Management into BIBU after their first year of study. Students interested in BIBU are encouraged to include both Biotechnology and Business (BIBU) program (JS5811) and either Science (Group B) program (JS5103) or Business and Management program (JS5300) in their JUPAS program choices.

<b>JUPAS Catalogue No.</b>	JS5812
<b>Programme Full Name</b>	BSc in Environmental Management and Technology 理學士 ( 環境管理及科技 )
<b>Programme Short Name</b>	EVMT
<b>Short Description</b>	<p>Sustainability and the protection of our environment are among the greatest global concerns of today and tomorrow, with an ever-more pressing need to find a balance between human development and environmental well-being.</p> <p>The pace-setting BSc in Environmental Management and Technology (EVMT) program offers a unique opportunity for motivated students to move ahead in this area, educating a new generation of environmental professionals with cross-disciplinary knowledge to deliver ecologically and economically sound solutions and to take up the role of sustainability managers in corporations in Hong Kong and around the globe.</p> <p>Under the Academy of Interdisciplinary Studies, EVMT program draws on HKUST's expertise in science, engineering, management and the social sciences, to examine issues from multiple viewpoints and enable students to integrate different perspectives and generate innovative ideas and solutions. Specially designed courses cover subjects such as environmental technology for impact assessment, environmental law, environmental, social and governance (ESG) management and reporting, green business strategy, energy sources and usage, sustainable development, and life cycle assessment. In the final year of study, theory is put into practice through working on real-world problems with companies and NGOs in the Capstone Project. Internships, exchanges and the development of social skills, including effective communication, teamwork and leadership training, further develop students' capabilities and confidence to work on environmental issues in business, governmental and institutional sectors. EVMT is accredited by the Hong Kong Institute of Qualified Environmental Professionals (HKIQEP).</p>
	<b>Career Prospects</b>
	<p>Environmental sustainability is a global challenge and should be a concern of every organization. Understanding the complex interface between the environment and an organization requires a blend of skills in both environmental science and management. With integrated academic and practical training, EVMT graduates are uniquely positioned to answer the growing demand for environmental professionals. Graduates can expect to pursue careers in multinational firms, government and non-governmental organizations.</p> <p>Employment status of EVMT graduates:</p> <ul style="list-style-type: none"><li>Business and commerce (50%)</li><li>Further study (15%)</li><li>NGO (15%)</li><li>Environmental consultancy (15%)</li><li>Other (5%)</li></ul>

<b>JUPAS Catalogue No.</b>	JS5813
<b>Programme Full Name</b>	BSc in Mathematics and Economics 理學士 ( 數學與經濟學 )
<b>Programme Short Name</b>	MAEC
<b>Short Description</b>	<p>The <b>Mathematics and Economics (MAEC) program</b> (JS5813) is jointly offered by the School of Science and the School of Business and Management. The program provides students with solid training in the fundamental theories of both mathematics and economics. The curriculum equips students with quantitative reasoning skills, conceptual understanding and the ability to effectively communicate in mathematics and in the language of economics and social sciences. This interdisciplinary degree program is suitable for students who seek the option of taking a quantitatively oriented job in the finance industry or who intend to pursue postgraduate study in applied mathematics, economics, business or related areas such as operations research or management science.</p>

The complexity and technical aspects of contemporary economic problems exhibit strong synergy between mathematics and economics. The program offers an advantage to students who would otherwise major in mathematics or economics alone. We aim at providing progressively challenging mathematics and economics courses that equip students with a strong quantitative background in economics and related areas in management and finance, thus preparing them for a successful career in the banking and finance industry or further studies in graduate school.

Career opportunities in the actuarial, banking and finance industry in Hong Kong are promising for those capable of applying mathematical tools to understand the financial markets and make economic forecasts. Graduates with an interdisciplinary degree are increasingly valued and needed in the job market, and tend to have more diverse career options than those majoring in Mathematics or Economics alone. A number of MAEC alumni have joined top-ranked financial institutions and multinational firms. Our MAEC graduates are equipped with sufficient background for entry into advanced/professional degree programs in economics, financial mathematics, statistics, and other business-related fields. Recent graduates have been admitted into top PhD/Master's programs at leading universities worldwide.

**Remarks** Students can apply for the MAEC program through direct choice in JUPAS, or apply for transfer into MAEC from the Science (Group A) program (JS5102) of the School of Science, or any Business School programs of the School of Business and Management after their first year of study. Students interested in MAEC are encouraged to include both Mathematics and Economics (MAEC) program (JS5813) and either Science (Group A) program (JS5102) or Business and Management program (JS5300) in their JUPAS program choices.

JUPAS Catalogue No.	JS5814
Programme Full Name	BSc in Risk Management and Business Intelligence 理學士 ( 風險管理及商業智能學 )
Programme Short Name	RMBI
Short Description	<p>Combining the world-class expertise of HKUST School of Business and Management, School of Engineering, and School of Science, the BSc program in Risk Management and Business Intelligence (RMBI) integrates risk management and business intelligence studies in one single undergraduate program to equip graduates with quantitative techniques and business knowledge to assess and mitigate risks effectively with the analysis and management of the ever-growing volume of business data. The curriculum encompasses:</p> <ul style="list-style-type: none"><li>• Understanding of risks in financial institutions and other firms, including market risks, credit risks, operational risks, and other business risks;</li><li>• Mathematical models and methods for assessing and managing risks; and</li><li>• Data/text mining methods and advanced technologies to analyze and manage the increasingly large volume of business data available for decision-making</li></ul> <p>RMBI students are required to take courses in four key areas: (a) integration of risk management and business intelligence; (b) financial investment, accounting and business; (c) risk assessment and modelling; (d) business intelligence tools and technologies. A wide range of disciplinary elective courses are offered.</p> <p>An <b>academic option "Financial Technology"</b> is provided to students who wish to pursue a deeper understanding of financial technology and its engineering foundations, crypto ventures and the latest development in the area.</p> <p>The <b>Dual Degree 4+1 Pathway (BScRMBI + MScFintech)</b> allows motivated RMBI students to pursue more in-depth exposure and development in Fintech. Selected students will start taking MSc Fintech courses in their UG year 4, and be admitted to the MSc program as full-time students in the following year. Students in this 4+1 pathway will complete both degrees in 5 years and might save up to 40% MSc tuition fee.</p> <p>The <b>corporate-sponsored capstone projects</b> connect students with leading companies such as Bloomberg L.P., Ernst &amp; Young, Hong Kong Monetary Authority, PwC and ASTRI. The in-depth study of business cases allow students to apply the classroom learning to real-world situations, cultivate creativity and critical thinking, and develop project management skills.</p> <p>RMBI students enjoy the opportunities to join a <b>variety of enrichment activities</b> including overseas exchange, seminars, internship, Mentorship Program, RMBI Symposium, International Business Case Competitions, and various professional training and workshops to enhance their learning through hands-on practice, enrich their problem-solving and communication ability, and excel in their career and personal development.</p> <p>RMBI students are well educated for a <b>wide range of functions and industries</b> including analysts and consultants in the banking sector, asset management, accounting and audit firms, management consultancies and IT advisory, etc.</p> <p>RMBI students may apply for the <b>extended major in Artificial Intelligence or Digital Media and Creative Arts</b> at the end of the 3rd term of study, if they satisfy the extended major requirement. RMBI students completing the extended major will graduate with a title bearing both the RMBI major and the extended major. For</p>

details, please refer to "[JS5300 Business & Management](#)".

**Remarks**

Students may directly apply for JS5814 BSc RMBI program in JUPAS if they have a special interest in risk management and business intelligence. For students who would like to take time to explore their academic interest, they may apply to enter the School of Business and Management, the School of Engineering or the School of Science first and then join the RMBI program via the major selection exercise after completing the first year of study.

Interview is compulsory for admissions. Band A applicants will be invited to program-specific interviews or engagement activities in May–July 2024.

<b>JUPAS Catalogue No.</b>	JS5822
<b>Programme Full Name</b>	BSc in Sustainable and Green Finance 理學士 ( 可持續發展及綠色金融 )
<b>Programme Short Name</b>	SGFN
<b>Short Description</b>	<p>The BSc in Sustainable and Green Finance (SGFN) program is at the forefront of undergraduate education in Hong Kong to equip students with interdisciplinary knowledge and skills in both Business &amp; Finance and Environment &amp; Sustainability areas. The program is jointly offered by the School of Business and Management and the Division of Environment and Sustainability, designed for students who would like to pursue a career in the sustainable and green finance industry.</p> <p>Investing in sustainability has been a global megatrend in recent years driven by the collective effort among governments and businesses around the world to address climate risks. The global net-zero transition requires business and political leaders to better manage sustainability-related risks and reprioritize the economic activities and investment portfolios toward sustainable development. It creates tremendous opportunities in different areas within economies, including carbon pricing and trading market, sustainability-linked debt market, green financial product development, sustainable supply chain financing, environment, social, and governance (ESG) management and strategy development, etc.</p> <p>SGFN program nurtures students to be effective leaders in the sustainable and green finance industry. The curriculum overlays business and finance topics with sustainability significance, which covers the latest sustainable and green finance development at national and global levels to provide students with a global perspective in the field with local relevance. Some courses are newly designed to address the growing attention on sustainable finance issues, important topics include ESG investing, governing green finance, sustainable supply chain management, risk management, circular economy, and so on. The learning experience in the SGFN program is across the spectrum of theory and practice. Wide range of co-curricular activities are provided for students to connect with the industry and to support students' personal development.</p> <p>Sustainable and green finance professionals are highly desirable globally. SGFN graduates will be able to develop careers in different sectors, including investment/retail banking, asset management, corporate finance, risk management, ESG consulting, capable in conducting sustainable investment analyses, ESG analyses, sustainability consulting, sustainable finance product development and so on.</p>
<b>Remarks</b>	<p>JS5822 allows students who have a special interest in BSc SGFN to directly enter the major. For students who would like to take time to explore their academic interest, they may also apply to JS5300 Business and Management and join the SGFN program via the major selection exercise after completing the first year of study. <a href="#">Please click here for details of JS5300 Business and Management</a>.</p> <p>Interview is compulsory for admissions. Programme Full Name	BEng/BSc & BBA Dual Degree Program in Technology & Management 科技及管理學雙學位課程
Programme Short Name	T&M-DDP

**Short Description**

**Overview**

Under the Academy of Interdisciplinary Studies, the Dual Degree Program in Technology & Management (T&M-DDP) is designed to provide a world-class interdisciplinary education that emphasizes technological innovation and managerial leadership with an inclination towards a global perspective. T&M-DDP, the first of its kind in Hong Kong, offers high-caliber students an inspiring opportunity to gain two internationally-recognized degrees in five years: Bachelor of Engineering (BEng) or Bachelor of Science (BSc), and Bachelor of Business Administration (BBA).

T&M-DDP empowers students the skills to analyze issues from both technological and business viewpoints and to solve problems with both quantitative and qualitative methodologies. Students also develop awareness of different cultures and global perspectives and foster a willingness to serve. With double degrees in technology and management, our graduates have a wide variety of career advancement opportunities.

**Curriculum**

As a fully-integrated program, T&M-DDP students study engineering/science and business courses every year. In addition to the major disciplines, students are also exposed to courses in mathematics, entrepreneurship, social science and humanities, and business communications in English and Chinese which sharpen their analytical skills, critical thinking, and broaden their horizons. The program is challenging yet rewarding as it delivers outstanding opportunities for students to acquire broad and deep knowledge in technology and management.

**Enrichment Activities & Signature Courses**

Apart from overseas exchange and internship opportunities, T&M-DDP offers a series of unique TEMG courses to cultivate students' innovative thinking, deepen their knowledge of technology and management, and develop their communication and interpersonal skills, equipping them to become tomorrow's global leaders:

**T&M International Business Plan Competition (TEMG4970):** This is a popular international event co-organized with overseas partner institutions in different continents, such as the University of Illinois at Urbana-Champaign, University of Bayreuth and University of Sao Paulo, just to name a few. Participants work in multinational teams to develop creative applications and viable business plans for an emerging technology.

**T&M Corporate Consulting Projects (TEMG4950) and T&M Prototyping and Research Projects (TEMG4940):** Students solve real-world challenges faced by our corporate sponsors using advanced technology and business strategies in the format of consulting, desktop research or solution prototyping. Past corporate sponsors include Arup, Bayer Japan, Google, UBS Zurich/APAC, P&G, HARMAN, IBM, and PCCW-HKT, among many others.

**T&M Case Analysis and Product Innovation (TEMG3950):** This is a fundamental course to develop students' structured problem-solving skills using MECE frameworks, and communication skills using 5-Step Persuasive Selling in essay and presentation format. Also, it helps foster critical thinking using techniques such as Design Thinking, Value Proposition Design, and Business Model Canvas.

**T&M Professional Activities (TEMG1010):** Throughout the 5-year program, a variety of Technology & Management enrichment activities e.g. Survival Camp, Executive Forum, career workshops, are offered to enhance students' presentation and communication skills, develop their cross-cultural understanding, and cultivate their leadership abilities. These professional activities are customized for each class to meet the specific needs of students at different development stages.

#### Career Prospect

Dynamic and forward-looking, T&M-DDP graduates can handle technological issues and understand business management. Our graduates work in diverse industries: Banking and Finance (25%), Engineering (23%), Further Studies (15%), Consultancy (13%), Business Management (11%), Information Technology (11%) and Startups (2%). (as of 2022)

#### Remarks

Interview is compulsory for admissions. Selected Band A applicants will be invited to attend an interview in May or July 2024.

#### Programme Website

<https://techmgmt.hkust.edu.hk/>  
<http://join.hkust.edu.hk/>

#### General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE <sup>Note1</sup>	3
CITIZENSHIP AND SOCIAL DEVELOPMENT <sup>Note2</sup>	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS <sup>Note4</sup>	3
<b>Or</b>	
ANY 1 SUBJECT	3
MATHEMATICS EXTENDED MODULE 1 OR 2	3

#### Notes:

1. Non-Chinese speaking (NCS) students may use an alternative Chinese subject, an HKDSE Other Language subject, or an HKDSE Applied Learning Chinese subject to satisfy the University's Chinese language requirement.
2. The result(s) of Liberal Studies in previous sitting(s) will also be considered in HKUST General Entrance Requirement. Level 2 or above is required. "Attained" level in Citizenship and Social Development and the result(s) of Liberal Studies will not be considered in the admissions score calculation.

3. The above subjects refer to Category A subjects.
4. Grade C or above in Category C (Other Languages) subjects can count as Elective 2 (for some programs).

**Calculation of scores for applicants with more than 1 sitting in HKDSE Examination**

Once the minimum entrance requirements have been met, the best results achieved in all sittings will be used for calculating admissions scores.

**Programme Entrance Requirements**

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT <sup>Note1</sup>	Attained
ENGLISH LANGUAGE	4
MATHEMATICS COMPULSORY PART	3
Elective Subject(s)	Minimum Level
BIOLOGY or CHEMISTRY or PHYSICS or COMBINED SCIENCE or INFORMATION AND COMMUNICATION TECHNOLOGY	3
MATHEMATICS EXTENDED MODULE 1 OR 2	3
<b>Or</b>	
BIOLOGY or CHEMISTRY or PHYSICS or COMBINED SCIENCE or INFORMATION AND COMMUNICATION TECHNOLOGY	3
ANY 1 SUBJECT <sup>Note2</sup>	3

Notes:

1. The result(s) of Liberal Studies (Level 2 or above) achieved in previous sitting(s) will also be considered.
2. The above subjects refer to Category A subjects.
3. Interview is compulsory for admissions.
