Short Description

The School-based program at the School of Science provides an invaluable opportunity for students to have a deeper understanding of the world and themselves before they decide on their majors. The goal is to offer a more diverse, interdisciplinary, and inquiry-driven undergraduate education to students interested in science. Students receive a broader knowledge- and inquiry-based education while enjoying greater course flexibility in accordance with their aspirations. In addition, they are given an environment where they can explore their aptitudes and nurture their interests during the first two to three terms before deciding their path of study among the programs offered by the School.

Diverse learning experiences including lectures, laboratory courses, capstone projects, signature courses, and language courses, especially designed for science students' needs, are integrated into the new curriculum of each major program. This ensures that students have a solid foundation and an adequate exposure to a range of science disciplines. The School has particularly placed enormous efforts and resources into designing its laboratory and signature courses with the aim of nurturing students' competency in experimental methods and logical analysis, which are the two indispensable pillars of scientific method.

The curricula are designed to cater for diversity. Most science major programs offer different study tracks and options, while providing opportunity for double majors and minors. Courses are designed to suit the diverse backgrounds and needs of students. Based on the students' interests, they provide opportunities for students to deepen their understanding of the major discipline, which will be useful for graduate degrees in the future. Taking up a minor program and/or free electives to widen their scope of learning outside their core disciplines also fall under this category. Meanwhile, interdisciplinary and collaborative efforts with other units within and outside of the University are emphasized in the science programs to ensure that our education is in-step with the ever-changing world.

Students' personal development continues to be of top concern. Beside academic components, co-curricular opportunities of an even more diverse nature (including but not limited to student exchange, undergraduate research, internship, community services and engagement programs designed for the School of Science students only) are to be provided to enrich and enhance students' university experience.

Students admitted to the regular Science program of the School of Science can apply for transfer into the International Research Enrichment program (IRE, JS5101) after their first year of study. Students interested in IRE are encouraged to include both Science program (JS5100) and IRE program (JS5101) in their program choices.

Short Description

The HKUST School of Engineering is the most comprehensive Engineering School in Hong Kong. The School has a strong international reputation and consistently ranks high among major engineering schools around the world. In 2018 QS World University Rankings, HKUST was ranked No. 17 globally in Engineering and Technology, and among the top 30 in the world in all engineering disciplines.

The School of Engineering adopted School-based admission. In the first year of study, students will undergo fundamentals embracing general education and essential foundations. In the School of Engineering, upon completion of the first year, students will be able to select any engineering major from a wide range of programs. All Bachelor of Engineering degree programs are accredited by the Hong Kong Institution of Engineers (HKIE).*

The four-year curriculum requires around 120 credits. The new curriculum provides a more student focused and broader program structure with a large degree of flexibility which enables students an all-round educational experience and better prepares them for diverse careers. The curriculum is designed to help students identify their interest and career aspiration.

The Centre for Engineering Education Innovation (E²I) was established to support engineering students exclusively and help them achieve a successful year at the beginning of their university study. Introduced by E²I, the peer mentoring program will offer first-year students counseling support and help them understand their own interest and academic strengths.

**Please refer to the HKIE website for the accreditation status of individual programs.*

First Year Tuition Fee	HK\$ 42,100
Short Description	This program provides a multi-disciplinary training to students in integrative systems and design. It adopts a student-centric curriculum, which is created based on their talents and interests, and a project-based learning approach in which students study and work in teams. Students acquire knowledge in design and systems thinking, specific technology and entrepreneurial spirit through learning-by-doing. The birth of disruptive innovations requires both cutting-edge science and engineering advancement and creates a huge demand for innovators who can integrate know-hows that span different disciplines in a user-oriented and human-centered mindset.

Remarks:

- (1) Candidates applying for admission to the BSc in ISD (ISDN) program are required to upload the Design and Technology Portfolio (DTP) through the [ISD Admissions website](https://isd.ust.hk/admissions/). DTP is a purposeful collection of the student's past design and technology efforts, to tell a coherent story of their problem-solving approach and design process to arrive at the final work. It highlights candidates' previous project work that describes how, why and what the students work on the projects. Note that the submission of DTP is MANDATORY, candidates who fail to submit the DTP will not be considered for the application. For DTP submission guidelines, please visit: <https://isd.ust.hk/admissions/>
- (2) The shortlisted candidate will be invited for the MANDATORY Team-based Design Challenge. For the format and schedule of the Team-based Design Challenge, please visit: <https://isd.ust.hk/admissions/>.

Funding Category	UGC-funded
First Year Tuition Fee	HK\$ 42,100

Short Description

The HKUST Business and Management (B&M) program is our school-based admission route and one of the most well-regarded and comprehensive business programs in Hong Kong. The program is designed to provide students with a broad foundation of knowledge and great flexibility in learning.

In the first three terms, students will be exposed to a wide variety of business and other foundational subjects so that they can fully explore their interests before committing to one or more specialized area(s) of study during major selection exercises held twice a year.

The School offers two quantitative-oriented Bachelor of Science (BSc) programs and nine Bachelor of Business Administration (BBA) programs. About half of the planned major seats are reserved for B&M program students to enroll in the major via the major selection exercises.

Planned major seats of individual program are listed below for reference:

<i>BSc Programs</i>	Planned Major Seats
Economics and Finance	55
Quantitative Finance	40

<i>BBA Programs</i>	Planned Major Seats
Economics	100
Finance	120
Global Business	55
Information Systems	180
Management	190
Marketing	215
Operations Management	120
Professional Accounting	200

Over 80% of business students were admitted into their first- or second-choice major through major selection exercises. For the 2017 4Y graduating class, 82.5% of business students completed their degree with additional major(s) or minor(s).

Our flexible curriculum structure allows students to customize their program combination based on their personal interests, e.g., BBA (Finance and Information Systems), BBA (Marketing and Operations Management), BBA (Management and Professional Accounting), etc. Students may also pursue one or more of the 22 minors offered by the School of Science, School of Engineering, or School of Humanities and Social Science, e.g. Design, Entrepreneurship, China Studies, Mathematics, Social Science, etc.

The School currently has 134 world-renowned exchange partners, providing 400 exchange-out places per year for business students. It has also set up a career development team to expand internship and graduate job opportunities and provide professional workshops for students. The graduate survey showed that 93% of business students in the class of 2017 had completed at least one internship during their study.

Short Description	<p>The BBA Economics (ECON) program focuses on economic reasoning for sound business decisions. Compare to our BSc Economics and Finance program, the BBA ECON students take more core courses in various business disciplines which equip them with a multi-disciplinary perspective to analyze problems and recommend solutions. Students are required to complete a research-based capstone course to demonstrate their mastery application of knowledge and analytical skills.</p> <p>Economics is a social science that studies people's decisions under constraints. It offers expertise in topics such as behavior of consumers and firms, efficiency and equity of markets, economic growth, business cycles, international trade and finance, taxation and public policies, etc.</p> <p>Our flexible curriculum allows students to pursue an additional major in other business areas. Students may also pursue a minor offered by other Schools at HKUST. The interdisciplinary insight, combining the analytical nature of economics give BBA ECON graduates an edge in a range of career choice across business fields.</p>

First Year Tuition Fee	HK\$ 42,100

Short Description	<p>The BBA Finance (FINA) program aims to equip students with quantitative and qualitative analytical skills to make sound decisions in complex financial problems. Students will learn how to identify valuable opportunities, evaluate alternatives, assess and price risks, and manage money. Important topics covered in the rigorous curriculum include corporate finance, corporate valuation, investment analysis and portfolio management, derivative securities, financial markets and institutions, financial accounting, and international finance.</p> <p>FINA curriculum helps students gain proficiency in working with industry-standard databases such as the Bloomberg Professional Services and Morningstar Direct. FINA students will acquire well-rounded business knowledge by taking courses in both finance and other business disciplines including accounting, business statistics, computer science, economics, information systems, marketing, operations management and organization behavior.</p> <p>Our program offers many elective courses for students to develop specialties in specific areas of finance. The program is also flexible enough to accommodate students' interest in choosing other disciplines for additional major and minor studies.</p> <p>The ample enrichment opportunities such as Undergraduate Research Opportunities Program (UROP), Finance Seminar Series, business competitions, company visits, personal development training, internships, and overseas exchange, complement FINA students' studies. The real world experience nurtures our students to be well-rounded finance professionals.</p> <p>Our graduates typically pursue careers in investment banking, retail banking, fund management, trading, private equity, insurance, accountancy, legal and compliance, risk management and management consulting. They are also well prepared for professional qualifications such as CFA, CFP, FRM and PRM.</p>

First Year Tuition Fee	HK\$ 42,100

Short Description	<p>The BBA Global Business (GBUS) program, the first of its kind and a highly sought-after business program in Hong Kong, is designed for capable and highly motivated students who aspire to make a difference. With “Act with Integrity”, “Live with Compassion”, and “Commit to Excellence” as its mottoes, the program is designed to develop students to tackle global challenges and pursue their dreams as a responsible leader with humility, enthusiasm, cultural sensitivity, compassion in social causes, and sound critical thinking.</p> <p>Learning at GBUS extends far beyond the classrooms and libraries. With a dynamic and diverse peer group and a strong culture of student initiatives, students can learn a great deal from each other. There are a variety of co-curricular activities for students to get involved and connected with the corporate and global community, such as Global Leadership Forum, Corporate Mentor Program, Study Trips, and International Business Case Competitions.</p> <p>GBUS Program allows great flexibility for students to customize their learning experience. Students can select from a range of additional major(s) and/or minor(s) offered at HKUST, such as Finance, Information Systems, Mathematics, Computer Science, Entrepreneurship, and Social Science to fit their interests and aspiration. All GBUS students take a foreign language and spend at least one term studying abroad at different top business schools of their choice, thus forming a wide global network. GBUS students could join the School's exchange program twice to extend their global learning to different continents.</p> <p>The design of the GBUS curriculum reflects our focus on the cultivation of students' global perspective and application-based learning. Some signature GBUS courses are “Doing Business in Asia and Emerging Markets”, “Global Perspectives on Contemporary Issues”, “Global Business Case Studies”, “Public Service Project”, and “Capstone Project”.</p>

First Year Tuition Fee	HK\$ 42,100

Short Description	<p>The BBA Information Systems (IS) program is offered by one of the Top-20 Information Systems departments in the world. Nowadays, information systems play a critical role in driving business innovations in organizations. This program trains students to become technically-proficient business professionals with the ability to analyze, design, implement, and audit information systems for businesses. The program is suitable for students who want to utilize Information Systems to solve business problems.</p> <p>Our curriculum covers from basic concepts to complex theories, and applications of information systems to businesses. Prior background in science or IT is not required for admission. Students are required to take a combination of business foundation courses and technology management courses (e.g. Innovation Management, Business Analytics) as the basis to pursue in-depth knowledge in IS.</p> <p>IS students are offered two options, namely "Business Analytics" and "Information Systems Auditing" to suit their own academic interest and career plan.</p> <p>Our IS program is the first program in the Asia-Pacific region that was approved to be in alignment with the Information Systems Audit and Control Association (ISACA) model curriculum. Our students can waive 3-4 years off the 5-year requirement of professional information systems auditing work experience for obtaining the Certified Information Systems Auditor (CISA) professional certification which is a requirement for IS auditor jobs with the Big4 accounting firms.</p> <p>The IS program recognizes the significance of enrichment opportunities and the close connection with the industry. In addition to encouraging students to participate in one-year internship programs, and local and international case competitions, the HKUST ISACA Student Group, which is the first student group in Greater China officially recognized by ISACA International Headquarters, dedicates to offer students networking opportunities with Hong Kong business leaders.</p> <p>Our graduates are in high demand in the job market. They may pursue a career in, but not limited to, these professional specializations: (1) business analytics, business intelligence and big data, (2) information systems auditing, (3) fintech, (4) cybersecurity, (5) technology and innovation management, (6) technology entrepreneurship and (7) electronic/mobile commerce.</p>

Short Description	<p>The MGMT program nurtures students to succeed in today's competitive business world by teaching them to evaluate the current needs of an organization while anticipating the future ones. MGMT students will acquire a broad range of knowledge and skills to manage people and resources effectively.</p> <p>Our comprehensive MGMT curriculum teaches students how to strategically formulate organizational goals for the short-/long-term. Students will systematically study decision-making processes, carefully design organizational structures, tactfully solve business problems, and thoroughly understand the human motivations behind them all. MGMT students are trained to be skilled in the key aspects of management, including: <i>planning, organizing, staffing, leading, and controlling</i> organizations. These professional management skills are essential to drive business growth and help businesses accomplish their strategic goals.</p> <p>The Management Department recently introduced two popular Options for students to develop their specialty. The two Options, namely the '<i>CSR and Sustainability Option</i>' and the '<i>Consulting Option</i>', help prepare students to meet the emerging yet challenging marketplace trends.</p> <p>In addition, MGMT students are offered an excellent array of courses to suit their own academic interests. These courses include: <i>Organizational Behavior, Negotiation, Management in Chinese Contexts, Human Resources Management, Strategic Management, International Management, etc.</i> For students interested in running their own business, the Management Department also offers specialized studies in <i>Entrepreneurship</i>.</p> <p>The relevant business knowledge and practical management skills acquired, ensure that MGMT graduates are highly sought after by employers; both in the private and public sectors.</p> <p>MGMT can truly be the key to your success. Contact the MGMT Department for more information.</p>

First Year Tuition Fee	HK\$ 42,100
Short Description	<p>The BBA Operations Management (OM) program focuses on the effective management of resources and business processes that produce and deliver the goods and services for all kinds of organizations. Our program emphasizes real business applications of management concepts and quantitative analysis to the design, planning, control, and improvement of business operations.</p> <p>OM students acquire fundamental knowledge across business disciplines at the beginning of their studies to prepare themselves to pursue advanced management concepts as well as the techniques that are essential in managing and making sound decisions in complex business processes and supply chain operations.</p> <p>The BBA OM program recognizes the importance of application-based learning. Business case studies and company projects are often incorporated in our courses which require students to bridge the concepts with real business practices. Our Department has an extensive connection to initiate projects with corporates. OM students benefit from the connection that they will have access to real business data and people in an organization to conduct analysis and make recommendations.</p> <p>The training of technical competence, analytical ability, communication skills and leadership skills prepares our students to thrive in the rapidly-growing OM employment sector. OM specialists typically begin their careers in areas such as quality management, planning and control, project management and logistics.</p>

First Year Tuition Fee	HK\$ 42,100
Short Description	<p>The BBA Professional Accounting (ACCT) program gives students a world-class start to their professional careers. It aims to groom students to be trusted accounting professionals by equipping them with a solid foundation in business and accounting knowledge, communications and leadership skills. Professional excellence courses, comprising seminars led by prominent business professionals, are incorporated into the curriculum for students to meet and learn from the leaders in the profession.</p> <p>The program offers students ample opportunities to enrich their lives in the undergraduate years, for instances, internship and cadet programs offered by Big4 CPA firms; student exchange programs; and various case competitions organized by relevant professional bodies. Scholarships are available for many of these activities.</p> <p>The program has long been acclaimed and accredited by both the academic agency and leading professional accounting bodies worldwide, namely, the AACSB International, the Hong Kong Institute of Certified Public Accountants ("HKICPA"), the Association of Chartered Certified Accountants ("ACCA"); and the CPA Australia.</p> <p>The curriculum flexibility allows students to pursue dual majors if they wish to do so. The academic administration well coordinates course offerings among different programs and provides students with a conducive environment to pursue their own academic interests.</p>

Short Description	<p>The BSc Economics and Finance (ECOF) program provides a solid training in both economics and finance, with a strong emphasis on the use of quantitative methods and techniques. Compare to BBA Economics program, ECOF requires fewer business core courses.</p> <p>Enjoying the synergy between economics and finance, students will be furnished with solid economic knowledge and essential quantitative skills to form an in-depth understanding of the modern economy. Students are required to complete a research-based capstone course to demonstrate their mastery application of knowledge and quantitative research skills.</p> <p>Economics is a social science that studies people's decisions under constraints. It offers expertise in topics such as behavior of consumers and firms, efficiency and equity of markets, economic growth, business cycles, international trade and finance, taxation and public policies, etc. Important finance topics covered in the program include corporate finance, corporate valuation, investment analysis and portfolio management, derivative securities, financial markets and institutions, financial accounting, and international finance.</p> <p>This program is suitable for students who aspire to enter into business fields that require strong analytical and quantitative skills, such as investment banks, consulting, data analysis, economists. The sophisticated analytical training and quantitative research also prepare students to pursue further studies.</p>

Short Description	<p>The BSc Quantitative Finance (QFIN) program, offered by the HKUST Business School, is an undergraduate program designed for high-caliber students with a strong desire to become quantitative finance professionals.</p> <p>Students will follow an integrated curriculum comprising courses from different schools. They will acquire a solid knowledge base of finance and essential mathematical and statistical tools to solve complex financial problems. Important topics covered in the program include derivative securities, quantitative trading, risk management, investment analysis and portfolio management. Having cutting-edge knowledge in quantitative methods and financial tools, QFIN graduates are highly sought after by employers from the finance industry and across different sectors of the economy.</p> <p>Our graduates are well prepared for professional qualifications such as CFA, CFP, FRM and PRM. Meanwhile, our curriculum is also flexible enough to accommodate students' interest in choosing their additional major or minors. Available minors include, but not limited to entrepreneurship, actuarial mathematics, big data technology, and biotechnology.</p> <p>Our program is both challenging and selective, offering a wide range of training courses and enrichment opportunities such as Bloomberg Training Program, Career Mentoring Program, Finance Speaker Series, Undergraduate Research Opportunities Program (UROP), International Exchange Program, business case competitions, personal development training, and company visits.</p> <p>It is common for our students to take one or two semesters of study leave to work as full-time interns at financial firms. The connection with the industry and the experiences from multiple internships give them a significant advantage in the job market upon graduation.</p>

JUPAS Catalogue No.	JS5412
Programme Full Name	BSc Quantitative Social Analysis 理學士 (定量社會數據分析)
Programme Short Name	QSA
Remarks	-
Programme Website	http://www.shss.ust.hk/ug/major/qa/ http://join.ust.hk
Contacts	Ms Polly Lai Email: qsapgm@ust.hk Tel: 2358 8559
Funding Category	UGC-funded
First Year Tuition Fee	HK\$ 42,100

Short Description

Quantitative Social Analysis prepares students for the rapidly growing number of positions in business, government, and the non-profit sector that involve the analysis of social data and interpretation and presentation of results. In all of these sectors, rising demand for employees with relevant skills is being driven by the rapid increases in the amount and complexity of social data being collected online and by surveys, or otherwise being made available.

The major provides an integrated training in social science theory and evidence, statistical methods, the analysis of social data, and the interpretation and presentation of results. To achieve these goals, the program includes required courses that offer foundational training in quantitative methods and social science paradigms, electives that offer opportunities for advanced methodological training and deeper engagement of topics in social science, and a capstone project in which students will apply the skills they have learned to carry out an analysis on a topic of their choice. For their social science topics courses, students choose from a menu of courses in sociology, political science, economics, and other disciplines offered by faculty in the Division of Social Science. For their methodological training, students choose from a menu of courses offered by Social Science, Math, and other units.

Through this training, students will learn how to apply advanced quantitative methods to complex datasets in a way that accounts for the unique challenges associated with the analysis of social data, and reflects an understanding of existing social theory and evidence. They will learn how to identify a research question, collect and manage complex social data, carry out analysis, and then develop, test, and refine hypotheses informed by social science theory.

Graduates will also be well-prepared for postgraduate programs in social science, business, policy, and other fields.

The program is ideal for students with quantitative skills who would like to apply them in the study of topics related to society.

Please note that we revised the curriculum in Spring 2017 to streamline it and make it more flexible, so even if you have previously visited the program website, you should visit again to see the new curriculum:

<http://www.shss.ust.hk/ug/major/qa/curriculum/program-requirement>

The HKUST Division of Social Science is widely considered one of the strongest in Asia. It includes more than 30 faculty members from six different disciplines: Economics; Sociology; Political Science; Psychology; Geography; and Science, Technology and Society. It is especially noted for its strength in quantitative research and training.

Funding Category	UGC-funded
First Year Tuition Fee	HK\$ 42,100
Short Description	<p>The Biotechnology and Business Program is jointly offered by the School of Science and the School of Business and Management. It offers students a broad-based learning experience that encompasses essential life science and biotechnology knowledge, as well as complementary business know-how, including accounting, finance, economics, marketing, operations management, etc. It also aims to enhance students' creative and critical thinking abilities while helping them develop a global outlook on biotechnology development and applications, thereby laying a solid foundation of knowledge and skills to develop, manage, and market biotechnology initiatives.</p> <p>The goal of the program is to nurture competent students to become industry professionals who possess both technical knowledge and a business mind. Ideal candidates will be students who are technically competent, interested in biotechnology applications, as well as eager to develop a managerial or leadership career in the biotechnology or life science-related industries.</p> <p>Students can apply for the BIBU program through the direct choice in JUPAS, or apply for transfer from the regular Science program (JS5100) of the School of Science or any Business School programs of the School of Business and Management into BIBU after their first year of study. Students interested in BIBU are encouraged to include both Science program (JS5100) and Business and Management program (JS5300) in their program choices.</p>

First Year Tuition Fee	HK\$ 42,100
Short Description	<p>Sustainability and the protection of our environment are among the greatest global concerns of today and tomorrow, with an ever-more pressing need to find a balance between human development and environmental well-being.</p> <p>The pace-setting BSc Environmental Management and Technology (EVMT) program offers a unique opportunity for motivated students to move ahead in this area, educating a new generation of environmental professionals with cross-disciplinary knowledge to deliver ecologically and economically sound solutions and to take up the role of sustainability managers in corporations in Hong Kong and around the globe. EVMT is accredited by the Royal Institution of Chartered Surveyors (RICS).</p> <p>Drawing on HKUST's expertise in science, engineering, management and the social sciences, the EVMT program examines issues from multiple viewpoints to enable students to integrate different perspectives and generate innovative ideas and solutions. Specially designed courses cover subjects such as environmental technology, environmental law, environmental, social and governance (ESG) management and reporting, green business, energy resources and sustainable development. In the final year study, theory is put into practice through working on real-world problems with companies and NGOs in the Capstone Project. Internships, exchanges and the development of social skills, including effective communication, teamwork and leadership training, further develop students' capabilities and confidence to work on environmental issues in business, governmental and institutional sectors.</p>

JUPAS Catalogue No.	JS5813
Programme Full Name	BSc Mathematics and Economics 理學士 (數學與經濟學)
Programme Short Name	MAEC
Remarks	-
Programme Website	http://maec.ust.hk http://join.ust.hk
Contacts	School of Science Email: ugscience@ust.hk Tel: 2358 5065
Funding Category	UGC-funded
First Year Tuition Fee	HK\$ 42,100
Short Description	<p>The BSc Mathematics and Economics (MAEC) program is jointly offered by the School of Science and the School of Business and Management of HKUST. The program provides students with solid training in the fundamental theories of both mathematics and economics. The curriculum equips students with quantitative reasoning skills, conceptual understanding and the ability to effectively communicate in mathematics and in the language of economics and social sciences. This interdisciplinary degree is suited to students who seek the option of taking a quantitatively oriented job in the finance industry or who intend to pursue postgraduate study in applied mathematics, economics, business or related areas such as operations research or management science.</p> <p>The complexity and technical aspects of contemporary economic problems exhibit strong synergy between mathematics and economics. The program offers an advantage to students who would otherwise major in mathematics or economics alone. We aim to provide sequences of advanced mathematics and economics courses that equip students with a strong quantitative background in economics and related areas in management and finance, thus preparing them for a successful career in the banking and finance industry or further studies in graduate school.</p> <p>Students can apply for the MAEC program through direct choice in JUPAS, or apply for transfer into MAEC from the regular Science program or any Business School programs at HKUST after their first year of study. Students interested in MAEC are encouraged to include both Science program (JS5100) and Business and Management program (JS5300) in their program choices.</p>

JUPAS Catalogue No.	JS5814
Programme Full Name	BSc Risk Management and Business Intelligence 理學士 (風險管理及商業智能學)
Programme Short Name	RMBI
Remarks	-
Programme Website	http://www.rmbi.ust.hk http://join.ust.hk
Contacts	Ms Mayumi Lau Email: joinrmbi@ust.hk Tel: 3469 2399
Funding Category	UGC-funded
First Year Tuition Fee	HK\$ 42,100
Short Description	<p>Risk management and business intelligence form a vital part of a company's strategic planning and decision-making in our globalized era. Fast-paced developments in asset management, financial operations, marketing, healthcare, and other major challenges all indicate the essential need for firms to assess and minimize risk effectively with the analysis and management of the ever-growing volume of business data. The BSc in Risk Management and Business Intelligence is the first in Hong Kong to integrate these two fields and answer both market needs in one undergraduate program.</p>

Combining the world-class expertise of HKUST's Schools of Business and Management, Engineering, and Science, the cutting-edge RMBI program provides a curriculum to cater for the market needs with an emphasis on quantitative techniques and business knowledge, encompassing:

- Understanding of risks in financial institutions and other firms, including market risks, credit risks, operational risks, and business risks
- Mathematical models and methods for assessing and minimizing risks
- Classic data/text mining methods and advanced information technologies to analyze and manage the increasingly large volume of business data available for decision-making

Courses Offered in the RMBI Curriculum

Integration of Risk Management and Business Intelligence

- Introduction to Risk Management and Business Intelligence
- Risk Management and Business Intelligence Capstone Project I
- Risk Management and Business Intelligence Capstone Project II
- Academic and Professional Development in Risk Management and Business Intelligence

Financial Investment, Accounting and Business

- Macroeconomics
- Principles of Accounting I
- Fundamentals of Business Finance
- Business Case Analyses I/II
- Financial Service Operations Management
- Investment Analysis and Portfolio Management

- Operations Management
- Management Science
- Derivative Securities

Risk Assessment and Modeling Methods

- Calculus/Accelerated Calculus/Honors Calculus
- Introduction to Probability Models
- Introduction to Multivariable Calculus
- Matrix Algebra and Applications
- Applied Statistics
- Quantitative Methods for Risk Management
- Statistics for Financial Risk Management
- Quantitative Methods for Fixed Income Derivatives
- Time Series Analysis and Forecasting
- Fundamentals of Mathematical Finance
- Life Contingencies Models and Insurance Risk

Business Intelligence Tools and Technologies

- Introduction to Computer Science
- Introduction to Computing Java/Excel VBA
- Introduction to Object-Oriented Programming
- Object-Oriented Programming and Data Structures
- Introduction to Information Systems
- Database Management Systems
- Data Mining
- Data Mining for Business Analytics
- Advanced Data Mining for Risk Management and Business Intelligence
- Internet Computing
- Search Engines for Web and Enterprise Data
- Data Visualization

Capstone Projects

Through in-depth study of business cases from corporate sponsors, students can learn to apply different areas of knowledge gained in their studies to real-world situations, build up creative and critical thinking, and develop their project management skills. Projects also help students establish future business links. Corporate sponsors have included AIA Group, Bloomberg L.P., Société Générale, Wing Lung Bank, Hospital Authority and Hong Kong Jockey Club.

Enrichment Programs

RMBI students enjoy valuable opportunities to join a variety of enrichment activities including overseas exchange, mentorship, internship, RMBI newsletter, RMBI symposium, seminars and professional qualifications trainings to enhance their learning through practice, enrich their problem solving, and communication skills and excel in their career and personal development.

Career Prospects

RMBI students are well-trained for a wide range of positions including analysts and consultants for regional and global banks, asset management corporations, accounting and audit firms, professional consultancies and IT businesses etc.

The BSc program in Risk Management and Business Intelligence (RMBI) will be administered by the Department of Information Systems, Business Statistics and Operations Management of the School of Business and Management with effect from 1 September 2019, subject to approval from the Senate in April 2019. The

program will remain interdisciplinary with objectives and design unchanged. For enquiries, please contact the program office at rmbi@ust.hk. For the latest update, please refer to program website: www.rmbi.ust.hk.

Programme Full Name	BEng/BSc & BBA Dual Degree Program in Technology and Management 科技及管理學雙學位課程
Programme Short Name	T&M-DDP
Remarks	-
Programme Website	http://www.techmgmt.ust.hk http://join.ust.hk
Contacts	Ms Cici Cheong Email: techmgmt@ust.hk Tel: 2358 8989
Funding Category	UGC-funded
First Year Tuition Fee	HK\$ 42,100

The final year of the BEng/BSc & BBA Dual Degree Program in Technology and Management is offered on a self-financing basis. For reference, the tuition is HK\$60,000 per year in 2018/19.

Short Description

Overview

The Dual Degree Program in Technology and Management Program, the first of its kind in Hong Kong, offers high-flying students an inspiring opportunity to gain two internationally recognized degrees in five years: Bachelor of Engineering (BEng) or Bachelor of Science (BSc), and Bachelor of Business Administration (BBA).

Dual Degree students learn how to analyze issues from technological and business viewpoints and solve both quantitative and qualitative problems. Students also develop awareness of different cultures and global perspectives, and foster a willingness to serve, gaining much more than two degrees. With double degrees in technology and management, our graduates have more career advancement opportunities.

Curriculum

As a fully integrated program, T&M-DDP students study both engineering/science and business courses each year. In addition to major disciplines, there are courses in mathematics, entrepreneurship, social science and humanities, English and Chinese business communication, and others to sharpen analytical skills, multiple perspectives, and critical thinking. The program is challenging but delivers outstanding opportunities for acquiring both broad and deep knowledge.

<p><u>BEng Degree:</u></p> <ol style="list-style-type: none"> 1. Bioengineering 2. Chemical Engineering 3. Civil Engineering 4. Civil and Environmental Engineering 5. Computer Engineering 6. ---	------------	---

Enrichment Activities

A variety of enrichment activities help students to consolidate multi-dimensional problem solving skills, communication skill and global understanding through real-life practices. Examples include exchange program, internship, executive forum, and leadership training. The followings are key enrichment activities offered to T&M-DDP students.

- **Technology & Management International Business Plan Competition**
A popular international event, co-organized with the University of Illinois at Urbana-Champaign (US), University of Bayreuth (Germany), University of Sao Paulo (Brazil), Mainland China and other universities. Participants work in multinational teams to develop creative applications and viable business plans for an emerging technology.
- **Corporate Projects**
Students seek novel ways to create value and solve real-life business problems faced by our corporate sponsors. Corporate sponsors have included IBM, HARMAN, a Samsung company, E&Y, Union Medical Healthcare, GoLend.hk, Baron.AI, The Hong Kong Jockey Club, Hong Kong Trade Development Council, and Akamai.

Career Prospects

Dynamic and forward-looking, T&M-DDP graduates are trained to handle technological issues and to understand business management. Our graduates work in different industries: Engineering (32%), Business Management (16%), Banking and Finance (13.5%), Consultancy (13%), Information Technology and Startups (6% each) and Further studies (13.5%).
